Get a life, get a PlayStation, get PlayStation Pro

So this is it. We're approaching the last Christmas without PlayStation 2. Can we really be given enough to keep us busy until next Autumn? You bet your arse we can. The briefest of looks at the huge titles we're reviewing this month should be enough to convince to stay in rather than go to the pub every night. How else will you be able to play the likes of Final Fantasy VIII and Dino Crisis. Not to mention the superb Tony Hawk's Pro Skateboarder.

We may be coming towards the end of the original PlayStation's natural lifespan, but the legacy lives on. We can only expect bigger and better things in the new millennium, and while we're not exactly immersing ourselves into Holodecks just yet, we'll settle for Gran Turismo 3 on the PlayStation 2 for now.

So open up the pages and become a part of the UK's fastest growing PlayStation Magazine, you know you want to!

Arcade gear-shifter screams around a fictitious corner

There are certain things we don't tend to dwell on here at Pro Mansions. When we review a game we don't give a monkey's if it was a good game on the PC. We review it on its merits as it stands - that is, as a PlayStation game. We also

don't tend to bother about which company is actually making it, as we don't see the relevance 99% of the time.

Things are ever so slightly different with Roadsters though. Publisher Titus has been around far longer than the PlayStation but in the last six months they have gone ballistic in terms of size. They've been buying up companies left, right and centre and now find themselves as the third biggest in Europe behind Eidos and Infogrames.

Now it's crunch time. If they want to maintain this position they need to back it up with software of a quality we haven't seen before from them.

Step forward Roadsters.

Stop. Don't turn the page. Yes it is "yet another PlayStation driving game". Yes - we do have too many already and if you give us a chance we'll set about telling you exactly why you should go out, buy it and place it proudly in your pile alongside Gran Turismo and Colin McRae Rally.

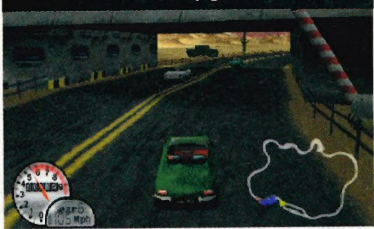

Arsé. Inadvertently we've already compared it to two of the best race games of all time but yet Roadsters is nothing like these two simulations. What we have loading up on the machine in front of us is fast, frantic, frenetic fun (parents please note: four consecutive F-words, none of which you can complain about so get off our

ters

Great scenery is just part of why Roadsters is so bloody good

backs!). Roadsters is pure arcade baby, and besides the likes of Ridge Racer 4, nothing else comes close.

Alright then. Next problem. "I already have Ridge Racer 4" you're saying to us. A wise purchase we'd reply but that shouldn't mean that Roadsters should be as difficult to accept into your lovely home as a two-legged bull terrier with rabies and a fancy for small children's faces. In fact, history shows us that you clowns go out and buy the new version of FIFA Soccer year in year out - and they're the same bloody game!

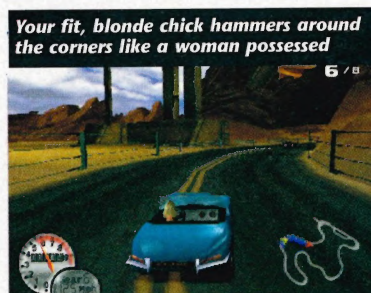

So what have we established in our investigation so far? Well besides the fact that two-legged bull terriers are extremely difficult to find good, caring homes for, we've found out that we have here an arcade racing game that we think is quite good. Let's now look into our reasoning behind that argument shall we.

For starters car freaks will go all agog when they learn you can drive any of 36 dream convertibles, all at stupid speeds around lush scenery. Several key manufacturers have been signed up to provide the vehicles, Porsche and TVR are amongst them so you get to ride in cars you'll never be able to afford, unlike driving to work in that old brown Cortina you still think impresses the girls are you creak around the Town Centre on a Thursday night at closing time.

Competition comes in the form of eight other drivers, each with their own characteristics that directly affect the way they drive the circuits. Which brings us

Sth Gear? 121Mph? Stop driving like a bird and get your foot down!

Your fit, blonde chick hammers around the corners like a woman possessed

'You'll be able to drive cars you can never afford, which beats driving around the town centre in that old brown Cortina of yours!'

neatly onto the, er circuits. Well there are 10 of these and that completes our review ladies and gentlemen, because what else is there to say about a boring old car game. Tell us Chicken, what else could there possibly be to say about "yet another racing game". Surely you have nothing else to offer, you're still about 400 words shy of completing this review and you'll just have to grab a load of

samey looking screenshots to save your pelt.

How wrong could you be! You see Roadsters brings in the unemployed's favourite past-time into the equation. Yes kids. You can gamble! Okay you may not win £4 like you can on the Princess Diana Scratch Card but what this unique facet to the gameplay does mean (and it's quite important this so take notes) is

Upfront & lowdown

Fast cars, hard cash, and gambling. Roadsters Trophy adrenalin-fuelled offering has been hailed as the racing game for all speed junkies. What's the dirt?

Roadsters Trophy is the racing title for those who have a 'thing' about luxury cars. And the cars in this game would even turn smug Jeremy Clarkson green with envy.

Throughout the game, would-be Jay Kays' get to choose from 30 classic beauties, all rear wheel drive cars that little boys dream about. As you complete the different circuits on offer you get to upgrade your car to the ultimate bird-magnet. As you weave your way through the various levels, vehicles with greater horsepower become available. Turbos, compressors, tyres, exhausts and kits are available for players to buy.

Each division is set by car power - under 200 horsepower, 200-300 horsepower and over 350-horsepower. You have to complete a division to

unlock the next in order to build up your garage and unlock extra circuits.

Perhaps the most impressive feature about Roadster is the realism it offers. Dave Saunders, Lead Programming bod for the game, raves: "...the attention to detail is the best part of the title. From the realistic tyre marks and weather effects, to the 3D sounds which are triggered at certain parts of the track...like a church bell or a waterfall sound effect."

How does this game compare to other racing titles? "Graphically this title can hold its own, with vehicle reflections, animated drivers, multiple playing views and superbly detailed tracks. The sheer number of top performance vehicles also acts as an added bonus."

says Dave.

"The use of physics and mathematics have

ensured that the game handles as realistically as possible."

Another element to the game is the gambling. Gambling? I hear you cry! Yes, players will be able to wager their pennies on the outcome of the race. You can decide whether to be honourable and go for glory or throw the entire race knowing it will fill your pockets with dirty cash.

There are 10 tracks based within different areas of the world, sand, tarmac, snow and dirt cover the terrain and affect the overall performance of the car. Weather conditions also affect the environment, rain and snowstorms can ambush your vehicle at any time making handling and grip difficult.

"Be warned, thrashing the engine and burning rubber could result in an early bath for those

that the best driver doesn't always win.

Take this following example to heart. We've changed the names to protect the innocent. Here we go. Paul Roundell is shit. Mainly at games but at a few other things as well (so his girlfriend told me one night when he was in London anyway and I was round to er, fix her washing machine). He's playing Roadsters one night and losing badly. He's finishing pretty much last all the time UNTIL he places a lucky bet on another car and scoops the cash, soups up his own Mark II Escort to a Porsche

and suddenly he's got the likes of Jordan and Cat Deeley hanging off his arms. The last bit is of course a total fantasy as this is a car racing game not cosmetic surgery, but introducing gambling into Roadsters was a masterstroke. Do you spend the cash you win on upgrading your car or blow it all on 10 more lottery tickets? We all know what you'll do because greed will consume you.

The main mode of the game is the Roadsters Trophy, which takes place of a number of seasons, which are split into three different divisions. You start off at

It's just sheer lunacy to drive around like that in this weather

who choose to drive with blatant disregard for these majestic automobiles, so practise, practise, practise and learn to master the skills needed to to take home the Roadsters Trophy." advises Dave.

"The sheer enjoyment factor has to be the realistic handling coupled with the sheer exhilaration of knowing what it feels like to throw these magnificent cars (none of which I'll even own) around a track at breakneck speeds." Says Jonathan Coelho, Physics and engine Programmer of Roadsters Trophy, with a wry smile.

In The First Season you begin with only \$100,000 to spend on a car and enter your first season. Throughout the season you will have to earn cash in order to update and upgrade your car of choice and get a chance at winning the

championship. You are given the choice of eight drivers (four men and four women). Each driver comes complete with road rage type insults and jibes.

Four game styles are available. The most important style being the Roadsters Trophy; a progressive, division-based, single player game that controls the availability of cars and circuits in the other game styles.

Then there is the multiplayer game, featuring a championship for up to 2 people. Thirdly, there is the quick race, where a player can get on the circuit as quickly as possible with the minimum of fuss. Finally, Time Trials, a combined practice and beat the clock affair.

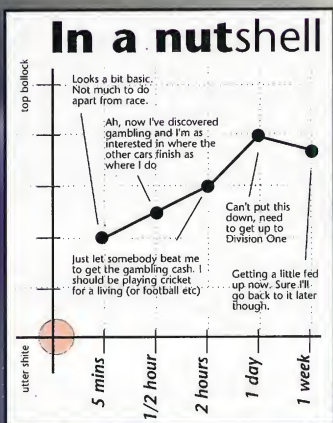

There are two goals in Roadster Trophy: one -

become champion in the first division, two - buy a car, get money to upgrade it - to keep it competitive, and money for entry fees.

So Dave Saunders, how would you sum-up Roadster Trophy in a sentence? "All the world's best sports performance convertibles, cutting edge graphics, realistic handling, extreme arcade action gameplay, loads of cash and gambling - it's a racing fan's dream come true." Fantastic.

Released November

the bottom and must work your way through the ranks until you become top dog.

Besides this there are the obligatory practice and time trial sections so you can improve your general performance. Multi-player is two-person only which is a shame when others are starting to go four player - the excellent Sled Storm being a prime example.

As you can see from the screenshots

Roadsters is colourful and features a lot of scenery detail. The tracks, we are told, are based on real places rather than actually being in existence but this doesn't really matter as there are plenty of shortcuts and fiddly bits to negotiate.

Roadsters is a very good game that gets a score this high because of its instant playability. The gambling idea

helps to make it addictive and the three-division system gets you determined to beat it. There's nothing more frustrating than finishing third when you really needed second for promotion.

It's certainly not for the kind of gamers who like to tweak their suspensions and

(excuse the rather lame car gag) fiddle with their big ends but I don't like that kind of game. I can't be doing with that kind of game and I won't even play that kind of game. I wanna hold down X and get pissed. Thank you Roadsters for allowing me to do that.

With CDfender.

True, CDfender may not offer much by way of nuclear-tipped arsenals or grenade options. But this neat little disc of polycarbonate film is the closest you'll get to an impregnable shield for CDs.

Jammy toast can wipe out a Panzer division. The Brazilian World Cup Squad can be defeated by a mug of cold coffee.

It happens. It's expensive. And it really ruins your Wednesday.

So how do you protect thumb-blistering favourites from doom and destruction?

You just peel off the backing, slip it on your CD and CDfender wards off the demons of damage and data loss.

The laser reads through it play after play as if it wasn't there.

And should you ever tear your ravaged eyes away from the screen, CDfender works as well on music CDs and even CD-ROMs.

With CDfender, it's your opponent who's toast, not the CD.

dick, it's obviously Grand Theft Auto. No surprise then that we're due a sequel. Take 2 are once again the publishers behind it and they've got a really good stream of software in the pipeline.

They've teamed up with Rockstar games in New York city to produce this sequel (as they did with the recent GTA London data disk for the original) and while they've been sorting that out

they've also been collaborating with London drum & bass supremos Movin' Shadow records. MD of Movin'

Shadow, Rob Playford, has been in the scene since the rave days and has agreed to do the soundtrack. They'll also be an album out and the latest Movin' Shadow compilation 99:1 has a video of the game on the interactive section of the CD.

As for the game, Grand Theft Auto 2 will feature real cities and a generally more modern feel. Rockstar

But will it ever arrive?

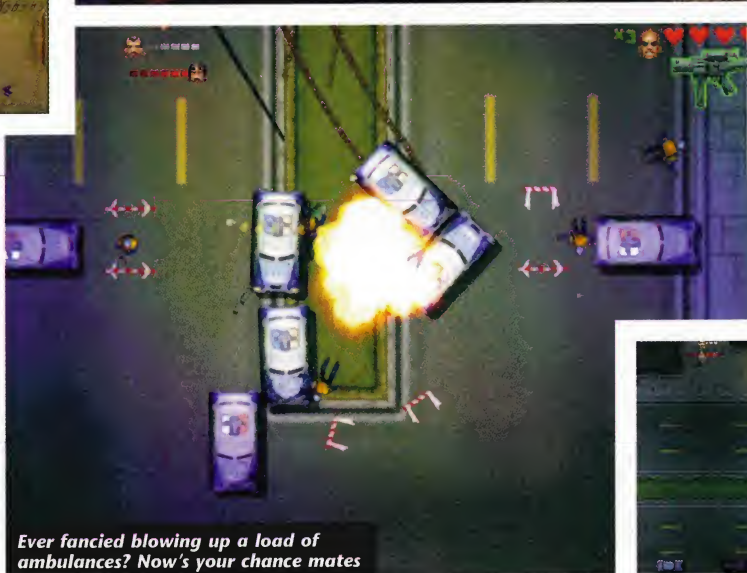

More vehicles, more badasses, bigger and better explosions. Oh yeah...

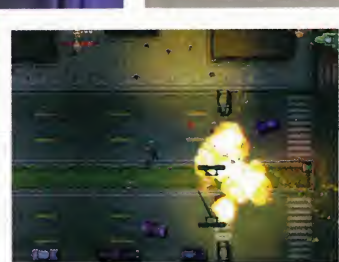

MD, Tom Houser, told us that he didn't really foresee this sequel being any more controversial than the last one, but they weren't shying away from the subject matter to please people either.

Grand Theft Auto 2 will retain its top down feel to driving, but with more polished graphics and even more crime to commit it's a matter of time before the papers and MPs get all het up about it. Watch this space and hopefully we'll have a big in-depth look at it next issue.

Turismo 2

Mirror, Signal, Manoeuvre

How gorgeous does this look? Don't answer that readers. We know!

Say 'Hello' to Gran Turismo 2 the latest ground-breaking driving simulator from Sony. This baby brings the realism of Gran Turismo to the Rally circuit. Circuits include the renown Laguna Secca for some extra special shit-kicking, mind bending antics at neck-breaking, puke-inducing speeds.

Each car can be individually tailored (from the physics to the handling properties) to create the ultimate driving machine. Over 500 vehicles, including road, rally and race models, are available from the celebrated chic of the Aston Martin to the glamour of the Lotus. The sound track to GT2 is a down right funky musical escapade of some of the top artists with exclusive remixes and specially-recorded tracks.

The great thing is that enthusiasts of the original Gran Turismo can continue playing GT2 without having to start all over - all GT1 licenses saved to memory card will give immediate access to equivalent licenses in GT2. Both, humiliating losses and glorious victories can be saved to your memory card for detailed reference. GT2 is fully compatible with the Analog Controller (dual shock) so each bump 'n' grind can be felt and you can experience even greater sensation and realism.

Grand Turismo 2 offers 20 new courses and approximately 60 license tests to determine eligibility.

Hold on baby, this is going to be one long ride.

Theme Park World

It's taking over the world!

Cleaning up sick, sacking lazy staff and blowing up small children with badly designed rides. Theme Park built a heady success on these few essential ingredients.

Now Electronic Arts are back for more and present their third wondrous theme park title: 'Theme Park World'.

The idea is basically the same as the others; build a theme park, keep the visitors happy, hire staff, configure rides, make your park bigger sell it, move on, build another park, etc.

The difference with this park is that there are four distinct worlds to choose from: Outer Space, Wild Jungle, Surreal Fantasy and Halloween.

The Halloween park includes rides such as Jaw of Death: a vertical drop ride (lots of squashed children), Pumpkin Bumper Cars (more squashed children), and CryptCarts: skull-shaped go karts.

This third title is far more entertaining for the player, than the first two, with many uncontrolled surprises.

The entertainers are fantastic, once they

begin to perform a crowd will grow (tip - put your entertainers close to new rides in your park to attract attention). If they perform badly the crowd will jeer and throw rotten fruit and abuse at them!

Bullies in the park will, once again, not be tolerated and will be punished by being put in brown sacks and left at the entrance of the park.

There are 100 different rides and attractions for you to create and you can test out your rides alongside the visitors.

The music is very likely to drive

you mad, as it begins with a dull thudding and then into a full jungle theme as your park grows.

Remember that it's not all fun and games - owning your own theme park - you've still gotta clean up someone's chunder.

Released **November**

Now you can fiddle with your on Alton Towers or Blackpool Pleasure Beach. Cool eh?

The biggest videogame launch in history...we're there of course...

If spending a week in Tokyo waiting for the ground to open up under your feet in their overdue Big One wasn't bad enough, Chicken has returned with tails of American Marines dancing atop barrels in bars to the bloody Venga bus. Wankers. Obviously though the big draw at Tokyo Game Show Autumn 99 was the

PlayStation 2. Yes folks, it's here and PlayStation Pro was among the first people in the world to play on one.

A fine array of games were on display (for more details see our special supplement this month) and we personally cannot wait for the March 4th Japanese launch date. The most humorous aspect of the whole launch was Sony's new PlayStation 2 development kit for programmers has the

Good old Japan, all Manga schoolie's knickers and no trousers in Street Fighter Ex3

word "Tool" proudly emblazoned across it. Maybe it's just us.

Besides the Sony stand the rest of the show paled into insignificance. Dreamcast was well represented and attracting attention but, especially in Japan, Sega's new machine is old news and it was Sony's area that claimed the lion's share of the visitors.

Plenty of software companies were concentrating on selling their wares

rather than promoting new games. If it were possible to suffer Pikachu overdose then you'd be extremely vulnerable to catching it here. All in all then we've seen the future of video games. Now turn to our supplement to let us tell you all you need to know about the launch of PlayStation 2.

Music 2000

UPDATE

After a long wait, the sequel to the successful 'bangin' music creation package is nearly here. After spending untold time searching through the incredible amount of options in the preview code of Music 2000, it's safe to say that this follow-up is going to be more than just an update.

One of the major new features we can expect in this offering will be the CD sampling option. By simply placing your fave music CD in your PlayStation, you will be able to store samples from it and paste them into your masterpiece. If you don't fancy mixin' up like the Fatboy however, there will be a massive database of whistles and bleeps to choose from. As in the original Music, an option to create your own riffs will be included together with some already created for ease of use.

Sadly Codemasters have abandoned plans to sell an optional plug in unit

(which would allow MIDI buffs to link-up electronic instruments and

microphones) due to the ridiculous costs involved. This is no huge loss though, as other features such as Music Jam (in which four players will be allowed to participate in a group jamming session) and an updated video mode, with a mass of new special effects, are sure to keep both amateur and professional armchair musicians happy for hours. Expect a comprehensive review in the next issue of Pro.

Wall Street Journal has reported that Square CEO Tomoyuki Takechi predicts a \$40 million dollar budget for a PS2 Final Fantasy. This comes as the first bit of actual confirmation that Square will indeed be developing for the PS2. While no information on this project is available yet, there is speculation that it will be revealed at the Tokyo Game Show.

HERE, THERE AND EVERYWHERE

The profile of the UK games market will be raised to new heights this autumn, with all three major hardware manufacturers committing their biggest ever marketing spends to the final quarter.

Sony has pledged to splash between £6 million and £10 million on its autumn marketing schedule, whilst Nintendo will spend a total of £6 million and Sega a similar amount as part of its £60 million pan-European spend.

LATEST BUILD

Brick it!

Oi! Sad twat! You bought all their Star Wars: Episode One crap - now get Lego Racer.

Hide it well, cos she'll throw it all out. Women don't understand it, all that nobbly bricked, plastic stucked, corporate advertising on every nodule stuff they call Lego. In fact, go check that shoebox now! Told ya. A summer boot sale, 50p for five grand's worth of kit. Bitch!

Revenge then. What would she hate more than your PlayStation? That's right - friggin' Lego on the PlayStation. Brick by brick car creation, loads of kiddy-sized tracks to race around and the ability to build and save racers to your four-year-old-at-heart's-content. It's daft - it's Danish -

it's for the kids...inside every sad bastard.

Imagine Speed Freaks but with bricks. That's what every reviewer will say. And they'll definitely make some crack about it being for the little ones and a bit blocky (oh, behave!), but ignore all that crap and stay with Pro. Released November

Sweaty bods and hairy backs - these are just two of our favourite things. Midway are the guys to give it to us with the pending release of this arcade style boxing game.

Ready 2 Rumble will offer 20 different tough-nut fighters, with attitude, to choose from. It will be no holds barred when it comes to this lowdown, cheating, scum-sucking, fight of your life.

You'll think you're invincible if you play 'Big Willy Johnson', that is, until you're pitted against 'Boris The Bear Knokimov' - who doesn't give a damn about your pretty boy looks. To add insult to injury - when you've been knocked around the ring a few times your opponent will earn his Rumble Rights and get unlimited stamina.

Perhaps you're hoping that 'Tank

Thrasher' can help you, carry on hoping. If you wanna get good, wanna to stand out from the bulging-biceps crowd, you're going to have to work for it, and I mean train...hard. You're gonna go through the training mill on this one: aerobics, sway bag, heavy bag training. If

you are going to be able to stand up to the challenge of your rivals - you'll have to take the jibes...the digs...the pain...if you want to claim what is rightfully yours.

No pain = no gain.

WORLD CUPS AND ALIEN INVASIONS STEP BACK, WE'RE ABOUT TO BE INUNDATED WITH REAL WORLD SNEAKY COMBAT - WITH LOTS OF GUNS

Something must have happened to the collective consciousness of PlayStation developers. Maybe they've been reading too many Andy McNab paperbacks or they've just bought their son their first Action Man. Who knows why we're getting a sudden influx of hard-corp military action heading our way. As long as this invasion keeps the fashion for sequels fully suppressed on the beach heads who cares - open the slaughter gates!

MEDAL OF HONOUR

Saving Private Ryan was a pretty grim film. Okay,, there were the typical Spielberg mushy bits, but come on you heartless bastards, when all those soldiers are getting ripped to shreds on Omaha beach it was one big downer. Arms flew off, grown men

screamed for their mothers and Tom Hanks didn't catch a bullet for another two or so hours - how much degradation can a viewer take?

Electronic Arts have taken direct inspiration from the bearded man-boy director's Oscar winning movie. They've witnessed man at his worst. They've seen what a heavy machine-gun can do to a ship full of soldiers. They've seen a bayonet get slowly pushed into a screaming man's heart. And they've come up with the first PlayStation WW2 Shooter! Yeah, war is hell, but that's only if you're going to really die. Put it on a CD and it's gun-ho bravado and no-mercy kill or be killed action. Don't even worry about realism. Captain Dale Dye of the United States Marine Corps (retired) gave the benefit of his grizzly

experience to make sure that the bullets fly in the right direction and when they hit home, the target gives off a correctly pitched scream.

He's already given advise for Saving Private Ryan, Platoon, Born On The Fourth of July and Mission: Impossible. This man knows his war, so expect Medal Of Honour to be the closest you'll get without screwing up your eyes with the thousand yard stare.

Starting on June 5th 1944, the night before D-day, Medal of Honour puts you in the well-worn battle fatigues of an Office Of Strategic Services operative. It's your job to go behind enemy lines and make sure that Fritz has plenty to think

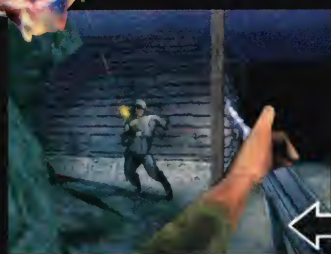

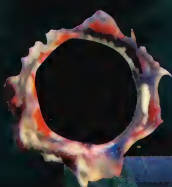

about when the main attacking force is getting mopped up on the beaches.

Medal Of Honour isn't just about running about with your Thompson sub-machine gun blazing Germans to death. You get to be a right sneaky bugger. Don a German uniform and use ID papers to get passed guards, then shoot them in the back of the head with a silenced pistol.

Lob a grenade at a heavily guarded position and watch as the enemy see your ruse, pick up the explosive and hurl it back at you. Wait for complaints from the RSPCA as Alsations catch grenades in their slobbering jowls and then explode. Now that never happened on The Littlest Hobo.

The enemies intelligence boards

on the smart arse. Hide behind a wall and you will think you've got plenty of time to stand up and take a pot shot. Think again G.I., you're going to get your position stormed within seconds – so think fast.

Medal Of Honour turned up at the office and immediately drew a crowd from all members of the team that lasted for days. Art designers, writers and bums off the street grinned their faces apart while negotiating the backstreets of an occupied French Town. "Cool, you can use the machinegun nests!" and "You sneaky German Bastard" echoed round our hallowed turf like a psychotic mantra. Now that's the sign of a good game.

Electronic Arts claim that the code we were creaming over isn't even finished yet. What more can we say? – be prepared and we'll see you on the beaches ya bitches!

SPEC OPS

They've been in operation since early American settlers needed someone to stop those moaning natives from protecting their hunting grounds and they're still in use to day. Yep, US Army Rangers have one long history. They helped kick us out of the our colony during the revolutionary war and the Confederates had their share during the Civil War. Whenever the US has had to give someone a good hard

Everyone in position? Weapons cocked and sights checked? Get ready everyone – let's keep this one clean and mean. Three, two, one – ALPHA TEAM GO!

Guys? Hello guys? I said Alpha GO! Go

When your crosshair goes green it's a dead shot. Nah, shoot the hostage!

ALPHA! Come on.. I'm not doing this on my own: we being a synchronised combat unit an all! Sod ya then, I'm going in on my own.

Combat shock

A green smudge of combat trouser pokes around a corner. Right mate, you're having a flashbang breakfast. The phosphorous explosion blinds the Tango. A dash around and the muzzle of a silenced MP5 is in his face. I said in his face! Damn it, this aiming is tricky. Bugger, he's wiped the blur from his eyes and he's coming at me. Shit, he's fired. Er? I'm Alive! Alive I tell you - Ha ha ha ha! Right you politically naive son of a

It's almost the same as the PC version, but without being good. Clever that!

bastard - you're 'aving it! Rounds pound the Tango's chest into a bloody salad of bone and sinew. With minimum attempts to die in a well-animated way, he snaps to the floor and disappears. Men, I've got one! Tango down, threat neutralised and all that. Be warned – we seem to be up against paranormal terrorist activity.

You've got a dual shock controllers. Good, you're going to need it to play this finger twister. Converting Rainbow Six from the keyboard friendly PC to a PlayStation controller has taken its toll. Both thumbs are used on the analogue joysticks. Index finger on a shoulder button to fire. Every other finger ready in case you want to: a) Duck b) Jump c) Change weapon d) Change magazine e) Turn on you night vision and lastly f) The sniper mode. Get confused in a heated gunfire exchange and you'll

slap, they've been there. Korea, Vietnam (doh!) The 1974 Iranian Crisis (again - doh!), Grenada, Panama (operation Just Cause, apparently) Iraq (operation Desert Storm, obviously), and they managed to lose six men while killing approximately 300 in Somalia while stopping local tribesmen from gnawing on their favourite herb.

The Rangers have been at the forefront of the battle since the era of the flintlock and have survived to live in an age of night vision devices and the M-16A2 assault rifle. Well now they've gone one step further. Not content to protecting American

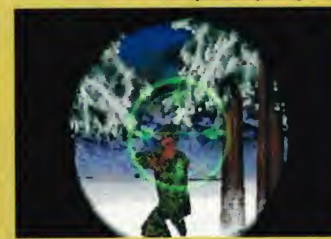

(financial?) interests around the world, they're force marching onto the PSX.

Spec Ops puts you in charge of a formation of these war-painted hard-men as they sneak behind enemy lines and give the enemy plenty of semtex-surprises. The game is a translation of the hit PC game, so expect more death dealing weaponry than Gerry Adams' backyard bunker.

You'll swap between these hi-tech hombies as you mix it up across the globe. This is no game for the charge in and kill brigade. If you want to live you're going to have to learn so much about concealment that you could be Gaz's mum's beauty consultant.

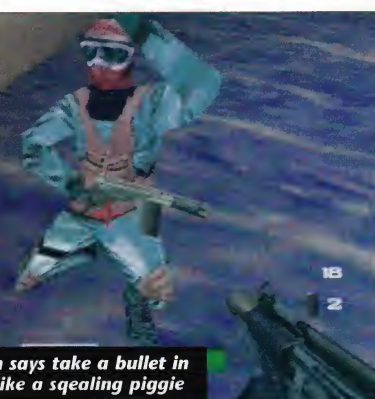

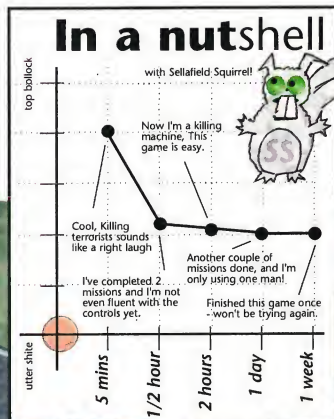

Wearing a white body suit is a good idea, while wearing a black "shoot me" balacava is really, really stupid!

Fidel Castro makes a guest appearance as second corpse on the left. Nice

be swapping to the wrong mode, giving the enemy a few valuable seconds to take you out. Not that that really matters as these guys were never shown how to aim a gun. They think they're about to put you down but pepper the scenery instead as you swing your own weapon wildly about before... Blam. Where's the next idiot waiting for heaven?

Great! Now Simon says take a bullet in the nuts and die like a squealing piggie

Sometimes you have to play with bog rolls just to make this game fun

GISSA JOB

Hey there Chicken - can i have a job at your great mag once I leave college
 Cheers

Harry Lovell, Montague

You're asking the wrong person but I'd imagine a CV and letter of application will get you further than a one line email matey!

try a demo, so ha hahahahaha. One more question, The graphics on Gran Turismo are amazing, no doubt number two will be even better. But why, when you drive into trees at 150mph, does the car bounce away and the tree is unharmed?

Drew Osborn, Kent

I'd have thought it was pretty obvious that PlayStation 2 games won't work on a PlayStation but

Another month, another letters page. We've had some crazy questions and some irrational rantings in this month, the best of which are here for your perusal. Note the new address for your letters for next month. Pro is moving down to sunny Bournemouth but personally, I'm off to pastures new, so it's been a top two years but now I have to leave you to the devices of my successor. Have top lives everybody. STUPID QUESTION

I have a question about the PlayStation 2 or 2000 or whatever can you play the PlayStation 2 games on the PlayStation?. I own an American import of Final Fantasy VIII. It is the best game I have ever played, the graphics almost had me dribbling. It's kind of easy though. It took me nine hours to get onto the second disc, I have played for 21 hours and i am almost starting the third disc. It took me six hours to get out of Midgar on number seven.at this rate I'll have completed it and lent it to my mate before most of the readers even get to

they will the other way around. I don't know if that's actually what you meant or not.

Final Fantasy VIII is excellent and I don't think it's such a bad thing that it's a little shorter. As for GT apparently they couldn't get permission from the car makers to smash their models up. Sad eh?

2 BE OR NOT 2 BE

I'm gonna keep my letter brief because those long letters that people write bore the hell out of me! One simple question - When the PlayStation 2 comes out, is

House, St Peter's Rd, Bournemouth, BH1 2JS

your magazine going to profile the original PlayStation, or PlayStation 2?

Dean, Utoxeter

2 LITTLE QUESTIONS

I have 2 questions -

- 1) Will there be a Music 2?
- 2) Has PlayStation Pro got a website?

James, Essex (13)

Well Dean, it's a safe bet we'll cover both machines at least until the original PlayStation begins to fade away but that'll take a good couple of years yet, so don't worry, Pro will continue to cover all the bases for you

Two simple answers. Yes it'll be out before Christmas and we're playing with a preview copy at the moment. And the second answer is not yet but one is in development.

ers

I'M NO PRUDE BUT...

I have just purchased issue 39 of your magazine and I would like to say that I am appalled at what I read in your tips section under the heading of 'Perverts Paradise'.

Don't get me wrong, I am all for freedom of speech, etc, nor am I a prude of any kind but if I wanted to read such disgusting filth, I would buy a magazine from the top shelf not what I expected to be a quality games magazine. There is a time and a place and I think that a magazine that is well within the reach of children in terms of positioning in shops and also in terms of being able to afford it from their pocket money, is definitely not the place for a scantily clad woman to talk and encourage perversions to the general public. For goodness sake this magazine is on sale in supermarkets!

I have been a PlayStation gamer for nearly 3 years now and find it difficult to understand why your magazine appears to be the only one on the market that

needs to include such rubbish to increase its circulation. Does the Editor think that without soft porn the magazines circulation would be too low? Or perhaps he feels that the quality of the rest of the magazine necessitates porn to appeal to the sad people that crave such filth and to make the sales quota? I am a family man and I would be disgusted if my son picked up your magazine and read the above column. Needless to say, I won't be buying your magazine again, but will spend my money on rival publications.

I would have thought that there are some publication guidelines against your sort of magazine being in the reach of minors, or at least you should be forced to carry a parental guidance notice on the front cover. I would look forward to receiving a reply from the Editor but I guess all you'll do is print an edited version of this e-mail and poke fun at it and me in a childish, immature manner. I suppose its only to be expected of such a magazine. Oh well, your loss not mine as I'll stay well clear of your magazine in future.

How does the Editor sleep at night knowing that young children can

read such disgusting articles?

Craig Massey,

A 28 year old, broad minded parent, via email.

Craig, you probably won't be reading this because I'm not sure the magazine is freely available at newsagents on the Moral High Ground upon which you habit but I'll have a go anyway. Firstly, I don't answer letters in a childish and immature manner when they have a serious point to make.

Opinion is a wonderful thing. The Oxford English Dictionary tells us that opinion is "unproven belief" and not for the first time it's dead right.

I'd be the first to admit that the Pervert's Paradise has been somewhat near the knuckle in the past, maybe occasionally it's gone a little too far, but none of it is what I'd class as soft porn. All of the letters are real and show a representation of what we face in our mailbag on a daily basis and the section has a cult following.

Yes younger children can read the magazine but we are targeted at the older gamer of

student age. When magazines such as FourFourTwo swear like billy-o I wonder if they get letters from such broadminded parents because they are at the end of the day, a mag about footy and kids watch football.

Teenage girl magazine More! are quite happy to provide detailed diagrams of how to have better sex on a fortnightly basis. This is being lapped up (were you expecting a vulgar pun) by 13-year-old kids, but they rightly tell people they're aimed at 17 plus because they are, and they rely on parental guidance being applied.

The thing is Craig, we can't stop youngsters buying our magazines. That is the job of responsible parents of which you are obviously one. But can you be sure that you son only reads Enid Blyton anyway?

And just a quick point about us reaching our sales quota. Pro's circulation has risen nearly 20% since the redesign. Now you can put that down to "people craving such filth" if you like, but I think we both know that that isn't true.

The Pro Solid Gold Award is given rarely, and only to outstanding games. Each member of the Pro team plays every PlayStation game, and only when we all agree is the coveted Gold awarded. If half a dozen experts all think the same, it's a game you can buy with confidence.

In a Nutshell does exactly what it says. It's here where you can quickly find out what to expect from a game in the first week you buy it, and it's created only after the reviewer has played the game for at least that length of time. And it seemed like a good excuse to slip in this shit picture of the fabulous Pro mascot: Sellafield Squirrel - he's hideously deformed!

In **The Verdict** games are awarded a percentage, and it doesn't take a genius to work out that high is good and low is bad.

If something gets 90 then rest assured **Pro** could find very little wrong with it. Similarly, a mark of 20 suggests a real brown trout. Every member of the **Pro** team is a PlayStation expert and you'll find everything you need to know to make a buying decision within the review. If it needs saying we say it, and if it doesn't, we don't.

Pro always make an **alternative** recommendation of the same kind of game. The alternative might be better than the game reviewed or it might be used to highlight the similarities between the two. The **star rating** ★ pertains to the Dealer section at the back of **Pro**, and the £ sign indicates what kind of price you can hope to pick up the old game second-hand. This is explained in Dealer too, and it's brilliantly simple, though we do say so ourselves.

"Face like a baboon's arse"

Being the high flying journalists they are, the **Pro** team have enough money to go on holiday willy-nilly whenever the feeling takes them. So there's gonna be a few bad ones. Yes

paulchikienmchally

My best holiday story: We went to Australia and liked it

gazadams

As a cheeky youngster, Gaz took a holiday in France, at an anonymous campsite. Whilst giving birth to a brown baby in the rickety toilet shack, Gaz realised he was locked in. Panicking and shouting at the top of his lungs, none could hear his cries aside from a confused fat, French lady outside who eventually went to fetch help. Alas, this is when the door gave way and Gaz sidestepped away from the crime scene

willjohnston

While on holiday in Hungerford in the mid Eighties, Will came across a kindly gentleman dressed in green. The poor chap (Michael) was looking for some people, just anyone. Being a generous fellow, Will gave the man directions to an area just packed with happy pedestrians. Then, wouldn't you know it, the hearty rat-a-tat-tat of an AK-47 broke the sky and many people were killed. Then the police shot him

samthomas

Boating around the more rocky areas of the Atlantic coastline, adventurous Sam fell upon a sandy beach. Unfortunately his makeshift catamaran was upturned by a 30 foot tidal wave and stranded on an island run by vicious cannibals, for eight years. After befriending the tribe ("bit chewy to begin with, but really does taste like chicken"), Sam discovered a new life, new friends and a new vegetable, before heading home to make his fortune

wendy
morgan

During a teenage holiday break in Morocco, Wendy found herself accosted by two big men; both called Ali. Without thought for her safety she single handedly followed the 'tashed men to a local photographic studio where she proceeded to audition for a TV Gameshow. Relying on her knicker catapult trick to gain the gig. The men called Ali had, infact, seen the trick in so many seedy clubs that she failed to gain their sex starved attention. Now she's here!

lewisspek

Lewis recalls his story of hell abroad:

"I was once invited on a free two-day holiday on the South coast, all expenses paid. It was all very nice, but there was one sinister catch which wasn't previously explained. When I got back to England, my house was repossessed, I lost my girlfriend in a game of poker and I was eventually kicked out of my job, leaving myself a wandering bum. If you're looking for a moral, forget it"

natalie

Posh restaurant in France, 1996. Our Natalie decided to be a little adventurous and order something she'd never had before. She was sat perusing the menu (written in French of course) when her eye caught one item in particular, Sweetbreads. After ordering and fully enjoying this unusual dish Natalie was told by her friend, who was rolling around the floor with laughter, that the tasty dish, was indeed sheep's knackers. Mmmm, Bisto.

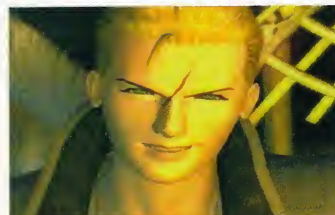

paulroundell

Paul's fondest memories are of dancing naked through a small welsh village last August. Unfortunately, they soon faded when last week he was involved in a high speed car accident and the police informed him of the outstanding warrant. A scuffle developed as Paul tried to escape. He now lives on the run, wandering the Rawtenstall moors living on small vole's and dead pigeon's.

Final Fantasy

Life sucking fantasy frolic
that's all grown up

The adventure switches between
Laguna's story (below) and Squall's

W

During missions you can only save your game at these spinning save points

Squall leaps into action and the seamless FMV takes over control

Have you left a 150 hour window in your life for Final Fantasy VIII? Can you spare/throw away over six complete days? Course you can, you're a sad RPG anorak with nothing better to do with your time. No girlfriend, no job, no social life... but the thing is, there are over a million other UK PlayStation owners gagging to get their paws on this game, and they can't all be geeks... can they?

Final Fantasy VII redefined the RPG genre, it pulled the black hood off the dungeons and dragons weirdoes and

believable living breathing 'other' world in which you control the destinies of a bunch of teenage, angst riddled, incredibly powerful mercenaries. They bitch, they moan about exams, carry huge whips and blades and wander round Manchester at 2 in the morning attacking anything that moves. Believe me, I've seen 'em.

Don't expect a straightforward sequel either. Cloud, Tifa and Barret are no where to be seen. Now you've got a whole new bunch of characters to manipulate. Squall, Rinoa, Zell, Selphie,

'You control the destinies of a bunch of angst riddled, incredibly powerful teenage mercenaries'

pushed their closeted multi-sided die game into the spotlight. You're still called a sad bastard for playing the game, just now you're part of a sad bastard majority, rather than the sad bastard minority.

So it's back, but it's mutated away from the Manga styling of the last game and grown up. Gone are the huge heads and tiny torsos, everything's now to scale, everything now looks real. Or should that be unreal? You see, Squaresoft have created a totally

Quistis and Irvine are the roles you'll be playing in this game. And it's their plot that you'll be sinking so much time into uncovering.

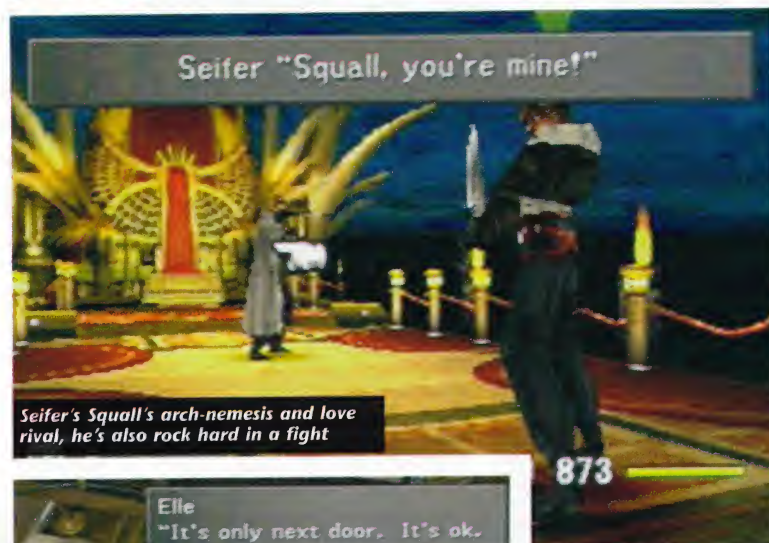

The story itself is totally linear. It follows the tale of time contorting sorceresses seeking to take over the world. It's Squall's job to stop them, fall in love and butcher and rob every woodland creature he comes across (this guy makes Lara Croft look like the World Wildlife Fund).

The plot unravels to reveal an

enormous adventure that's akin to reading the most spectacular science fiction fantasy novel ever written, and it's this that drives you to the end of the four discs. However, whilst the story is very definitely linear, the fighting element of the game has become gargantuan in its complexity with an endless set of choices and options.

Press circle and you'll be presented with one of the most daunting menu screens since you 'accidentally' downloaded the NATO command's launch codes onto your PC. There are menus, sub-menus, bi-menus and transvestite menu screens. You can: junction, item, magic, status, GF, ability, switch, card, config, tutorial and save. And that's just the first screen!

Now it may seem strange to look at

Final Fantasy as nothing more than a bunch of options and alternative menus, but really that's all it is. Okay, so you've got spectacular FMV, haunting music that's synched into every scene and changes according to the action, plus

fluid animation and unbelievable background scenery, but that's not the real game!

Success of failure at Final Fantasy VIII depends solely upon your ability to use your spells, items and GF monsters to the best effect. Each decision you make in the menu is not only vital to your battles, but is also specific and unique to you. Due to the size of the item list, the sheer volume of spells on offer and the configurations you can implement, every game of FFXIII sold around the world will be different. Oh, you'll all defeat the evil sorceress at the end, but the means that took you there will be unique to you. And that's what makes this brilliant.

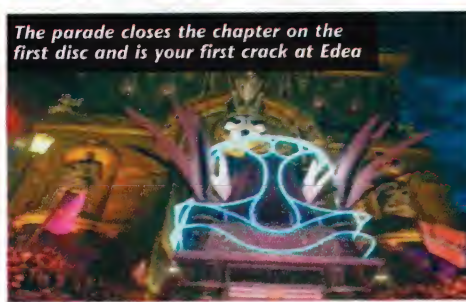

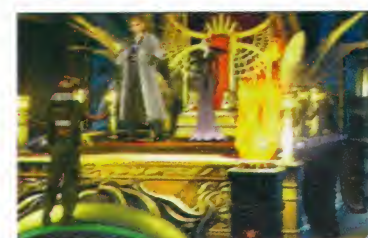

If you've played FFXVII (and if you've not then you're a nut), then you'll recognise a lot of similarities in the spell

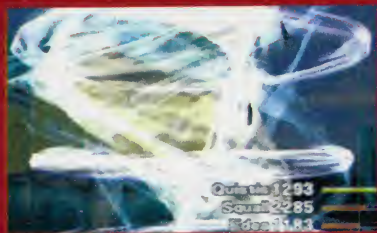

Alexander

Cresting a mountain a colossal machine emerges, opens its massive missile bay doors and launches a barrage of rockets that rain down on your enemies

The parade closes the chapter on the first disc and is your first crack at Edea

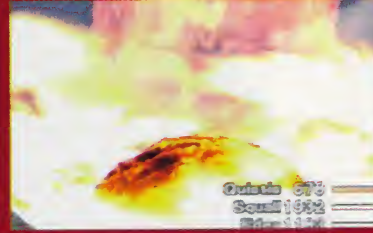

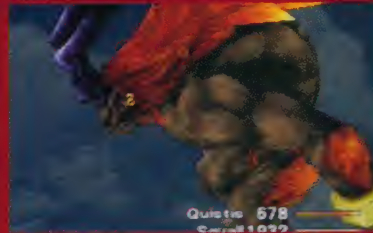

Pandemona arrives in a tornado, sucks the enemy into his pouch and spits them out

and item department. Ultima, fire, ice and thunder all return, but the spell casting system has totally changed. Now you start with a blank spell sheet and have to steal (or as the game calls it 'draw') spells from opponents as you battle against them. Draw counts as one of your characters' turns and sucks a random number of a specified spell from

second nature (honest). What is tricky, and you'll have to bend your head around this, is the GF system. GF stands for Guardian Force, a selection of powerful monsters (remember the summon monsters from FFXII?) that can be called into battle to fight for you. To use a GF you have to junction it with a character, which in simple terms means

different abilities. Without GF a character cannot use magic, items or draw spells in battle. Plus, you can teach the GF additional abilities that you can then use against your enemies, such as HP absorb and attach first commands. You gain GF by either beating them in battle or by drawing them from a powerful opponent. You can then attach/junction

them to a character and have them call upon the GF's stunning attacks in the fight sequences. Leviathan, for example, appears as a water snake (if you've seen The

Abyss you'll know what I mean), then flies up a huge cliff and turns into a tidal wave that crashes down delivering massive water damage.

As you can gather, most attacks are once again elemental. Wind, fire, earth, poison, thunder, water all feature as spells and different monsters, depending upon their special skills, are usually weak against one or more specific types of attack, and isn't your job to find them fast! Fire dragons are weak against ice and water, but use a fire or wind attack and you'll be giving them energy rather than taking it away. And that's about as straightforward as the battles get, so the rest you'll have to learn on your own.

Apart from needing a degree in environmental studies, the game also has you upgrading your weapons at junk shops, tending and caring for the GFs at pet shops and travelling the world on trains, buses and rented cars and eventually spaceships and hovering transports. You can even ride chocobos

'It's the greatest RPG that's ever been made. Breathtaking both visually and aurally, it's a landmark in videogaming'

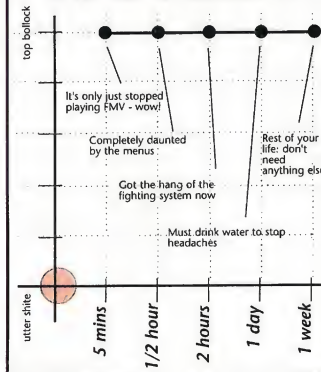

an opponent. It can then be either stored for later use, or cast immediately on your team or back against the foe.

Now that sounds bloody complicated, but after a few battles it'll become

sticking it into the head of say Squall. Squall can then summon a GF during battle to unleash a spectacular and devastating attack. But that's not all.

The GF's lend their masters many

In a nutshell

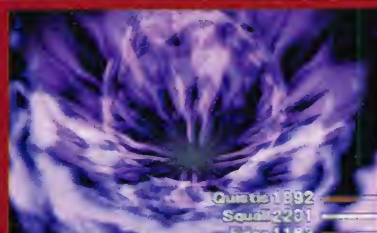

in Final Fantasy VIII, although you'll have to catch them first in one of the forests.

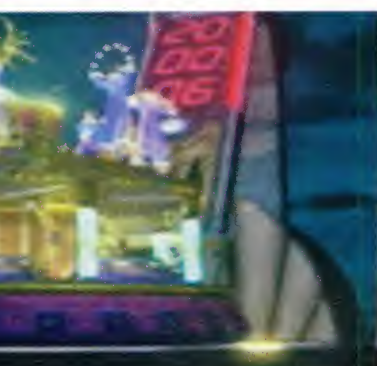

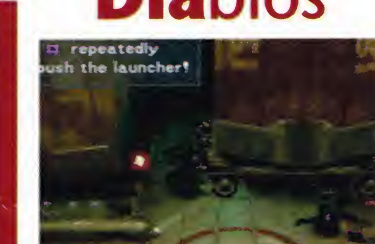

There are lots of mini-games you must complete and card players who usually fleece you of all your cards by changing the rules to a complicated game of trump cards that use creatures for the game as face cards. It's weird, it's bizarre, and at times it'll completely take your breath away with the quantity and quality of imagination that's been stuffed into four enormous game disks.

With this review I've tried to give you a flavour of the game, but no matter how many pages the magazine devotes to FFXIII, I'll never be able to describe everything, or even discover myself, after over 100 hours of gameplay, all the secrets this game has to offer. It's the greatest RPG that's ever been made. Breathtaking both visually and aurally, it is a landmark videogame and it can only get better on PlayStation 2. Sweet Jesus, bring it on!

So-so action film licence with shades of espionage

The film starred Tom Cruise and did the business at the box office, even though it wasn't a brilliant film. The N64 game did similar tricks when it came out over here. Now the PlayStation looks set to do the same thing for Mission: Impossible. Yes it's great subject material, yes it's a big film licence, and yes it's as good as the N64 version of the game. Mission: Impossible will never be the spy-fest it should be though, but that's due to the likes of Syphon Filter and Metal Gear Solid making mincemeat of the genre for future games programmers. These games reproduced the espionage experience so well that most software houses wouldn't have a chance in the same field.

Agent Orange

Mission: Impossible contains 18 very different missions, all set in five different parts of the world. You take on the role of IMF (Impossible Mission Forces) agent Ethan Hunt as he works closely with IMF leader Jim Phelps, infiltrating secret documents and generally exposing the darkest world orders. Dino Crisis

Resident Evil daytrips to Jurassic Park

Swap zombies for dinosaurs and the B-movie style shock horror continues where Res Evil left off, with the gore and puzzle orientated adventuring set to maximum! Dino Crisis goes for the throat at every opportunity, and is one of the few games that'll have your pulse racing as velociraptors smash

soldiers, Regina, Gail and Rick, forget about their old luncheon mate and head off into an eerily deserted compound. You can hear the dinner gongs ringing in the ears of every lizard in the place!

You control Regina, a feisty creature with an itchy trigger finger and a mean line in dialogue. She's no dumb follow-

their way into your hiding place. But I'm getting ahead of myself, so it's back to the beginning.

It's Jurassic Park really, with a mad scientist messing with DNA and performing amber experiments on a remote island. A bunch of special forces nutjobs parachute into the lizard pen, one becoming separated from his mates. He obviously hasn't seen Jurassic Park because the first thing he does is fire up a flashlight, signalling to a T-Rex that it's dinnertime! The three remaining

orders recruit, Regina can sense trouble, pointing her weapon in the direction of the next assault and often leaping out of the way of an unseen attacker. But not only is she smarter than the average Res Evil hero, the dinos are all super intelligent too. Closing a door between you and a zombie would mean the end of an attack in Res Evil, but not here. The velociraptors keep on coming, kicking down doors in their relentless pursuit of you. You'll panic, you'll cry with frustration and you'll definitely want

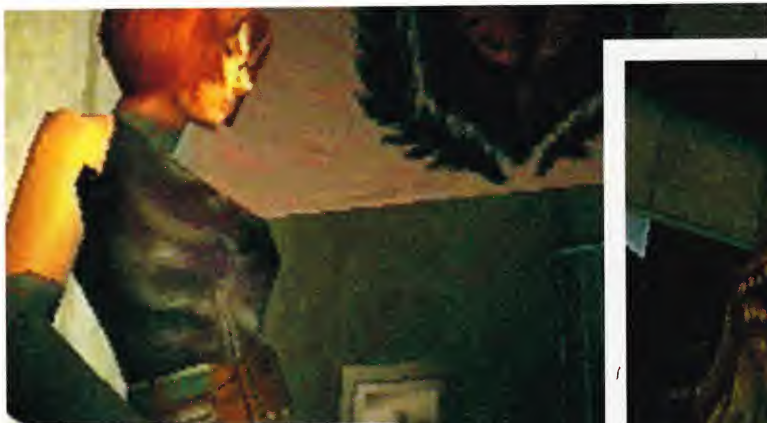

some more.

Gone this time are the static camera movements of Res Evil 1 & 2 and in their place come Metal Gear Solid follow your hero camera swirls. It's more dynamic, it delivers the shocks in a more dramatic way by showing close-ups of T-Rex heads smashing through windows whilst cunningly floating behind Regina's ass, and it's moody too.

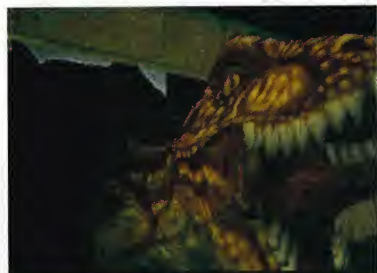

All the scenes are dark and spooky, with a 'The Shining' style soundtrack

rising and falling to the beat of the action. But because the camera now covers the action on the fly, a lot of the background detail you'd normally associate with Res Evil has been lost, so

They're always bringing dead things into the house looking for praise

there's a price (only a small one) to pay for dramatic effect. But at least the new camera system does differ from the RE formula, because without it you'd be staring in the face of a zombie clone.

The weapon aiming is the same twirl on the spot with the gun pointing straight ahead, the collect plugs and keys and passwords puzzle system is an exact copy (it even makes the same noise when you swap between menus in the inventory) and the frustrating pauses between rooms, climbing stairs, scaling

ammo is limited and the pistol you start off with is a bit like pissing on a chip pan fire, but eventually you can upgrade your weapon, find increasingly more powerful rounds, and, of course, a rocket launcher.

However, the crux of the adventure is the puzzle solving element, not the dino popping killage, which is definitely the fun bit. The puzzles start off quite straightforwardly, matching coloured cylinders, finding safe

You'll find yourself being attacked by velociraptors, either leaping onto your chest and raking you with their feet, or grabbing the nearest limb and shaking you like a rag doll. Your

combinations in memos left handily around offices, but they don't remain that simple. About an hour into the adventure and things definitely take a turn towards the high IQ levels. For example, if a code is

The game's full of these brain-benders, high powered weaponry and blood thirsty critters that love to follow your messy B Positive trail about the compound. When you get injured blood leaks from you like a tap, you'll start to drag your injured leg along the ground and torn arms hang limp by your side, until that is, you mend yourself with medipaks and first aid kits that are

strewn about the building, at least in easy mode they are. In normal mode the dinos are harder to kill but everything else remains much the same, expect for the different endings (this being from the makers of Res Evil after all), giving you extra costumes and better weaponry next time around.

So if you can't wait for Res Evil: Nemesis, or just want a tense, dinosaur killing, puzzle orientated adventure with atmosphere oozing from its forbidding new Metal Gear style camera work, then Dino Crisis is going to titillate you non-stop for about a month. And then it Tomb Raider 4 and after that Nemesis. It's going to be a great millennium.

Retro sci-fi action/strategy that arms up to kick E.T's green, bony butt!

This full-on arcade/strategy assault takes its inspiration from the 1973 hit musical, which was in turn a re-working of the classic H.G novel. As the dust of the first surprise attack settles you start to get your act together and are able to set engineers to

This epic war of attrition boils down to a simple set-up; they have fancy weapons and large numbers while you have the Dunkirk spirit and plenty of what-ho bravado. So it's a case of using your limited supplies in conjunction with your human brain while they just seem intent on taking out key strategic sights

whatever the cost while looking metallic and deadly-cool. They blow up a church; you take the wreckage to a factory and design superior weaponry. You move your anti-aircraft guns to guard the Thames; they get blown out of the sky and get to drown on a thousands years of murky effluent. Result! Stopping a major city being over-run by genocidal xenomorphs while performing multiple roles and attempting to gain the upper hand is what the whole War of the Worlds experience boils down to. UEFA Striker

Slick soccer bonanza with graphical greatness that oozes entertainment

Mess about with your formation, strategy and starting line-up here

The barren footy free months have ended in style as Infogrames finally bless us with the finished version of UEFA Striker, and what joy we've had putting this through its paces. It's a new soccer star just waiting to be knighted, even Pro's very own queen, Chicken, has already sent his sword for a polish.

The French, though World Cup winners, aren't really too renowned for footballing greatness. Cycling and motor racing is more their broth of froth, but recent footballing exploits have redressed the

balance somewhat, and if Infogrames' UEFA Striker is a direct product of that you should be hoping (what am I saying?) for more on-pitch success for our cross channel cousins, as this is continental class in a

"Without doubt the most entertaining fusion of pace, power and playability this year"

highly polished glass. Bizarrely, there's not really anything that unique on offer, (football is basically, er... football) but

what's got me creaming so much is the fact that everything, from the cool intro, the nice front end to team selection,

gameplay and the stats screen at the end of a game is nigh on faultless.

After the chart topping monopoly of countless FIFA updates and some commendable attempts from the Eidos stable in the shape of Michael Owen's endorsed game and the Champ's League effort it's so thoroughly pleasing

to have another option. And when that option guarantees you more goal line action than Robbie Fowler's nose, it's all the more satisfying.

Purists are going to grumble at the amount of club teams available, as the selection is really just a cross section of Europe's major teams - so clubs like Inter, Juventus, Barcelona, Man United, Bayern Munich and Arsenal are in there, but sadly there's no room for the like of Newcastle United. But the fact is that there are more than enough alternatives to please all but the most loyal supporters who refuse to take part

obvious that your post pub Saturday night game time is going to be a whole lot richer. If there was such a thing as a PlayStation Premier League lottery, Striker's the equivalent of the gameplay jackpot. Match of the Day

"Carves defences apart easier than a psychotic machete wielding Zinedine Zidane"

unless they can play with the team they support Monday to Sunday. You can alter the team and player names of all of the 45 recognisable Euro contenders gracing the selection screen to solve that, though the kit designs remain as they are. However eight totally customisable challengers are on offer too, and there are 73 international sides in there, just to keep everyone happy.

Power Play

So, you've picked and panned about with your team, then what? You get into the heart of the action, and soon realise that this hot young pretender is destined to be a World star. Jonathan Pearce and Ron Atkinson do a fine job of 'big-upping' the on field action, and as soon as the players emerge from the tunnel onto the pitch it's instantaneously

will be consigned to the subs bench, and even the mighty Des Lynam couldn't have stopped that!

Graphical detail is fantastic, with good likenesses of players, camera flashes and flag waving in the crowd and imposing stadia, giving an amazing sense of realism. Greater realised when you sit back and watch someone else playing, as you can take more notice of the camera swooping out to display the stadium roof and rafters; cracks of light and fancy cantilever designs enabling you to see outside, far into the city backdrops. But all that counts for nothing if it plays like a post-puke hungover Sunday eleven. No worries!

UEFA Striker is a sure fire finger bleeder sent from football heaven and is without doubt the most entertaining fusion of pace, power and playability

"That's one of the best saves I've ever seen, and I should know, I've seen a few"
Ron Atkinson - UEFA Striker

After all is said and done, what we are looking at is a game of two halves

England go one up! That's not Massimo Taibi in goal by any chance?

Practice makes Perfect

To get complete access to all of UEFA Striker's game modes you'll need to attain UEFA Coach level in the training mode. Score eight or more on all of the following disciplines and that's exactly what you'll do. Great idea, well executed, and another reason why Striker should be at the top of your 'must buy' list

It can be a bit hit and hope, but that's because it generally carves defences apart easier than a psychotic machete wielding Zinedine Zidane.

The Real Deal

Tackling is done via the traditional options of a slide or poke, and rather than wildly swinging a lethargic foot into thin air if the ball is an inch too far away your players will impressively stretch in an attempt to get even the slightest contact. Believe me, that is a fine gameplay touch, I owe many a clean sheet to the determination of full stretched defenders! Advanced skills are in there also, and you can call your keeper from his line to meet crosses and challenge headstrong strikers, and if spectacular goals are your thing (as if they aint!) then Striker is without question the game for you. Every pass, chip, lob or shot is actioned when you

anything over three seconds any opposition keeper attempting to stop the shot will need asbestos gloves to stop his hands catching fire!

Great shot! He's tipped it over - corner. What do you do? Topping off the already fantastic gameplay goodies is perhaps the coolest concept in a football title for a long time. UEFA Striker is played in real time, and in this situation, or any dead-ball one for that matter, you can use this real time gameplay to your advantage. Take a quick kick, and you may be able to get your cross in before any defenders have had time to get back and cover, or alternatively you can wait ten seconds until your own man mountain defenders manage to get into the box looking for that special winning header

ago, and these games seem to have peaked in recent times. Great strides forward are almost certainly a thing of the past, and UEFA Striker is no exception to that. However it can claim to be a contender in every comparable department with any comparable alternative, and I know who I'd be backing to come out on top too. The smart money's on UEFA Striker scoring every time.

Tony Hawk's Pro Skater

Absorbing, rad skateboarding feast with professional connections

By combining tricks you can bump up those points, and try for special moves

You can take to the school grounds and raid their swimming pools for serious phatness

"This is the best day of my life, I swear to God. This is it. This is what it all comes down to. I feel like everything (in my career) has led up to now. That's it for me, I swear. What else is there? The 900 was my goal."

What's a 900 then? Some kind of lottery game? The secret to eternal youth? 'Fraid not. The above statement was made by pro skater Tony Hawk at this year's Summer X-Games in America. Hawk had just made skateboarding history by pulling off a 900 in front of a massive crowd at the

games, that's spinning 900° (two and a half complete turns) in the air before landing to those of you who are too stupid to work it out. This may not mean seem overly important to most, yet it does make Hawk about the coolest mofo there ever was (trust me). But that isn't the only reason why Tony Hawk's Pro Skater is such a fantastic game.

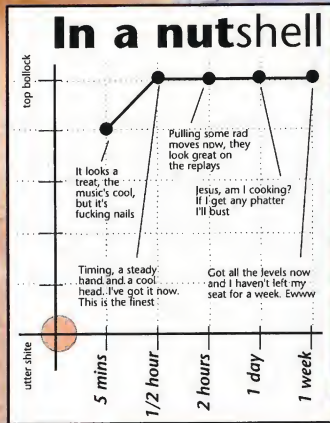

Radical highs

It always struck me as a bit strange that skateboarding games have been so thin on the ground. Until Street Sk8er hit the PlayStation a few months ago, there was

nothing to represent this finest of sports. Pro Skater is the first game to give this cultural phenomenon the attention it deserves. Ten professional skaters have been digitised up for the game, including Bob Burnquist, Geoff Rowley, Bucky Lasek and Hawk himself. As well as a Practice and Single session mode, the main Career mode tests your skating agility to the full. Beginning with a training level in a Warehouse, your dude flips his way through a total of nine massive levels (including anything from skate parks to complete cities).

'Beginning with a training level in a Warehouse, your dude flips his way through nine massive levels'

The Career mode covers your progress as you collect points on each level, then comes the ingenious bit. As each level loads you are informed that you collect videotapes by achieving certain goals. By collecting so many tapes you will unlock more levels and more equipment. Some tapes will become available when you perform enough tricks to hit a certain high score, where others will be physically hidden around the courses, or will be collected by picking up bonus icons that float around the course.

Groove Holmes

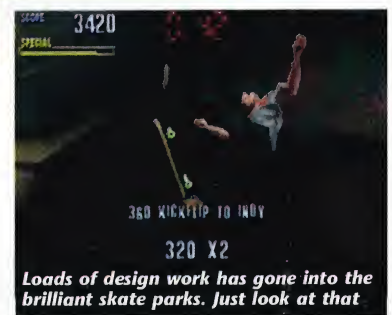

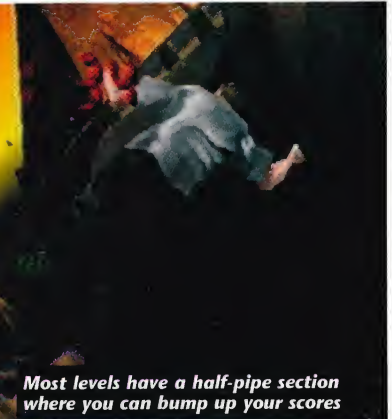

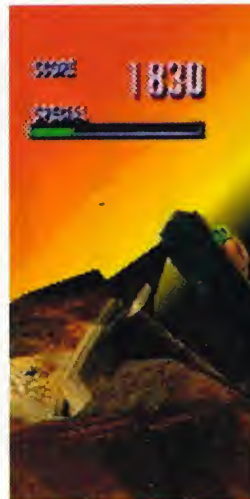

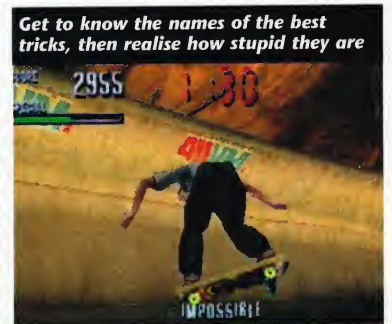

When you commence on a skating jaunt, you may be tempted to throw your controller at the screen and hurl your copy of Tony Hawk at the nearest planet, as pulling off the easiest of tricks may seem like the toughest exercise known to man. The reason why Pro Skater seems so devilishly difficult is due to the fact

that it's the most realistic skateboarding simulation available. If you make a jump and pull a trick you need to turn your board in the air to land with your board faced in the right direction.

As well as the brilliant one player game, a revolutionary two player game (choose from three types) is included. This features Graffiti, in which players battle for park supremacy by colouring

the obstacles their colour (red or blue). Obstacles are painted by performing tricks across them. Your opponent can claim back an obstacle by performing a better trick. Just another addition to an incredibly successful boarding spectacular.

Star Wars: The Phantom Menace

And...breath. At last the long-awaited Episode One hits the shops, but what are you in for?

A mind-bending array of beautiful colours

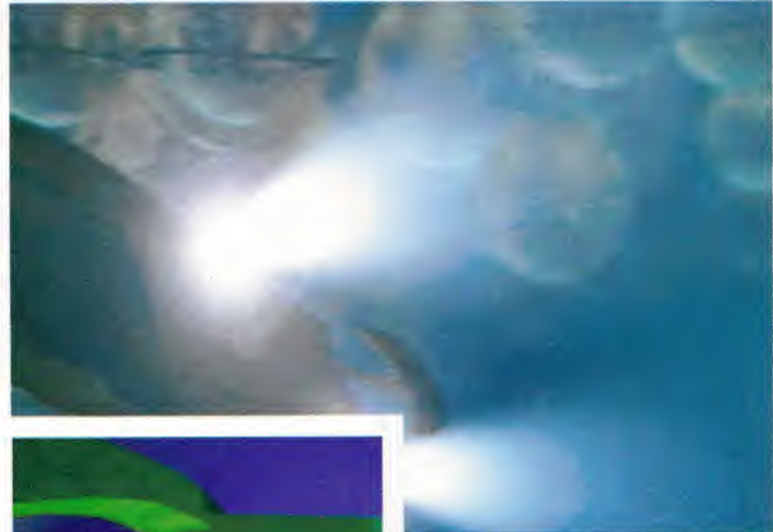

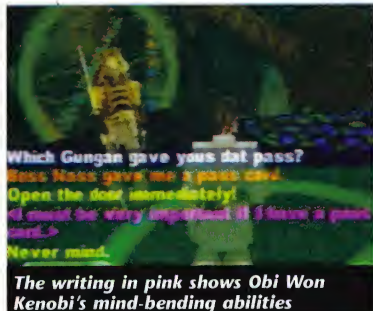

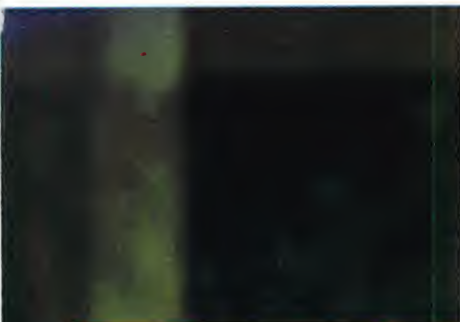

Thank you waiter...I'll have that little fella right there

LucasArts intention to release a Star Wars racer didn't take off, but patience has been rewarded with the release of Episode 1: The Phantom Menace.

The Phantom Menace is an adventure game in which you take on the persona of a key character from the film, such as: Obi-Won Kenobi or Qui Gon Jinn. As the game progresses you get to play other characters (Queen Amidala, Captain Panaka). Although the game follows the events of the film, you can change your adventure by interacting with Non-Playing Characters - who can help or hinder you. Take the time to speak to and help these needy folk and your life will be made easier. Interaction with other characters will create different scenarios and lengthen gameplay.

20 Things you didn't know about Star Wars... and probably don't care

1 George Lucas partly based the character design of Chewbacca on his ex-wife's dog, Indiana, which also lent its name to another of Lucas' characters.

2 Film companies were not interested in Star Wars before it was released - it was broadcasted on childrens television as a mini series.

3 Peter Mayhew, who played Chewbacca in the first 3 Star Wars movies, used to be a hospital porter in London.

4 After filming Star Wars, Peter Mayhew returned to his job as a hospital porter in London.

7 Before his role as Hans Solo, Harrison Ford worked as a carpenter.

8 The character Luke Skywalker was originally going to be a girl, but, Lucas changed his mind when he created Leia.

9 Illustrator Ralph McQuarrie's vision of Lord Darth Vader was based on a medieval Japanese samurai warrior.

10 For the Rebels' secret base, a crew was sent to Guatemala to film an overgrown ancient temple where human sacrifice was practised.

11 After filming in England, George Lucas

suffered from hypertension and exhaustion - bringing on a heart attack.

12 After working for more than a year and spending over \$1 million, the visuals effects group had only three usable shots out of hundreds.

13 Lucas' first script for Star Wars featured the adventures of two androids.

14 When Lucas' first movie THX 1138 was shown at the Cannes Film Festival, he sneaked into the screening because he didn't have a pass.

15 Star Wars earned four times as much as 1977's no.2 hit Smokey and the Bandit.

16 'Star Wars: The Cantina Band' by Meco stayed at the top of the pop singles chart all summer in 1977.

17 Early in George Lucas' career, he went into a short-lived partnership with Francis Ford Coppola.

18 Crews filmed in the Tunisian desert for Luke's home planet, Tatooine, despite sandstorms and temps of 110 degrees.

19 Because the technology did not exist for what Lucas envisioned, he created his own special effects unit, which later became 'Industrial Light and Magic'.

It's really the next stage in the Actua Golf series and plays as well as any of the other games with the added bonus of the big name licence for golf fans. Now you can dance on the green like the yanks! ☆☆

Pretty cool graphics, and sound effects - right down to my golfer having a little sneeze. Pretty well packaged although gameplay is a little too slow for any real excitement ☆☆

It's still just a Manga-database program, but this time it looks better and has more nobs than a public school rugby team. Less talk and more actual adventure please! ☆☆☆

A series of good ideas that are strung together in a troublesome game engine. There are some nice touches that just about glimmer through a basic sheen of shite. ☆☆☆

Resident Evil was scary cos most of the Zombies can be met at my local bus stop. I've never seen a Velociraptor blagging change for the 192, so I'm not so scared of this cash-in. ☆☆☆

Don't believe Nat, she's just a whining girl. This is the best rendition of the great game that I have ever played and it deserves a special shrine of appcaition. Buy it. ☆☆☆☆

This is the Cool Boarders of the skating world. It's got all you need to believe you can fly, but without being anything like a shite R. Kelly song. Surfs up! Er... wrong sport. ☆☆☆☆

Wow, this is Star Wars - It's really good! NO IT ISN'T! The novelty value soon slips by as you realise all you've got is an old fashioned adventure come puzzler. If you've changed your name to Darth Maul then buy. ☆☆☆

PlayStations. Fast games, loads of action - 'avin it large with a double top and all that shite! And a nice game of golf while old men whisper in your ear? Not as good as any previous PGA games and far more frightening ☆☆☆

I was astounded by the PC version of Rainbow Six and merely disappointed by the PlayStation version. It seems that the people behind it might have had enough payback to give up ☆

I know the Final Fantasy series is widely regarded as the bollocks, but I've always had an unusual view of life and there's nothing here to keep me amused. Hate it, hate it ☆

This is more like my kinda thing. Great idea, and the gameplay kicks-ass a lot of the time. I wasn't impressed by the lack of colour, but this fares better than most Res-Evil wannabes ☆☆☆

So, wrestling sucks, we all know that. But add a bit of variety and it's all worthwhile. I especially liked the option to step outside for some pummeling. The finest wrestler yet ☆☆☆☆

It's not every day you see a game based on the soundtrack of a Sci-Fi, er, thing. This is a bit of a gem as there's plenty of stuff going on on screen and the gameplay is absorbing ☆☆☆☆

I loved this. There's never been a footy title to truly tickle my bristles, as I'm a bit of a heathen on the subject. But I found this to be fast and furious enough to keep me happy ☆☆☆☆

Like most of us, I think I spent a lot of time on this just because of the Star Wars factor. It is a passable platformer in it's own right, but Lucasarts hardly need my recommendation ☆☆☆

I absolutely loved the PC version and wept uncontrollably when I was shown this pathetic conversion. If it can't be done they should wait for PlayStation 2 and not milk the name. ☆☆☆

A mishmash of missions, some enjoyable, some really, really boring and dull. It's just too inconsistent for it to be a must-buy, so rent it before you splash the cash. ☆☆☆

There's practically a new wrestling game per issue of the mag. WWF Attitude is still king of the ring, but Mayhem runs it very close. I just can't stand playing it for very long. ☆☆☆

A stonking alien tear'em-up that mixes bigs guns, bursting alien gunships and some of the best 3D scenery yet seen on the PlayStation. Could get samey after a bit though. ☆☆☆

Personally, I'm waiting for ISS Evolution, that's the footy game I'm going to buy. This is excellent, and gives FIFA a run for its bank vault, but it's not quite the killer title. ☆☆☆

Sam's gone mad with the score, but this is a fine game and had groups of Pro staff swamping Sam's PlayStation for a game, and that's what marks out a classic. ☆☆☆

I must admit to hammering away for hour after hour, just because it's a Star Wars game, not because it's actually any good. You'll finish it and then wonder why you bothered. ☆☆☆

A lot slower than any golf game I've played on the PlayStation. I think now they've upped the graphical detail too far and the PSX is struggling. Nice looking then, but too slow. ☆☆☆

This month I've slimmed down to my fighting weight to bring you the latest cheats for the newest games. So you want help for some tired crap you got with a Happy Meal(tm)? So what, we're talking just released here. Old timers get a crash helmet... We're going in!

Nipple twisting action from those crazy guys!

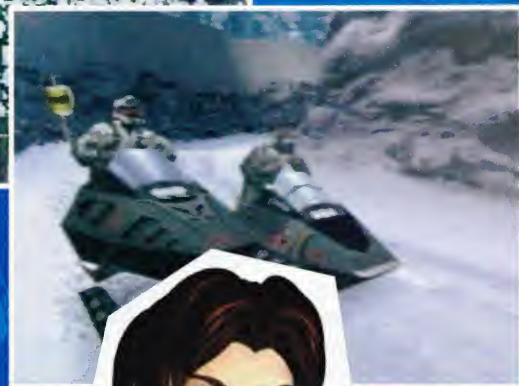

We are well and truly in the season of long shadows and the seasonal gloom seems to have effected you all. The cold evenings have driven you get out and buy all the latest games! I've got Wip3out under a microscope, WCW Mayhem dissected with a big knife and Sled Storm spread open for all to see. It's been tough work, but hey, a girl has got to do something to keep herself warm at this time of year. Perverts Paradise has been inundated by requests for breast fuelled cat fights between myself, Geri Halliwell and Britney Spears. Buffy the Vampire Slayer also got a mention. Since I'm still working out how to plan the photo shoot, you'll have to wait 'till next month. Maybe

A Easy Bernie, You seem to have
gotten yourself into a bit of a
tiz and all over my name. God
knows what you'd be like if we ever
met, I hope you find yourself a nice
girl who appreciates a man with a
limited range of vowels and
consonants. Thank goodness that
I've spent enough time in the Pro
office to be able to cut through all
that nonsense your spouting and
recognise your problem. You want
cheats for Sled Storm right? Of
course you do. I'm a great fan of
sports that take place on slippery

surfaces so I've had no problems
gaining full expertise on this
swerve heavy racer.

WCW Mayhem

Q Yo Bea,
You da finest bitch a G could git
whit!
No, I'm not from South Central Los
Angeles. I've just been watching
Menace 2 Society and It's got me mad
for Mayhem. But since I'm a middle
class white boy with no immediate
problems and a secure future under
the wing of Tony Blair, I decided to
take out my teen angst on a bunch of
overgrown Shirley Temple types! Yep, I
want to rip the heart out of fat men
and I want to do it now! Give me
cheats for Mayhem and send me some
hot-hot-hot pictures of you beating up
Gerri Halliwell with a dirty mop.
Straight outta Compton - crazy mother
f***er named...

Chris Cunningham, Dorset

A Chris, Chris, Chris,
You're never going to get far
with a girl if you can't ever decide
where your at, let alone where your
going. So, since your just sitting
around waiting for inspiration from
The Jerry Springer Show - I'll teach
you how to deal with men who
don't know how to lay off the baby
oil. And don't expect anything in
the post; I don't want no scrubs!

Star Wars Phantom Menace

Q Beautiful bod Bea,
Let's get this straight; I HATE
STAR WARS! If I wanted to see men
in pyjamas waving luminous
condoms around I'd pop round your
place with nothing on but a pair of
sun-glasses. The problem is this, my
mates a right git and I hate him.
He's getting the Phantom Menace
(ooh, scary!) as soon as his rich
arsed parents will buy it for him. It
would give me great pleasure to
waltz into his house, flirt with his
rather tasty sister and then ruin the
game by unlocking all its secrets.
Please help me out. Oh yeah, You've
got a nice pair of Bristols - but I've
seen better so don't be so dammed
cockey!

Michael Hunt, Nottingham.

Wipeout

Q Hi there Bea, Remember me? I'm the boy you kicked, When he was only three! But now I'm older, And it's plain to see, All I want, Are cheats for Wipeout 3! Rosie Parks (Mr), Alabama (No Joke!)

A Hiding behind rhythmic words and false names are you Mr Parks? No matter, I've got a rather juicy tip to get you whipping out that long forgotten serial connector and allow you and some friends to enjoy some silver-suited four-play action. If your natural wit has made friends a big "no no" then sit by yourself and enjoy yourself with my wide assortment of racey additions.

Link-up mode for four players:

Load the game on two linked PlayStations. Select "Options", then "Game Setup", then "Default Names", and "Default Name Player One". Change the default name on both PlayStations to LINK. The screen will flash to let you know that you've entered the code correctly.

Choose the new "Establish Link" selection on the options screen on both PlayStations. The first PlayStation to enable this option will be set as the master,

and the other PlayStation will be designated the slave (Mmmn. lovely!). Select the number of players, then choose a single race or eliminator mode (on the master PlayStation). If a single race was selected, choose a class and track. Select a vehicle to start the race.

Phantom class:
Enter JAZZNAZ as a default name.

Prototype track:
Complete all tracks with all teams

in the single race mode. Then, select the new Prototypes option on the main menu.

All circuits:
Enter WIZZPIG as a default name.

All teams:
Enter AVINIT as a default name.

Change blue turbo triangles to white:
Enter BEBEDEE as a default name.

Hitting side of track slows down your vehicle:
Enter NOWHEELS as a default name.

Unlimited hyperthrust:
Enter MOONFACE as a default name.

Unlimited shields and thrust:
Enter GEORDIE as a default name.

All challenges:
Enter THEHAIR as a default name.

Four prototype tracks:
Enter CANER W as a default name.

Unlimited random weapons:
Enter DEPUTY as a default name.

Unlock tournaments:
Enter BUNTY as a default name.

Hint: Override auto-pilot:
Press Left or Right at a junction to override the auto-pilot if it is active.

Hint: Avoid wall damage:
Switch to the auto-pilot any time before hitting the wall. If done in time, there will be no effect from the collision.

Jonah Lumo Rugby

Q Dear Miss Havin' Not smut please, my mum reads this mag and if she found out that I was writing to a woman like you about ball control problems, she'd have me in front of the school's guidance counsellor before you could say "THOMAS, PUT THOSE HAMPSTERS DOWN!" HA! Only joking, be as crude as possible and give me help with Jonah Lomu Rugby.

Thomas "No tears, no fuss" Phillips, Reading.

A Tom, As much as I'd love to wrap my tongue around all those naughty rugby analogies, I'm

going to keep this as clean as possible. If you want to be better than the Kiwi's, your going to have to try harder (no joke intended.) Do as I say and the following extras will be unlocked.

Special Cups

Win all the territories cups, then you can play a "Special Cup" where you can play with World 15, Barbarians and British Lions. When you win the 'Special Cup', you get an "Extra Cup" where you can be the Rage All-Stars, or Codemasters, or the Lomu team, in which all the players are Jonah Lomu.

WHAT YOU'LL NEED

Props to get you in the mood:

(tennis racquet, balls, wrist and headbands) and

protective clothing: thick wooly coat, gloves, multiple T-shirts, hats, socks, PlayStation, TV, clean boxer shorts, combats with pockets stuffed with tiny items - oh and a gullible Blonde type.

Kournikova's

Strip Tennis

She's got the golden plaits. She's got the thighs. And she's even up for a game or two! It could be a love match, if you play your shots right.

It's every (male) tennis fan's fantasy: no, not Henman winning Wimbledon, you fool, but Anna Kournikova slipping out of her skimpy tennis dress to show us all her lovely pair of topspin aces. Oh well... we can dream (and I frequently do). In the absence of a gorgeous Russian teenage tennis totty, you have two

options:

A. Watch Channel 5's late-night films, complete with soft-focus, above-the-waist camera work, double-D starlet, and incidental musak.

B. Or you could always ask/bribe your girlfriend to be a good sport and dress up for the part... then undress to show you her good points.

WHAT'S YOUR GAME?

The game, of course, is Anna Kournikova's Smash Court Tennis and the premise is very, very simple. You play the game not for points, but for items of clothing. You win, she takes something off; she wins (as if) and you take something off. What could be simpler, what could be easier?

Ah, well, there's the slight matter of...

THE PITCH

How to get your girlfriend to strip? It's an age-old problem and one much studied since time immemorial. In general (and we're taking massive sweeping generalisations that stick in the gullet), there are three kinds of women:

A. Those that strip for money.

B. Those that strip for the love of fresh air on their bits.

C. And those that don't. Ever. And I'm leaving you now you've raised the subject.

Percentages for these categories vary slightly from year to year, but on average A = 3%, B = 0.5%, and C = the rest of the 'takes her bra off beneath her jumper' cows.

FEATHERING YOUR LOVENEST

So, you're gonna need a lounge with blackout curtains, a thermostat ripped from the wall so it's hotter than hell, a PlayStation, a copy of the game, a guaranteed night in without disturbance, and the most alcohol you can afford. And by that I don't mean Skol - I mean Hooch by the bucketload or Metz by the quart... whatever it is she (not you) likes to quaff - this bit is very, very important.

THE HUSTLE

"It's just a quick game on the PlayStation, yes I know you hate it. Yes, I know it's the Antichrist and you'd rather snog a vagrant leper, but for once just humour me." Then it's "Oh, it's tennis. Oh, I only need to press two buttons and it requires no mental agility. Oh, I quite like it." Let her win a few points, then, my friend, you have her (well, not just yet - steady).

PLY HER WITH ALCOHOL

Hot room, cold refreshing beverages (at least 8% proof) and the kind of 'losing streak' that's making you bite through your cheek, and you're on your way. Now as far as clothing's concerned it's a bit of a yin-yang thing: you slap on everything you can without looking like Cartman, whilst she needs nothing more than a tennis slip and a hair-bobble to save her modesty. Knowing her alcohol tolerance is handy, since once she's starting to slur, it's time to pop the question...

GAME, SET & SNATCH

"What do you say about making this more 'interesting'?"

"Wasth tha?"

"Well, since you're obviously so much better than me, why don't we play for... points... or money... or we could play for clothes?"

"Wasth tha?"

"You know - I win, you take something off; you win, you take something off?"

"Gurgle..."

"Good, good, I'll mop that up later, now let's get cracking!"

THE RULES

1. Only Grand Slam tournaments can be played, with both players selecting Anna Kournikova (we've got to be fair at some point).

No special explosive racquets are allowed.

2. Fast game: win a point and you win an item of clothing.

Slow game: win a game and you win an item of clothing – the loser may select which item to hand over, but the winner has the choice of taking it off the loser themselves.

3. There's no limit to the number of items worn at the beginning of the contest; eg three hats, six pairs of socks etc, but they all must be worn and not just draped over you. Also, if any item should fall off whilst undressing, that item can also be claimed by the winning player.

4. Win a game to love and the loser forfeits two items of clothing and must thank their opponent for beating them so easily.

5. Pairs of items, eg socks and earrings, may be taken off individually and count as two separate items.

6. A player down to their final item of clothing must declare "I'm nearly naked!" and be ready for the final indignity once they lose their last garment: a lap around the room in the style of the winner's choosing – I like an Austin Powers Go-Go dance myself, but each to their own.

7. Once one player is naked, the winner can elect to play on for forfeits until the loser has won back all of their clothing. I'll leave this to your imagination, but I like her to make me a nice cuppa.

Silent

The last resort

You've been gagging for it and now it's here. Yes readers it's here, the concluding part of Silent Hill

Run forward and go into the building on your left to collect some more pick-ups then walk over to the road. Near here you'll find a tourist information board with a map dispenser. Get a map and head south to Annie's Bar where you find Dr. Kaufman being attacked. After he leaves examine the floor near where the attack happened to pick up a receipt and Kaufman's key. Look at the receipt and you'll notice a number written on it.

Leave the bar and make your way to the Indian Runner to the east. When you get there you'll need to enter the code into the padlock that you found on the receipt. Collect the rifle shells from the shelves at the far end and go over to the cash register. Read the diary and examine the pictures of the wall next to the safe. This will give you another combination to gain access to Haerbey Inn.

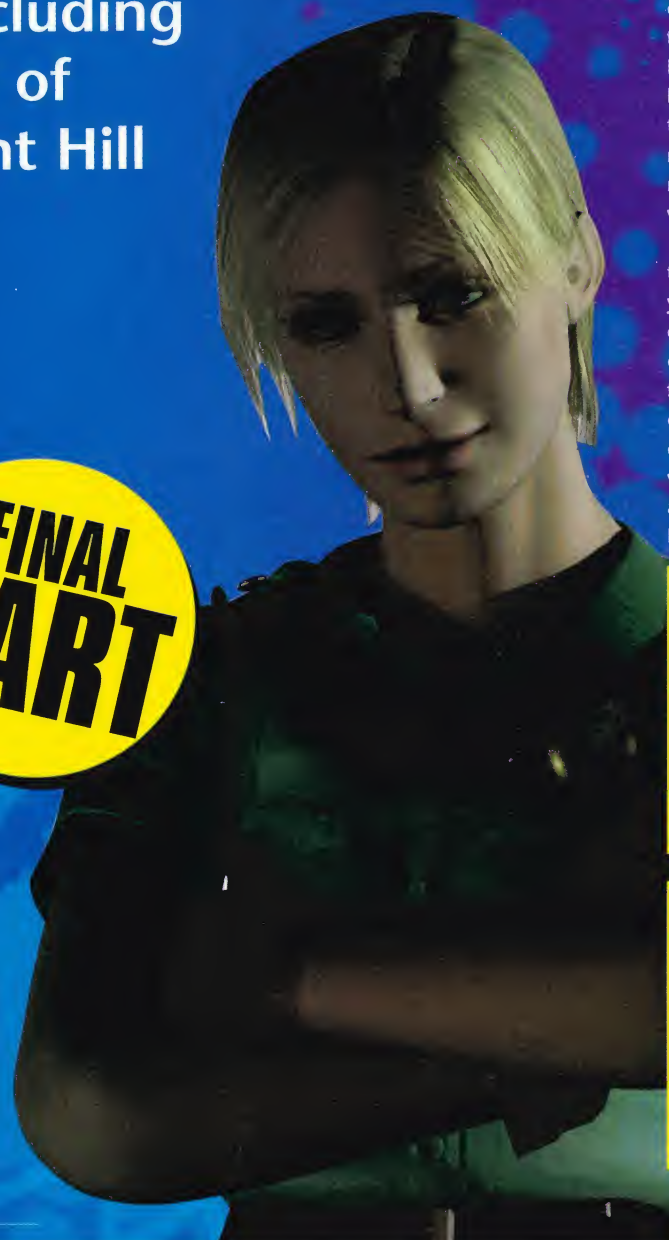

Check the drawer behind the register to obtain the safe key and use it to open the safe. This contains what looks suspiciously like drugs, you can't collect them so just go back outside again. Run down Weaver St. to the inn and use the combination on the keypad at the back door.

Take the magnet off the sofa and go through the door to the left of the entrance. This leads to the garage, examine the motorbike and collect the health drink and shotgun shells. Now make your way back into the motel and go through to reception. Unlock the door here and go outside. If you look at Kaufman's key you'll see a room number, three, so turn right and follow the rooms round until you reach the third cabin. Use the key and enter the room. Get the health drink from the bathroom and examine the chest of drawers. Push these to one side to reveal a hole in the floor and a key just out of reach. If you use the magnet here you can collect this key, its for the motorbike.

Go back to the garage with the bike in it and use the key to discover a small glass vial stashed inside. Dr. Kaufman will appear and take it from you, which isn't nice. After the short scene go back outside onto Sandford St. again and go west.

**FINAL
PART**

Hi!

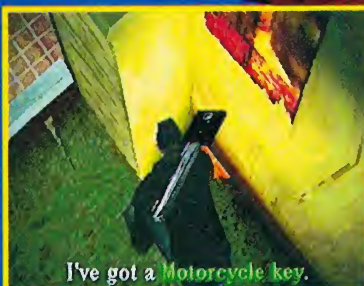

As you approach the bridge the town will slip into the alternate reality before your eyes. Your destination is the Lighthouse so keep heading west until you reach the pier. Opposite here is a small alley containing some shotgun shells and a health drink so collect these if you need them. Then run down the pier until you reach some steps on the left hand side, go down these and cross the plank onto the boat.

Go through the door and along the hall to meet up with Cybil again. Daliah will turn up also and explain a bit more plot to you, she also says that to defeat the demon that's taking over

the town you must head to the Lighthouse. Save your game when the scene is over and exit through the same door as Daliah. There is really only one possible route from here to the lighthouse and we recommend running the whole way as there are loads of monsters attacking.

Go straight inside when you get there and climb the spiral staircase to the roof. You'll arrive to see a ghostly figure (maybe Cheryl) disappearing and a large mark of Samael. Go back down the stairs again and exit the lighthouse. A few paces along your journey back to the boat the scene will fade and you'll appear back inside the

I've got a **Motorcycle** key.

boat again.

Leave the boat and make your way back up the pier to W. Sandford St. once more. Head west along the right-hand side of the road until you come to an open gate. Go through here and climb down the ladder into another sewer. Again your radio won't work here so be careful.

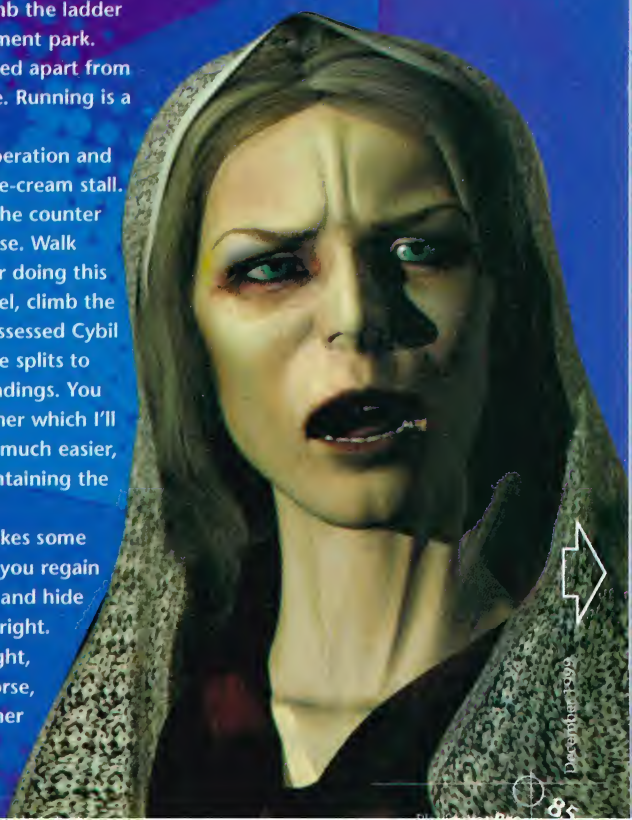

Collect the map at the bottom of the ladder and simply head straight for the ladder at the far end. There is some more ammo and health to the south if you want it. Climb the ladder to emerge in the amusement park. Every route here is blocked apart from the one you have to take. Running is a good idea.

You'll pass a ride in operation and eventually arrive at an ice-cream stall. There's a save point on the counter here which you should use. Walk towards the camera after doing this until you find the carousel, climb the stairs onto this and a possessed Cybil will attack you. The game splits to two here for different endings. You can either fight against her which I'll explain in a moment or, much easier, use the plastic bottle containing the red liquid from earlier.

To fight against her takes some time. From the moment you regain control jump back twice and hide behind the horse to the right. Keep strafing left and right, sheltering behind the horse, to make Cybil waste all her

bullets. Once she's out of ammo equip the hunting rifle and keep shooting and moving. It takes a lot of shots but she'll eventually keel over and die.

What follows is a short scene involving Alessa, Daliah and a number of cracking plot revelations that I'm not going to spoil. You finally get to use the Flouros as well which is cool. Again after the scene fades away you'll awake back in the hospital with Lisa. Except it's not actually the hospital!

From out of nowhere

After a short conversation Lisa will leave the room, if you follow you'll enter a short corridor then a lift. When you get off this you'll be in a hospital corridor. Go through the door opposite the entrance and you'll find yourself in the antique shop. There is a save point in here plus some first aid and shotgun shells. Collect all of these and go back into the corridor again.

Head to the last door on the right and go down the stairs within to emerge in a classroom. Read the message scrawled on the desk in the centre of the room and go through the door at the other end. Now you're back in the operating room. Collect the pliers and screwdriver from the table and head back up the stairs once more. Go back to the double doors you arrived through and enter the door on the right. In here is a tap sticking out of the ground with the key of "Ophiel" jammed inside. Use the pliers to remove it and return to the corridor once more. Find the door of "Ophiel" and use the key to unlock it. On the other side is another corridor.

To the right is a lettered keypad and a locked door which we'll come back to later. Only one door isn't jammed and it's the first on the left. In this room is a puzzle involving Star signs. There are four symbols on the walls with a number under each. The numbers refer to the limbs each has, simple. Go to the three plaques at the far end and enter the corresponding number

Nowhere 1f

into each keypad. The correct numbers are (from left to right) 6, 4 and 8. When the last number is entered the green stone will slide out allowing you to collect the Stone Of Time. Back in the corridor you'll notice a slate on the far wall with a clue engraved in it. Go back to the lettered keypad and read the Grim Reaper's List next to it. Place the names in order of age, youngest first

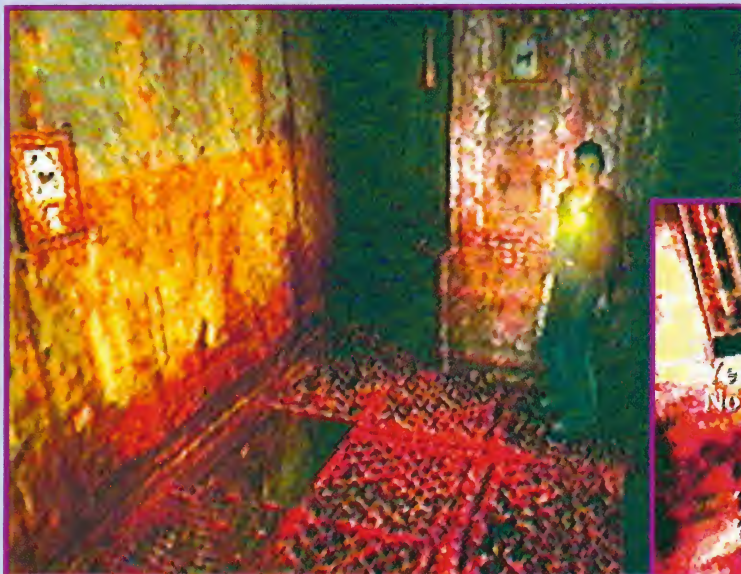

and make a note of the first letter of each. Enter these into the keypad to unlock the door. Go straight through the next room to the morgue and collect the Amulet of Solomon. Return to the corridor and you'll be interrupted by a scene where Lisa becomes possessed and asks for help. When it's over go back to the antique room and use the Stone Of Time on the clock by the entrance. This will give you the Key of "Hagith".

Use this key to go through the double doors at the end of the corridor and take the lift to the 2nd floor. Proceed into the main hallway and go through the third

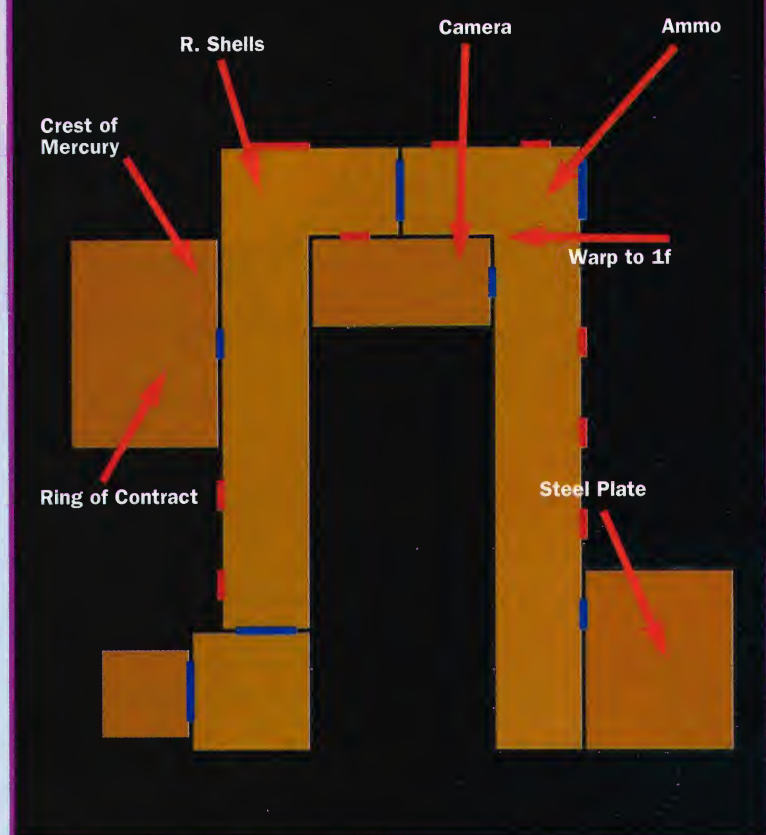

door on the left. This is the Jewellery shop from before. Collect the Crest Of Mercury and Ring Of Contract from the glass cases. Before leaving also collect the rifle shells from the corner.

Continue to the other set of doors at the end of the hallway and go through. Enter the first door on the right around the corner of the new hall and take the

Nowhere 2f

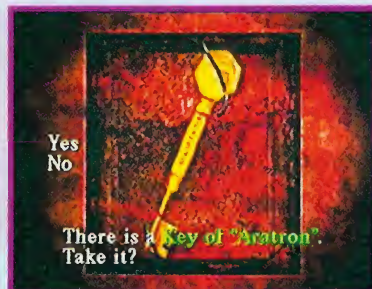

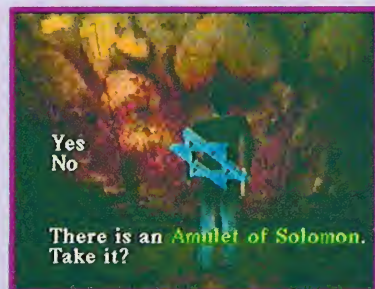

camera off the table. Return to the first floor corridor and go into the last room on the left at the far end. Use the screwdriver to remove the steel plate off the wall but don't take the key, you'll get electrocuted!

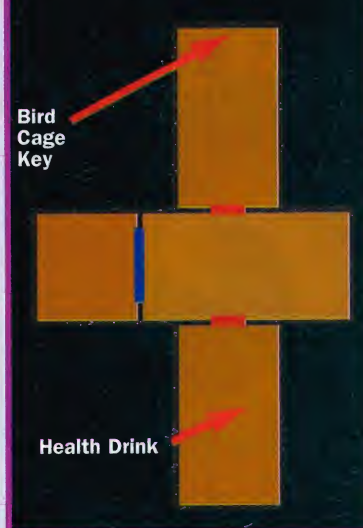

Instead take the final set of double doors in the corner, you'll unlock them first, to find yourself back on the first floor again. Go straight to the lift again and go up to the third floor. This is the altar you visited before. The doors on either side of the room require the correct sequence of buttons to be pressed to open them.

To find these use your camera on the paintings on either side of the altar. This will reveal a collection of symbols that must be recreated on the keypads. The left painting refers to the left door and vice versa. Go through the left-hand door and get the bird cage key then go through the right-hand one to get another health drink (you will need all of

these, trust me!). Return to the first floor again and enter the final unlocked door in the main corridor. Use the key to open the bird cage and collect the Key Of "Phaleg" from within. Don't worry about being able to hear a bird, there isn't one. Use this key to unlock the next door along and go through. Now enter the first door on the right to be confronted with a large cabinet with a dagger stuck in the top. Don't remove this just yet. First of all use the ring to link the chain on the front of the cabinet then you can take the dagger safely. When you turn to leave the something inside the cabinet starts to stir but as it's locked in nothing will happen. The next door up on the right is a storeroom. Get the bullets, health drink and examine the bag of jelly beans. When asked if you want to open the bag say "yes" and you'll receive the Key Of "Bethor". If you want to see what's actually on the video tape go through the side door and use

Nowhere 3f

the tape on the VCR found inside. Back in the corridor, use the key to unlock the door of "Bethor" (first on the left) Turn off the generator in here and go into the next room along to collect the Ankh. Now return to the room on the second floor where you removed the steel plate. You'll need to use the warp door as the power to the elevators is now off.

Collect the Key of "Aratron" from the hole in the wall and return to the short corridor through the door of Phaleg. Use the final key on the door on the far right hand side of the hallway. Some ghosts will appear to be performing some kind of ritual as you enter and when they disappear collect the Disc of Ouroboros from the bed-side table. Finally cross the corridor again into what appears to be a child's bedroom. Save your game and

place the five artifacts (dagger, disc, amulet, ankh and crest) into the slots on the door. Go through and follow the ghost of Daliah down the stairs.

You'll emerge in a large room in the alternate universe. Daliah is waiting for you and insists that Alessa is Cheryl (spooky). Dr. Kaufman appears and hurls the vial of red liquid at Alessa but it doesn't have the desired effect and she turns into a horrible winged beast. Thankfully killing this is remarkably easy. Walk forward a little and equip your most powerful weapon. Hold the aiming button and don't move. Wait until some lightning appears around the creature's midriff as shooting it then causes more damage. After you've been struck by lightning use a first aid kit to restore yourself to full health. Repeat this process and it should be dead after about ten shots. Congratulations you've just completed the game. Now try the Next Fear mode...

THAT'S YOUR LOT!

dealer

This, as you've gathered, is Dealer. It's enormous and it's very, very useful. Every PlayStation game you could ever hope to buy is here, and Pro is the only magazine which includes screenshots of everything.

Dealer is an indispensable guide for any PlayStation owner who doesn't have more money than sense. It's here to provide you with the most from your PlayStation for the minimum amount of cash, and to help you avoid the ball-ache of being landed with a game which is sub-standard, mildly disappointing, or simply not "up your street". This is how it works...

Every PlayStation game is listed in Dealer. They're divided into categories and run alphabetically within them. Every game is briefly reviewed and given a star rating based on the opinions of every game expert on PlayStation Pro. We don't include the game's original score and we don't include the date when it was originally released. Why? Two reasons. One, who

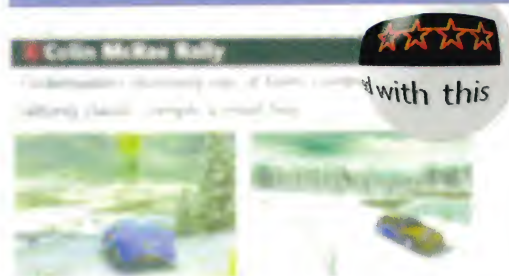

cares? And two, a score of 99 per cent three years ago might not count for too much in light of developments since, just as a solid but uninspiring game three years ago may well be seen as the same today.

Dealer is written with you the game buyer in mind. In the case of sequels we advise you on which game to choose. A newer model of an older game isn't necessarily better. It might offer slightly more or be cosmetically superior, but if it comes with a hefty price tag while its sibling is available for less, then we'll tell you where to look.

And this is the point. Every single game in Dealer is given a value, both in terms of what you can expect to pay for it second hand, and its value to you as a trade-in. These are presented in colour-code form and can literally save you pounds. **The values are arrived at with the help of Game Guide, an organisation with years of experience** in advising independent game stores. Information on all of the 600-plus games is updated every month, and it's always accurate. Whether you're buying, swapping or trading games, Dealer has all the information you need.

rating system

Each game gets a star rating from 1-4. We think you can work it out yourselves, but in the event of difficulties don't hesitate to call...

racing

Andretti Racing

Mario Andretti eh? A name you can trust when it comes to driving in the Indy 500. But you've got to question his judgement when he starts endorsing average games like this. There's so many racing games out there, and this gives no real competition.

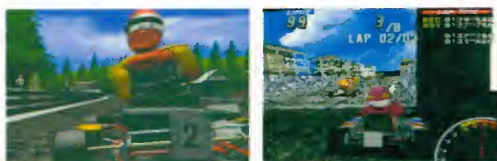

Ayrton Senna's Kart Duel

An attempt which looked okay, but lacked any real gameplay. Ayrton's name deserved better.

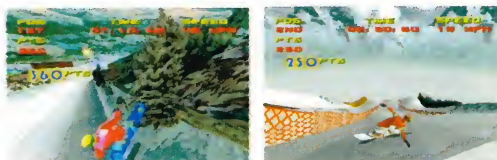

Ayrton Senna Kart Duel 2

Ayrton would be spinning in his grave if he knew his name was being attached to this bucket of toss.

Big Air

It's no Cool Boarders beater. Actually, this one would have trouble beating an egg. Shite joke, shite game.

Buggy

An altogether too realistic simulation of Remote Control racing that can be impossible to play.

If you've ever tried to steer one of the little bleeders in real life you'll know exactly what we're talking about. Prepare for teeth knashing if you plump for this.

Burning Road

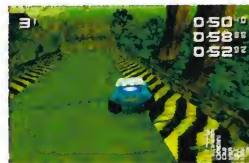

A fast paced effort which never performed as well as it should have. But check out its improved sequel

Explosive Racing, rather than harking back to the old days with this. This dog never had its day in the first place and there's no reason you should let it start now.

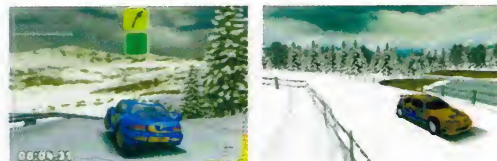

Circuit Breakers

Is it Micro Machines? Does it want to be? Well no and yes in that order, but this Supersonic Racers revamp does have playability in spades, and comes into its own in multi-player mode. Not a must-have title, but a fine, cheap get the mates around thriller.

Colin McRae Rally

Codemasters stunning run of form continued with this rallying classic. Simply a must buy.

Cyber Speed

Only serial sci-fi masochists will want to go near this pile of absolute cyber-shite.

Destruction Derby

The game that initially sold thousands of PlayStations now looks dated and shoddy. Just like Chris Tarrant.

Destruction Derby 2

Infinitely better than the original. Faster, more polished and generally more fun. Worth checking out still.

Explosive Racing

Burning Road was cool enough, but this sequel manages to address the original's minor problems.

Looking a little dated by today's high standards but that's to be expected. By no means the definite motorcycle game but a nice effort all the same.

Felony 11-79

Nippy little joyriding game let down by a lack of tracks but still manages to be good fun in short bursts.

Formula One

Grand Prix racing as it should be, tons of action and speed a plenty. But it's since been superceded.

Formula One '97

Formula 1 was a front-runner, but Formula One '97 seized poll position and set the new standard.

Formula One '98

With two far better F1 games coming before it, this highly disappointing follow-up let the side down more than that bloke Beckham. We expected far more from Psygnosis, but the software giant took their foot off the pedal and delivered this dud instead.

Formula Karts

A useful dabble into the world of performance go-karting. Faster than Linford Christie in a Porsche, Formula Karts is still let down by the odd glitch and frustrating gameplay. A noble attempt but there are a myriad of better racing games listed here.

Gran Turismo

Impossible to sum up in two lines. Just go out there now and buy Sony's showpiece car game. Awesome.

Hardcore 4X4

Well below average dirt racing game where you hammer round in jeeps and the like.

Hi-Octane

Another of the original PlayStation games, Hi-Octane followed hot on the heels of WipEout with the same ideals and a similar form of gameplay. What it didn't manage to do was create from the rapid movement a genuine sense of speed or involvement. Shame on it.

Impact Racing

Another decidedly dull racing game that has no place in even the most stupid gamers collection.

Why any store would stock this absolute tripe is anyone's guess. Save your coppers for one of the many, many better games out there.

Indy 500

Time and again developers go out, get the big name license but then come up with below par games.

What's the point? To sell more games of course. Don't be fooled here, Indy 500 couldn't be more middle of the road if it was a squished hedgehog.

Jeremy McGrath Supercross

We deduce from the title that Mr. McGrath is some kind of Supercross hero. We've never heard of him though. It's a bit like having Paul Peschisolido's Actua Soccer 4. Anyway if you must indulge in mud and jumps you could do worse than this, maybe.

Jet Rider

This was a piss poor attempt at being Sony's answer to Wave Race64. It doesn't come close and deserves to be drowned. The controls aren't really there. The graphics are duff and it sounds like a minnow being raped by a blue whale. Utterly, utterly fishy bollocks.

Jet Rider 2

The original was shite and this sequel doesn't exactly break the mould. More dodgy controls we're afraid.

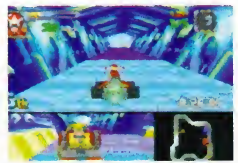

Max Power Racing

Without the depth of the likes of Gran Turismo but then, it isn't supposed to have it. Max Power Racing sets out to give you the perfect arcade racing experience and comes pretty close to pulling it off. Nice license, nice game. Full marks all round.

Megaman: Battle and Chase

"Hands up who wants to pretend to be Mario Kart? Put you arm down Megaman, as you've absolutely no idea how to pull it off." Unfortunately Mr M. failed to take heed any advice, and we're left with this pastel coloured carting crap that has no redeeming qualities.

Micro Machines v3

Midget motor racer that everybody must own. The four-player mode is worth getting a PlayStation for.

Monaco Gran Prix

A winning formula which successfully plugs the gap left by the dreary F1 '98 and provides for more pole positioning. The engines sound like a troop of tone deaf bees in a jar, but the gameplay is as solid as a cast iron carbon copy of Lennox Lewis.

Monster Trucks

Big wheels can only mean big fun in this trucking great game. You even get to crush cars in front of a big crowd too! Obviously more geared towards the American side of the market but if you like yee-haaing with the best of them then have a look.

Motorhead

Proving that more than just fit girls and good porn can come from Sweden. Slick and fast (no not the porn)

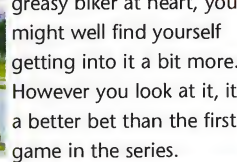

Moto Racer

Full on motorcycle racing. Looks reasonable and plays well, but ends up being a little too samey.

Moto Racer 2

Dodgy graphics and a little jerkiness let this two-wheeled simulation down, but if you're a bit of a greasy biker at heart, you might well find yourself getting into it a bit more. However you look at it, it's a better bet than the first game in the series.

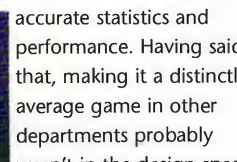

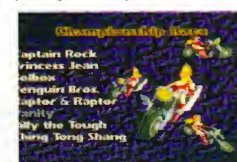

Motor Mash

Enjoyable Micro Machines clone. But it doesn't quite have what it takes to topple the classic though.

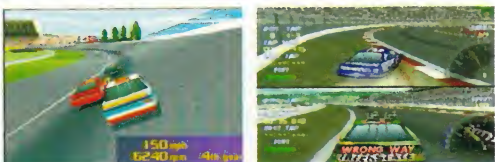

Motor Toon GP 2

Interesting idea. Make a cartoon style racing game and you get away from all the blandsters who want proper, accurate statistics and performance. Having said that, making it a distinctly average game in other departments probably wasn't in the design spec.

£ NASCAR Racing '96 ☆

The oldest game of the NASCAR trio but they're all pretty similar anyway. And not that good either.

£ NASCAR '98 ☆

An average attempt which looks and plays much the same as Andretti Racing. Rent it for the night and then decide you don't like it.

Failing that just give away your Playstation, write that screenplay, get discovered, and direct your own movie. Nah... Just kidding.

£ NASCAR '99 ☆

Keep away from this formulaic redneck-racing rubbish. You may find yourself sleeping with your relatives.

£ Need For Speed platinum ☆☆☆

The original Need for Speed game was a must have title for any discerning player. The series is now in it's fourth installment and this great grand daddy of a racer is really showing it's age. Worth picking up for a song though, but only a really cheap song.

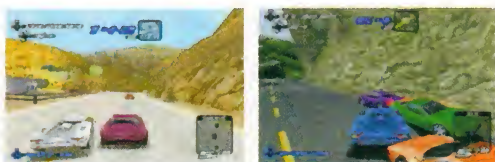

£ Need For Speed 2 ☆☆☆

The slightly less impressive sequel to the above. More options, but it's still pretty lacklustre.

£ Need For Speed 3 ☆☆☆

The series gets back on track but even so this is still far from perfect. The best of the bunch to date though.

Need for Speed: Road Challenge ☆☆☆

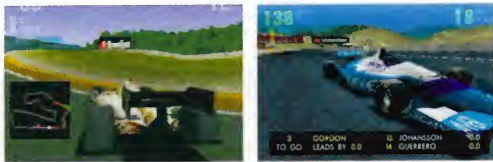

It nearly made it, but oh no! It span out on the final lap. A fair racer that lacks that spark of reamness.

Gran Turismo and Ridge Racer Type 4 have raised standard for racers, but this series doesn't give up easily. A buffed pebble rather than polished diamond.

£ Newman-Haas Racing ☆☆☆

Has more speed than F1 '97 yet less depth makes this a game for those who love frantic pace.

£ Off World Interceptor ☆

A truly appalling fly and shooter that has no place on a Commodore 64, let alone a Playstation. We have

sent out a death squad with orders to seek out and destroy anyone buying a copy of this shite. Is it worth facing a firing squad for? Save yourself by avoiding it.

£ Peak Performance ☆

Under-par performance would be a far more accurate description of this car fest from Japanese telly makers

JVC. Overly Jap influence means the cars you'll be driving are more like you'd see a Tokyo Bank manager in than what you'd expect in a Playstation racer.

£ Penny Racers ☆

Quite possibly the worst racing game to date. Makes Off World Interceptor look like Gran Turismo. Serious questions should be asked of the programmers and regardless of their answers they should be dangled from a bridge by their ankles, then dropped.

£ Porsche Challenge ☆☆☆

The Boxster races for all its worth in this slick racer. Options include a cool two player mode for added enjoyment. Only the best stuff ever makes it to Platinum but Porsche Challenge is perhaps the surprise release in the range, A nice try though.

£ Power Boat Racing ☆☆☆

One of two Power Boat games that arrived in quick succession. This was the worst of the two..

£ Rage Racer ☆☆☆

The third Ridge Racer game is an in-depth affair. Quality action all the way. But R4 leaves it way behind.

£ Rally Cross ☆☆☆

A bouncy rally game from Sony that went head to head with the excellent V-Rally. And lost. Quite badly in fact.

With Rally Cross 2 since released there's no point in looking at this, both games are pretty much the same as each other anyway. Buy at your peril.

£ Rapid Racer ☆☆☆

Good fun in the short term but again failed to be Sony's answer to the N64's Wave Race 64.

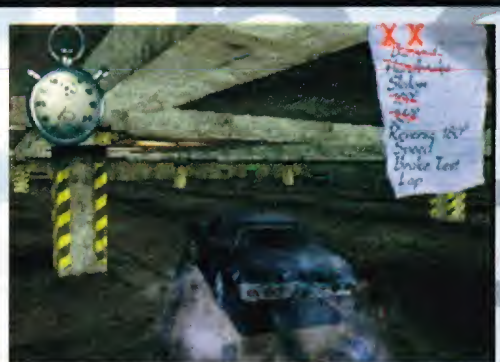

£ Ray Tracers ☆☆☆

Rapid chase game which is over all too soon but brings back memories of Chase HQ and the like.

£ Driver ☆☆☆☆☆

Everyone should own this game. It managed to live up to all our dreams, and so much more. Chase crooks up, around and over the streets of San Francisco while avoiding the cops and looking as cool as possible without the use of an Iceberg. It's Superb - buy it.

€ Ridge Racer platinum ★★☆☆

The original PSX racer still takes some beating and for £20, you ain't gonna get a better deal.

€ Ridge Racer Revolution ★★☆☆

The sequel to Ridge Racer packs a mean punch, but the limited course on offer stops it being a classic

€ Ridge Racer Type 4 ★★☆☆

Namco reclaim the road and come tearing back to the top spot with this amazing arcade racer. Sleek, sultry, and sporting more scorching wheels than a wagon train in Apache avenue this is a literal turbo talisman. The ultimate arcade racing experience

€ Road Rage ★☆☆

A poor mans Wipeout in every sense. In fact a man so poor he only eats from bins. Avoid.

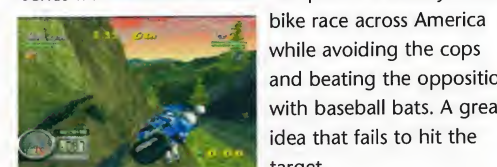

€ Road Rash ★☆☆

Average motor biking game from yesteryear that gives you the chance to knock your opponents about too.

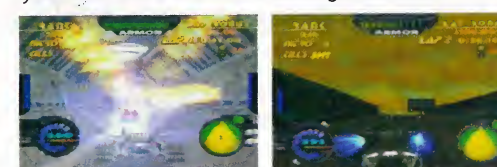

€ Road Rash 3D ★☆☆

A three dimensional version of the popular Road Rash series from Electronic Arts. Take part in a deadly motor bike race across America while avoiding the cops and beating the opposition with baseball bats. A great idea that fails to hit the target..

€ Rock 'N' Roll Racing 2 ★☆☆

This looks amazing until you actually start racing, then you'll find this is one of the worst games ever.

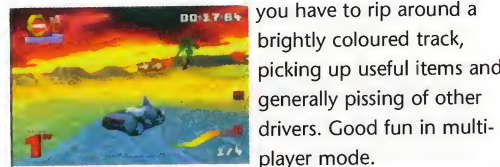

★☆☆ Sled Storm

The best motor thingy on snow racer ever. It plays like a Bond movie chase scene, looks like a winter dream!

★☆☆ S.C.A.R.S

A novelty racer in the Mario Kart mould. Each car is based on the characteristic of an animal with which you have to rip around a brightly coloured track, picking up useful items and generally pissing of other drivers. Good fun in multi-player mode.

★☆☆ Speed Freaks

Cute racer with a multicoloured mean streak. It's Mario Kart for the PlayStation. It's faster than Will's bird. Top!

★☆☆ Speedster

A racing game with a weird overhead view point. Original, but still largely complete arse.

★☆☆ Starwinder

What is this, clock work stars? No, its a 3D space racer that fastens you to a rail and chucks you all over the place. It tries so hard to be Wipeout, but isn't. Wa-heh! Another game winging its way to the bargain basement incinerator, and not a moment too soon.

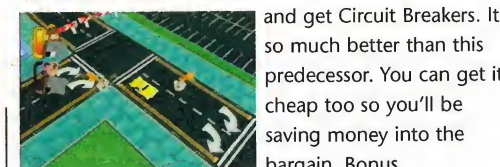

★☆☆ Street Racer

Mario Kart was an obvious influence with its development but this four player cartoon racer looks extremely dated. To be fair it did when it was released too. It's saving grace were the Page 3 "stunnas" in the ad campaign but they're not included, nor is gameplay.

★☆☆ Supersonic Racers

A wacky race style romp that owes more than a passing thank you to MicroMachines 3. Avoid this. and get Circuit Breakers. It's so much better than this predecessor. You can get it cheap too so you'll be saving money into the bargain. Bonus

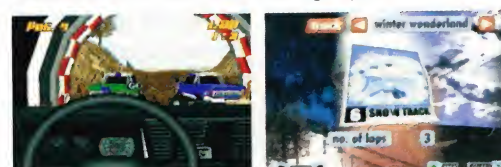

★☆☆ Tank Racer

A potent mix of nitros and napalm lifts this delightful demolition derby up above the average mark

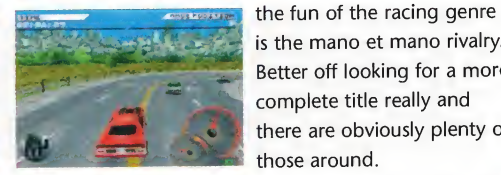

★☆☆ Test Drive Off Road

Limited but quite enjoyable 4X4 racer giving you the chance to drive Land Rovers at high speed.

★☆☆ Test Drive 4

Well done boys. Creating a racing game with no two player option. It's a fair one player game, but most of the fun of the racing genre is the mano et mano rivalry. Better off looking for a more complete title really and there are obviously plenty of those around.

★☆☆ Test Drive 4x4

This 4-wheeled waste of time is as dull as the dirt tracks you race on. Drop this in the mud and stamp on it repeatedly until the disc cracks. Then set fire to it to be on the safe side. You don't want any kids picking it up and trying to play it. It's dangerously crap.

★☆☆ Test Drive 5

Looks good, plays well, but lurks in the shadows of Gran Turismo, TOCA and the like.

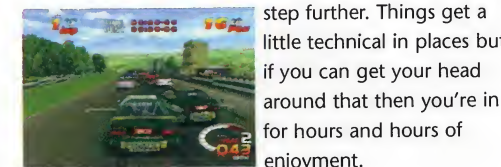

★☆☆ TOCA Touring Car

A fantastic Touring Car simulation which is up there with the V-Rallys and Total Drivin's of this world.

★☆☆ TOCA 2

Simulations don't get much better than this. The original TOCA was excellent but this takes everything a step further. Things get a little technical in places but if you can get your head around that then you're in for hours and hours of enjoyment.

Tokyo Highway Battle

A wanky Rage Racer style game. Build your car to improve your racing performance. Except don't bother.

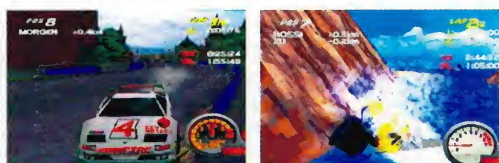

Tommi Makinen Rally

How can a game that looks so good turn out to be such utter shite? A truly awful attempt at a rally sim.

Total Drivin

Earlier effort from the makers of the excellent Max Power Racing. Great arcade action once again

V Rally

Great rally sim. Over 40 tracks to race on and loads of cars and options. Well worth your twenty.

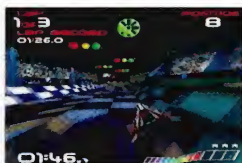

V Rally 2

Better than Colin McRae and featuring a ream four-player mode. Fancy making some skidmarks? Get this!

WipEout

Not many games feature soundtracks that sell like viagra coated chocolate. Couple the top sonics with high speed graphics that will make you sea sick, and you get a classic game that made the PlayStation's infancy so exciting. Feel the G Force, baby. Mmm...

WipEout 2097

Just as addictive as its predecessor but with enhanced gameplay and top tunes aplenty. Have a look.

Wip3out

The finest future racer just got better. Well, it got multiplayer options and tidier tracks. Superb!

Wreckin' Crew

Dismal driving battle game that looks as bad as it plays. It took years to come out after a barrel full of delays. Makes you wonder what the programmers spent their time doing. Certainly wasn't spent making the game any better. A disappointment.

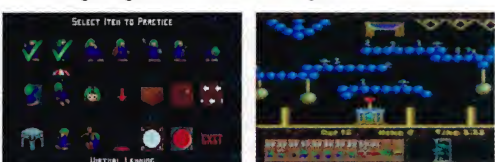

360

A water based WipEout wanna be that fails to deliver on all counts. A shoddy release that should be avoided.

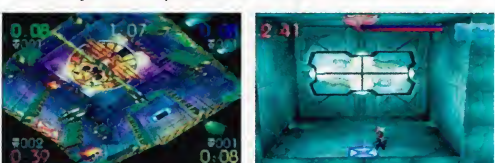

3D Lemmings

An updated and special 3D addition to the ongoing Lemmings saga. Still old hat though.

Blast Chamber

Confusing future-set puzzling sport. Quirky as hell and not everyone's cup of wierdness.

Bust A Move 2

Bub and Bob from Bubble Bobble make a return to their bubble bustin' and jewel releasing puzzle action. A good game for showing the little lady that PlayStations aren't just about watching Lara's arse while punching your buttons. Well, not all the time.

Bust A Move 3

Quality effort that will keep the girlfriend occupied for many a night while you're down the pub getting hammered. The downside is that you'll never be able to use your PlayStation again, cos you won't get her off it again. So you'll have to dump her!

Bust-A-Move 4

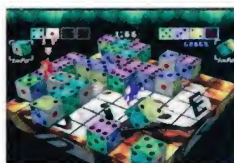

The finest puzzle game under the sun. It's popular with the ladies too, so show it of for a guaranteed shag!

But for us blokes this top puzzler is as about alluring as a repeated kick in the nads, and this puzzle-fest is guaranteed to screw with your head.

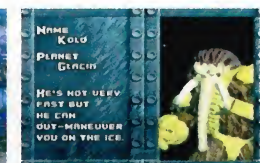

Devil Dice

Another interesting idea that looks suspiciously good on screen but actually turns out to be mostly irritating.

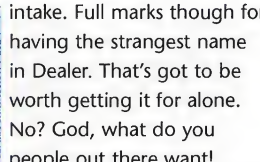

Grid Run

Fast paced chases around a floating grid. Good fun in small doses. Very, very small doses. Miniscule in fact.

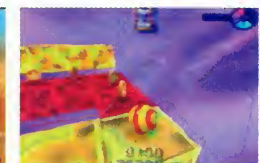

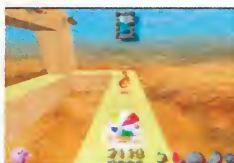

Hebereke's Popoitto

Wacky Japanese type thing which owes plenty to Tetris and even more to the game's developers LSD intake. Full marks though for having the strangest name in Dealer. That's got to be worth getting it for alone. No? God, what do you people out there want!

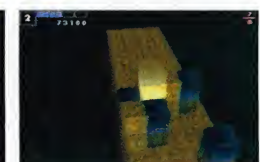

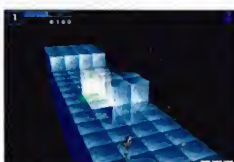

Kula World

Perplexing, frustrating, but enjoyable stuff featuring a pill popping beach ball. Of all things.

Kurushi: Intelligent Cube

Bizarre puzzler in which you capture cubes as they roll towards you. Frustrating, but then that's the point.

Lost Vikings 2

Control a posse of comedy Norse men who are lost. An old idea, but one that's been well executed.

Oddworld: Abe's Oddysee

An excellent puzzle game. Quirky, fun and more than a little perplexing. A truly original game designed by

highly original minds. Help the main guy, Abe, save his people and make him fart in comedy fashion. The chicks love it too. Get in there, Captain Trousers!

Puchi Carat

Bust-A-Move has a fling with the bat and ball classic Arkanoid and produces this neat puzzle-baller. Tasty.

Sports Car GT

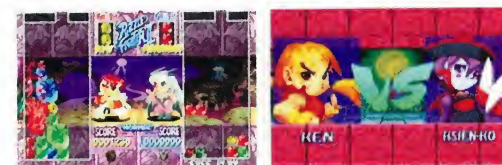

Handling that's slacker than a 2-bit whore and clumsier than a Hooch fuelled school girl. In a word crap

Good graphics, but the gameplay, sound, cars, tracks, handling and control - well, all of it - are all on the shitty side of barely manageable.

Super Puzzle Fighter Turbo

A bizarre Street Fighter/Tetris combination which will zap your social life into extinction within minutes.

Final Fantasy VII

The biggest game ever! Three whole CD's full of sumptuous graphics and sleazy music. Takes about 100 hours to complete but it's certainly time well spent. Your girlfriend will have to learn to cope with your long periods of sustained absence. Buy her a vibe.

Swing

A puzzle game for people who do the Time's crossword to relax. Ugly, tricky and boring.

YoYo's Puzzle Park

A brightly coloured pain in the arse that shouldn't even be inflicted on criminals. Burn every copy!

Don't be fooled by the cutesy guise, the game is purest evil. Countless levels of very similar levels to wiggle around and slightly different enemies to kill.

Breath Of Fire 3

Dated by today's standards. You may have played earlier incarnations of this on the Super Nintendo.

Well things haven't come on that much in all honesty and if you need an RPG with stunning graphics and real lasting appeal, then go for Final Fantasy VII instead

Diablo

EA convert their successful PC slash 'em-up cum RPG very successfully onto the console format. Most of the

games are designed to be played with a mouse but the developers have managed to get all the main functions onto the joy pad with no fuss. Treat, as they say.

King's Field

Standard and graphically basic role playing romp from Sony HQ. The whole thing plays quite well though.

Suikoden

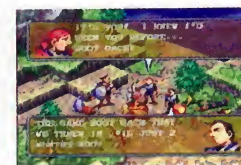

This one has the dubious pleasure of being the first true role playing games on the PlayStation.

The game's drabness drags, what was a bad game, to the levels of a really bad one. With FF8 on it's way, this can happily be avoided with confidence.

Vandal Hearts

Magic, action, strategy and fighting. It's a corker that's for sure and was probably the best in the genre until

Final Fantasy VII arrived on this Earth. Even now if you've had enough of Square's brilliant offering this could well tide you over for a little while.

Wild Arms

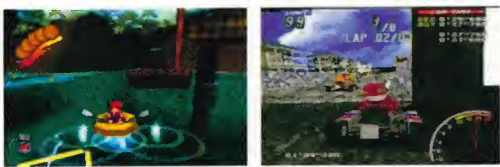

This Wild West themed RPG may be pretty mediocre, but it has some nice touches and at least it's original.

£ Ape Escape

☆☆☆☆

Fantastic free-roaming platformer where you nab apes in a big net. It'll only run with a Dual Shock though.

£ Asterix

☆☆

A crappy Gallic affair that owes a lot to Risk. Sub-standard arcadey sections do nothing to help this cack.

£ Bugs Bunny: Lost in Time

☆☆

An inoffensive/bland platformer featuring that rabbit. Get it cheap or forget about it and get Ape Escape.

£ Captain Blasto

☆☆

Basic platform action that amuses and entertains without excelling at either. Kind of polygonal in its own little way, and sort of quirky if you want to know the truth, but if it's truth you're after then try this on: Captain Blasto is a game played by chimps.

£ Casper

☆☆

The cute and friendly ghost's PlayStation debut is a total bunch of utter utter ARSE! With no redeeming features and gameplay that would bore a corpse, Casper is one spook that is in need of an encounter with the GhostBusters. Who ya gonna call?

£ Castlevania

☆☆

If your looking for a platform game that combines an awe inspiring story, dreamy graphics and state of the art sound, AVOID THIS LIKE THE PLAGUE. It's a total waste of, what was, a totally acceptable idea that's just gone to hell. Stay there, you crap game you!

£ Cheesy

☆☆

I know, let's make a game and give it an ironic title like "crap game" or something. Trouble with this one is that behind the self depreciating title lies a game that actually lives up to the name. Cheesy by name, utter shite by nature. Smells like rotten Brie.

£ Crash Bandicoot

☆☆☆

Classic platforming action. Not quite tough enough for the hardcore but there's loads of good stuff here.

£ Crash Bandicoot 2

☆☆☆☆

A massive improvement on the original with more variation than its predecessor. A winner.

£ Croc

☆☆

A Mario clone for the PlayStation was the aim for Croc, and it wasn't a bad attempt. A cuddly character in an original game with its share of playability thrown in. Not a bad buy if you can pick it up cheap but at full price there are better efforts on offer these days.

£ Croc 2

☆☆

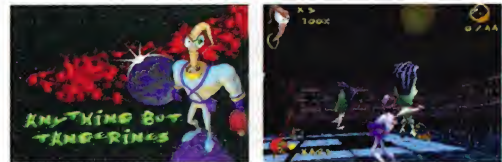

A cute game that's too tough for kids, too bland for hardend gamers who would prefer Ape Escape.

£ Earthworm Jim 2

☆☆

An unimpressive update of a 16bit platform hero. Dated on release and absolute dirt now.

£ Gex

☆☆

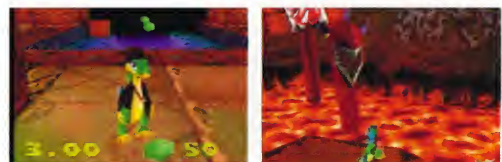

Another effort which is worth a butchers' if it happens to be going cheap. A throwback to the PlayStation's early days when graphics like these gave everyone a stiffy, Gex is in need of a facelift (he got one - see below) but still provides limited fun for a while.

£ Gex: Enter the Gecko

☆☆☆

3D action and a number of all-round improvements. Still needs thinking about for over 30 quid though.

£ Gex: Deep Cover Gecko

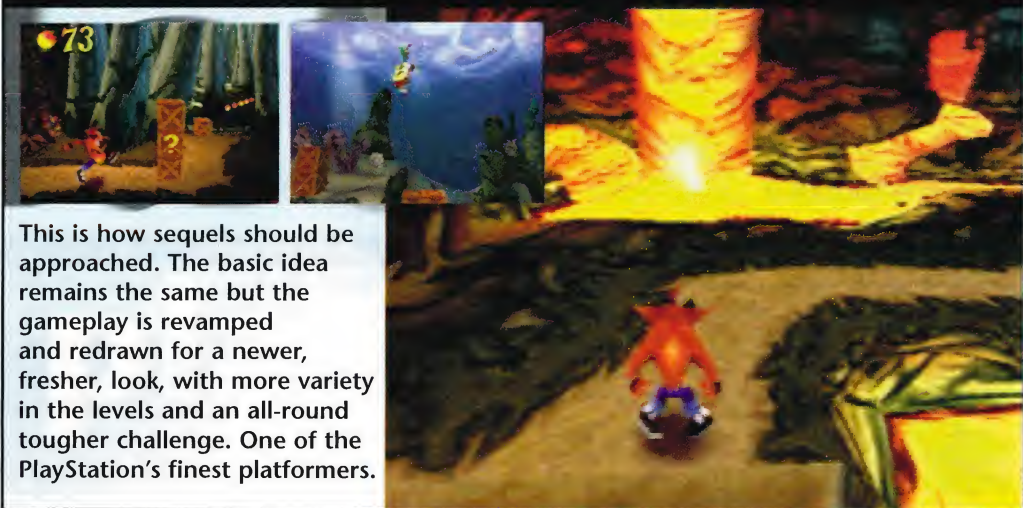

☆☆☆☆

He's lean, green and back on the PlayStation scene in this stunning sequel. With more costume changes than Mr Ben on speed and an one-line library to rival Bruce Campbell's. Gex is deeper into his bizarre but beautiful 3D world than ever before.

£ Crash Bandicoot 3

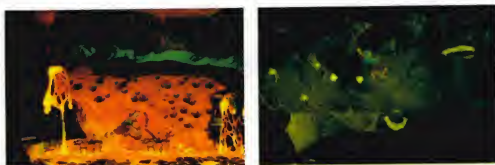

☆☆☆☆

This is how sequels should be approached. The basic idea remains the same but the gameplay is revamped and redrawn for a newer, fresher, look, with more variety in the levels and an all-round tougher challenge. One of the PlayStation's finest platformers.

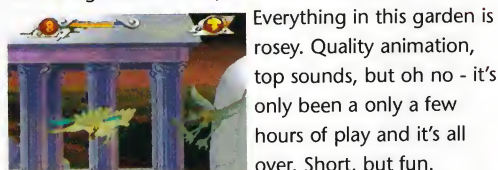

€ Heart Of Darkness ☆☆☆

Great animation, great graphics... even a plot! A very decent effort for the discerning platform gentleman.

€ Hercules platinum ☆☆☆

All the fun of Disney's re-re-writing of the famous Greek legend in a fine platform based caper.

Everything in this garden is rosey. Quality animation, top sounds, but oh no - it's only been a only a few hours of play and it's all over. Short, but fun.

€ Jersey Devil ☆☆☆

Tricky control in a very good game which still plays well today. In the top 10 platformers.

€ Johnny Bazookatone ☆☆☆

Another title that's destined to rot at the bottom of a bargain bucket. You can spot these ones a mile off as even their names make you want to double over and puke 'till you see stars. When will these developers stop wasting our time?

€ Jumping Flash ☆☆☆

This well average platformer has nothing to do with ropey Whoopi Goldberg movies or Rolling Stones Lyrics. Shame really, as it needs some slice of insanity to take it from the realms of mediocre. Easy to complete yet friendly. Inoffensive bargain fodder.

€ Jumping Flash 2 ☆☆☆

A sequel that was eagerly anticipated by no one except Whoopi Goldberg, who though her ropey movie was about to be given the sequel treatment and a PlayStation tie in. Sorry Whoopi, this is just a slight improvement on the original game.

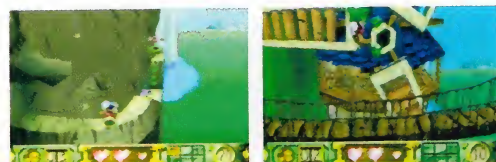

Kingsley ☆☆☆

Kids Fox adventure that'll make hippies shut up, pick up a shotgun and go hunting the little bastards. Crap.

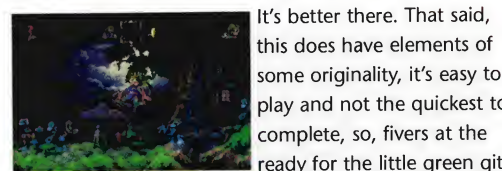

€ Klonoa ☆☆☆

A real surreal Japanese deal with an airborne floppy eared feline. The scary will revel in it.

€ Lomax In Lemmingland ☆☆☆

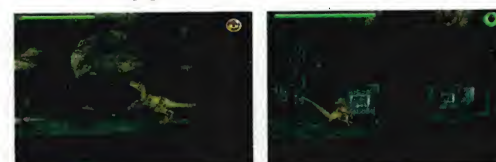

He'd have been better off visiting somewhere else, Lomax Crash Bandicoot Land, for example.

It's better there. That said, this does have elements of some originality, it's easy to play and not the quickest to complete, so, fivers at the ready for the little green git.

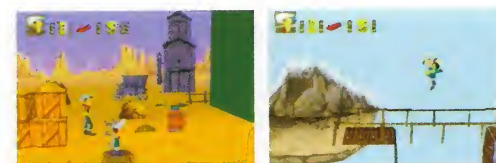

€ Jurassic Park: Lost World ☆☆☆

Never heavy on plot, JP:LW could have made up for it with stunning gameplay, but missed the boat.

€ Lucky Luke ☆☆☆

Aimed at kids, they told us. What, kids who like shit stuff? we asked. They never responded.

€ Mega Man X3 ☆☆☆

For some reason, that we will never know, crap games seem to be the horniest and most fertile genres out there. The Mega man series just goes to show you what a dirty slut the original game was. Someone please show this crap to the family planning clinic.

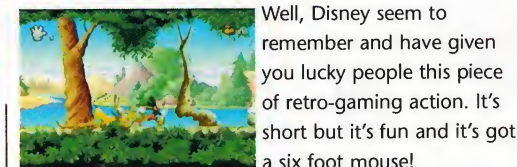

€ Megaman 8 ☆☆☆

See any similarities between this screenshot and the one above? Suspicious? Do be, it's no better.

€ Mickey Mania platinum ☆☆☆

Remember the days when every game license was converted into a platform game, no matter what?

Well, Disney seem to remember and have given you lucky people this piece of retro-gaming action. It's short but it's fun and it's got a six foot mouse!

€ Oddworld: Abe's Exoddus ☆☆☆

The Gimp with the gift of the gab returned with more vocals to continue his puzzle solving frolics in this superb adventure, platform, puzzle or whatever the bloody hell it was. Great fun and a real challenge but be warned, it ain't easy and it ain't always fair.

€ Pandemonium ☆☆☆

A 2D platformer made to look all 3D. Not bad, but there are those which do this for real.

€ Pandemonium 2 ☆☆☆

A 3D platform game that's "on rails" but offers enough fun and frolics to keep even the grumpiest person happy. That is until you complete it while your waiting for an egg to boil. Nice game. Nice characters but the life expectancy of a sickly Mayfly.

€ Psybadek ☆☆☆

An unusual and psychedelic take on the platform genre, this funky funster is sadly marred by repetitive levels and fiddly controls. One of those games which looks great when someone's playing it in the shop, but really needs a sequel to sort it all out.

€ Rayman ☆☆☆

The French and limbless character will soon have his sequel and TV series. The original game offers some good and honest, no frills fun that will entertain those of you desperate to control a French and limbless cartoon character. You know who you are!

€ Rascal ☆☆☆

Like we said, you could do a lot worse, and this is a lot worse. Good looking, but absolutely no gameplay.

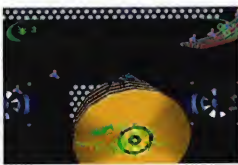

€ Skull Monkeys ☆☆☆

Awesome graphics but lacking in lasting appeal. One of the "best of the rest" if you know what we mean.

€ Spider ★

Incey Wincey Spider, coming down the spout, Incey Wincey Spider began to scream and shout. He shouted

with frustration that in his platform game, the graphics were abysmal and the gameplay was so lame. Like most spiders, this is best flushed down the bog.

€ Spot Goes To Hollywood ★

Another example of 16bit characters failing to make the transition into 32bit gaming.

€ Trash It ★

Go crazy with a hammer and smash stuff to pieces. Sounds like a dream, but can you see yourself still

doing it in two or three weeks time? You can? Well then you're definitely a nasty bastard and deserve to play such a boring (if original) game as this.

€ Tombi ★★

Part puzzle with a spot of RPG thrown in for good measure. Put it on your list of must-buys at no. 108.

€ Wild 9 ★★

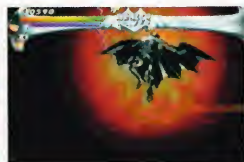

The world's first torture'em-up provides for many a laugh, plodding through this platform game using

your 'victims' to aid your quest. Falls down in the long run with its lack of lasting appeal, but those inclined to pilfer could do worse than lift this.

€ Batman Forever ★

Appaling dog's-mess of a game. The average human would be better served eating their own arse.

€ Battle Arena Toshinden ★★

An early PlayStation beat'em-up that was good, but has been overtaken by the likes of Tekken 3 and

SoulBlade. Tekken 2 and SoulBlade are available on Platinum so it's hard to recommend this anymore. Good fighting fun in its time though.

€ Battle Arena Toshinden 2 ★★

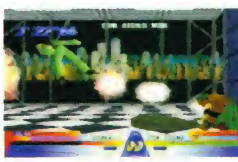

By release number three, this series was beginning to really show it's age. When you compare this one to

the Tekken stable, there is no contest whatsoever. The graphics look dated and the controls are now a complete joke. Best let this one wander of and die really.

€ Battle Arena Toshinden 3 ★★

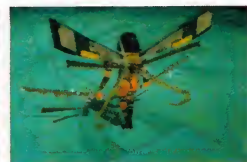

More magic scrapping action in the same vain as the other two. The series was struggling by this time as

Tekken had been accepted as the number one beat'em-up, and something special was needed to get back the balance of power. This wasn't it, but it's still good.

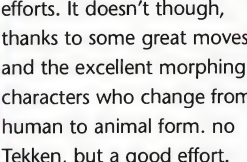

Bio F.R.E.A.K.S ★

Mutant fighting. Sounds good. Could've been a winner, but in the end, midget wrestling is better.

Bloody Roar ★★

A good looking beat'em-up which could easily have fallen by the wayside as one of the many average efforts. It doesn't though, thanks to some great moves and the excellent morphing characters who change from human to animal form. no Tekken, but a good effort.

Bushido Blade ★★

Handy for those bereft of patience. Big twatters of swords mean the best special move wins.

Cardinal Syn ★★

Unusual game from Sony with some odd characters and interesting scenarios. Lacking in adrenaline.

€ Criticom ★

That old chestnut about the game with good graphics and piss poor gameplay has never rung more true

than with this piece of stale wank. If you're one of those sad people that likes things this way, then by all means buy this game. But if you do you're certifiable.

€ Tekken 3 ★★

A corker and no mistake, matey. Tekken 3 is the ultimate fighting game on the PlayStation and it's doubtful it'll be beaten. As close to an arcade fighting game as you could ever want. Every PSX owner should have one tucked away somewhere.

€ Dark Stalkers 3 ★★

Street Fighter gets all gothic in this fun spook-em-up that amuses and frustrates in equal measure. A rental.

€ Dead Or Alive ★★

Fast, frantic and sexy as phook. And the birds' tits wobble like mad! Gaming heaven.

Medal Of Honour

Destrega

Run around an arena, check a firebolt - move in and kill. A really stoopid fighting game that's really bad.

Darkstalkers

It's not like Capcom to use the Street Fighter engine for virtually every other game they produce is it?

This 2D exhibit is quite enjoyable in short bursts but really has been eclipsed by recent offerings. There are far better fights to be had in the school yard!

Fighting Force

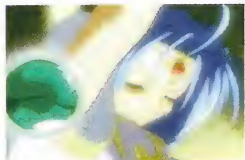

Tries to mix adventure with fighting but turns up like Monica Lewinsky - a bit dull and far too easy

Evil Zone

Suprisingly good beat'em-up. Suprising because the Manga action is controlled with one button. Rent it.

Dynasty Warriors

If you fancy a trek back in time to ancient Japan then this average kick-about fits the bill. On the other hand

if you don't then it most certainly doesn't. A word of warning too - it's bloody difficult to play and you'll get your arse kicked time and time again.

Iron & Blood

Where do they get the names from? The medieval setting makes a nice change but the game is average.

The Crow: City Of Angels

If he wasn't already dead, Brandon Lee would be slitting his wrists at the sight of this toss.

Fantastic Four

The most ill advised title of all time. Fantastic it most certainly is not. In fact, replace the word Fantastic with any random expletive and you'll find yourself much nearer the mark. Rubbish that should be avoided more than a prostitute with leprosy.

Iron Man

Show us a good comic character turned into a good game and we'll show you the Holy Grail. This is among the worst fighting games ever released and whoever believed that this was acceptable must have forgotten to take his tablets. Absolute arse.

The BIG Picture

€ Killer Instinct: Arena Fighters ☆

Highly anticipated and highly disappointing kick boxing sim that failed miserably from the word go. It

now looks dated, and as it was no looker originally it is the equivalent of a hairy old Greek lady. Best avoided if you know what's good for you. And we think you do.

Legend ☆☆☆

Novelty slash 'em up in the mould of eighties' classic Golden Axe. Only worth a look if you're going to

play in multi-player mode. The single player game will bore you senseless and if you're an only child you're better advised to steer well clear. Good post-pub fodder

Marvel Super Heroes ☆☆☆

What more can you want from a game than the chance to pit SpiderMan against Wolverine and find

out who will win. The main let down in the game is the use of the ancient Street Fighter engine. Still, it does have Marvel Super Heroes. Excelsior!

€ Marvel Vs Street Fighter ☆☆☆

Not exactly a Street Fighter classic, but a rumble fest supreme if comic book heroes and hectic hand action's

your bag. It's far better than most of the rehashed SF shite, but let's be honest, would anyone in their right mind really swap Tekken for this?

Mortal Kombat 3 ☆☆☆

These games rocked the world a few years ago, but video games have a habit of aging quickly and this

one is no exception. With the domination of 3D fighting, it's hard to see a place for this old timer. Plenty of blood and gore though.

Mortal Kombat Mythologies ☆

Take the worst part of the Mortal Kombat games and mix well with the shoddiest idea for an RPG, leave

to fester 'till the mixture takes on a brown, crinkley and odorous form. Leave the mixture on a pavement and make local dogs believe that a new bitch is in town.

€ Mortal Kombat Trilogy ☆

The original three arcade smashes rolled into one tiresome collection. They're all the same though.

€ Mortal Kombat 4 ☆☆☆

Mortal Kombat finally gets a game worth playing as it enters the 3D era. It still struggles to keep up with its rival beat 'em ups but it is at least a noble effort that puts up more of a scrap than its less illustrious predecessors. Worth a look for fight fans.

€ Pocket Fighter ☆☆☆

A cracking little game that's great fun. See tiny characters beat seven shades out of each other

using a variety of secret weapons pulled out from huge pockets. Street Fighter engine again, but oodles of novelty make this a good bet to buy.

€ Psychic Force ★

If this was good it might be worth buying, but as it's not then don't go near the little blighter. Rubbish.

€ Rise 2: Resurrection ★

Vastly over-rated robot fighting game that was the follow up to another vastly over-rated robot fighting game. There was certainly no learning curve on display as far as the programmers were concerned. You lot cottoned on though and didn't buy it thankfully.

€ Rival Schools: United By Fate ★★★★★

Schoolies' knickers on show in virtually every fight. Does it get any better than this? Capcom unleashed this ridiculously named game and won over our hearts cause it really was smart. Well worth adding to your cupboard if only for the gusset abundance.

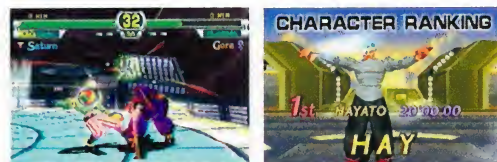

€ Soul Blade ★★★★★

A £20 game that simply everybody must own. One of the best fighting games to be released on any format.

€ Star Gladiator ★★★★★

Another early attempt that did very well for itself with its sci-fi game. Out of this world (sorry!)

€ Star Wars: Masters of Teras Kasi ★★★★★

Similar to Soul Blade but with the likes of Luke Skywalker and Darth Vader to play with. Very cool.

€ Street Fighter Alpha 2 ★★★★★

Oh, God. Will they ever stop doing this? Who exactly owns a Street Fighter game and needs more identical stuff to play with? Stupid and rich people that's who, and they should all be shot - or taxed heavily. If you want a SF game just pick any at random.

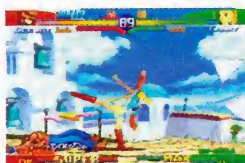

JAPANESE CHART

€ Street Fighter Alpha 3 ★★★★★

Same old same old, as they say. More dreary geriatric Capconian jizz, and it's the stale smelly kind too!

Can someone please put an end to these in-bred Nintendo offspring please. There just ain't enough rumble juice to go around the playground anymore.

€ Street Fighter Collection ★★★★★

This does exactly what it says on the tin. Three Street Fighter games in one simple bundle. They're all the same underneath but you do get a variety of characters and special moves for your money. If you love Street Fighter then you can't go far wrong.

€ Street Fighter Collection 2 ★★★★★

The coffin dodger supreme, still doing the rounds. Worse than an aggressive anal wart infection.

€ Street Fighter EX Plus Alpha ★★★★★

Funny that Capcom realised that the Street Fighter series needed to pack it's bags and head for 3D territory and then decided to go back to 2D. Fools. This fleshed out SF'er showed how good the series could get if only they would carry it through.

€ Street Fighter: The Movie ★★★★★

Street Fighter: The piss take more like. What is going on? Game is turned into crap movie and then crap movie gets shunted back into crap game! Is it just me or is this the stupidest thing that the world has ever seen? Anyone who buys this should be bayoneted.

€ Tekken ★★★★★

Now we're talking fighting games. Forget your Street Fighters and your Toshindens and get this.

Tekken 2 is out on Platinum too, so you'd really be better of getting that. If it's bargain bucket toss up time, then this wins over all but the other Tekkens.

€ Tekken 2 ★★★★★

Even better than the above. Sony get ever closer to the perfect fighting game and it's gone Platinum too!

€ Total No.1 ★★★★★

An old and crusty fighting game that came out at the same time as Toshinden (you remember, there was an ice age.) It can't really cope with the current climate of hot beat-em-ups and really should just shrivel up and die with grace. Good for a museum piece.

€ Wargods ★★★★★

If Wargods was a bird you couldn't go wrong with it. Nice to look at with phook all depth. Unfortunately it isn't, so what we're left with is an empty-headed game that you've paid 40 quid for, and it won't even give you a wank! Get down King's Cross instead...

€ Yusha ★★★★★

If being totally off your mad assed tits was something that regarded as "good" then this offering from the "bad in the head" Japs would be a classic. Of course weird does not equal reamness, as Yusha proves. Yes, it's weird as a hat stand, but, Jeezus is it shite. Run Away!

€ Vs ★★★★★

The ideal game for all aspiring gangsta rappers, with vicious scrapping on the streets of Los Angeles. Now all that's needed is a spot of Ice Cube and we're fully sorted. Unfortunately, the Uzi's and "shanks" are missing and it's all a trifle average, homes.

Ⓢ X Men: Children Of The Atom ☆☆☆

Standard 2D fighter from the 2D fighter masters. Worth a peek only if you own ALL the Street Fighters.

Ⓢ X Men Vs Street Fighter ☆☆☆

Triple X Men more like. You've a right to expect better than this half-arsed piffle.

Ⓢ Zero Divide ☆☆☆

A ten tonne robot death machine is never going to be as agile as Bruce Lee so it's no surprise that this droid fighter is a bit on the cumbersome side. Who wants to play characters like these? People who like their games on the average side, that's who.

Ⓢ Zero Divide 2 ☆☆☆

And the same could be said for this. The graphics in both games are the high point, although there is a good game in here struggling to get out. Maybe it'll make it if a second sequel arrives, but for now it's best left alone. Ne pas toucher, as the French say.

flight flight sims

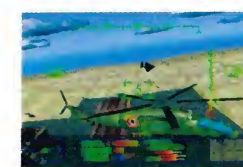

Ⓢ Ace Combat 2 ☆☆☆

Uncomplicated flight-sim type of blaster for those who want their gunplay that bit more realistic.

Ⓢ Agile Warrior ☆☆☆

A vaguely involving fly'em-around'em-up which runs at a very reasonable speed even when the screen is full. Helped by a straightforward control method, it's fun for a few hours but tedium rears its head before the money's out of your Switch account.

Ⓢ Air Combat ☆☆☆

So-so flight sim from the PlayStation's early days. Bit of a contender due to the wallet-friendly price tag.

Ⓢ Black Dawn ☆☆☆

A black dawn eh? That's called night time isn't it. Anyway, this is actually the sequel to Agile warrior and has much more on than it's original incarnation. A fair excuse to take to the skies and shoot up innocent villagers. Why, it's just like being back in 'Nam. I guess.

Ⓢ Firestorm: Thunderhawk 2 ☆☆☆

It's big, it's hard and it needs to be plunged into battle as often as possible. All the fun of controlling a big vibrating chopper and non of the health risks. The second most fun time you can have with a big thundering nob. I mean chopper. Doh!

Ⓢ Gunship ☆☆☆

If you want to take an Apache AH-64 to the skies and have plenty of controls to master, then you will be in overly technical geek heaven with this one. Good to play while listening to Wagner and crying "I love the smell of napalm in the morning". For furtive joystick fiddlers only.

Ⓢ Raging Skies ☆☆☆

Or to give it its full title, Not Overly Full Never Mind Bloody Raging Skies. Ho, ho, no, but really readers, that isn't the name of the game, but it would be more accurate if it was. Anyway, bloody traffic wardens eh? They're everywhere. My mother-in-law is so fat...

Ⓢ RC Stuntcopter ☆☆☆

A Radio controlled helicopter simulator that is as tricky as the real thing. Stick with it and reap the rewards!

Ⓢ Strikepoint ☆☆☆

Another game that makes no real mistake other than being really dull. There are bigger, better and more interesting fly-em-ups out there, so only pick this one up if you find it lost somewhere. It has no real place in your game collection, so best leave it.

Ⓢ Top Gun: Fire At Will ☆☆☆

Thank you. We choose to fire now and we choose to fire at you, programmers, for littering the planet with such crap. Like Strikepoint above, does nothing to offend apart from offer sack-all in the way of anything remotely new or innovative. Utterly mediocre!

Ⓢ Warhawk ☆☆☆

An early whirlybird simulation who's basic graphics badly let down a fair game. The games one saving grace is the fact that the missions are well designed and you find yourself needing to finish them. Available for a tenner in bargain box. Somewhere.

Ⓢ Wing Commander 3 ☆☆☆

Look at these screenshots. Don't they look great? That's because they're FMV. Space dogfighting your bag is it? - then you might dredge a morsel of enjoyment from this effort. But be warned, it doesn't look good and it doesn't play well.

Ⓢ Tomb Raider 2 ☆☆☆

Run, jump, fire, hang, say "Ooh!" when you bump into things. Better than the first in every way and one of the few genuine must-have additions to everyone's game collection. A larger game with less puzzling and more shooting action than the first. Top stuff!

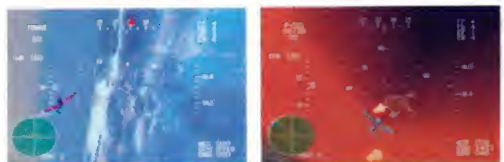

Wing Commander 4

Another Mark Hammill pay day and another tale of style over substance. Pants, with a capital shite.

Wing Over

Not an aircraft shagging simulation but a quirky aerobatics game. Pick it up cheap and you're away.

Wing Over 2

EJECT! EJECT! This game is on a collision course with downtown Shitesville. Oh, The humanity!

adventure

Alone In The Dark

One of the original PlayStation adventure games which takes the player into a haunted house scenario and provides it's fair share of mild shocks and light thrills. Cumbersome control and a now dated look haven't taken all the polish off this old girl. But they've tried.

Akuji The Heartless

Strange voodoo dealings sound promising but in fact form part of an average effort. Wait for price to drop.

Atlantis

As interesting an adventure as tackling the perils of your gran's knicker drawer. Smells the same too.

Ark Of Time

Ark of Shite would have been more appropriate. Bit of a CD-as-coaster scenario on here.

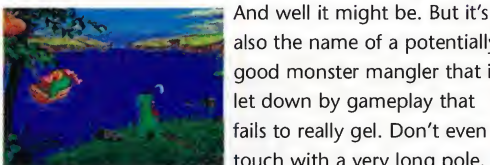

Batman & Robin

Twatman and Bobbins. An obligatory, crap movie tie-in game that the developers. Get the picture?

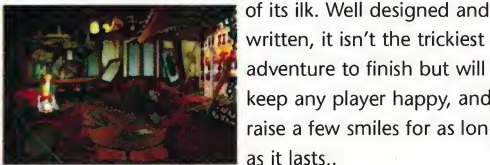

Blazing Dragons

This may sound like the sort of stupid exclamation that Robin (the boy wonder) would squeak at Batman.

Broken Sword

Monty Python humour abounds in this intelligent adventure which set the pace for PlayStation games of its ilk. Well designed and written, it isn't the trickiest adventure to finish but will keep any player happy, and raise a few smiles for as long as it lasts..

Broken Sword 2

Only marginally better than the first, but a different dilemma means renewed gameplay aplenty.

Chronicles Of The Sword

Bit of a pork sword, as it goes. Old hat, nothing new, you'd be mad to shell out for it, etc. etc.

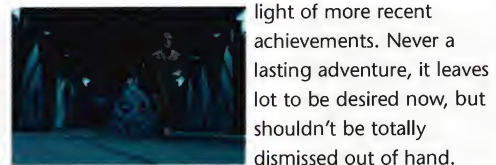

City Of The Lost Children

Basing a videogame adventure on a movie - oh that's new. Except it is when the movie is a French arty flick.

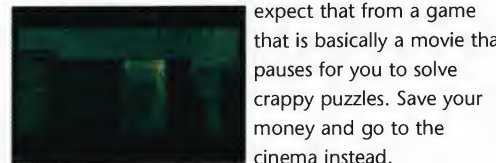

Cyberia

A dreamy looking game when it first appeared, Cyberia's graphical charm has dwindled somewhat in

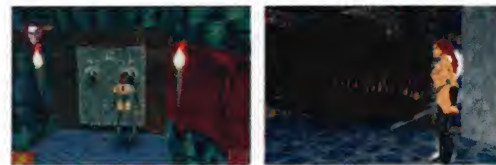

D

Two words that make no sense. Friendly fire. Another two? Interactive Movie. This one looks fair but you

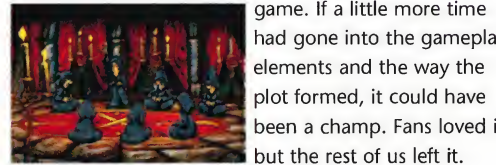

Deathtrap Dungeon

Good, solid adventure featuring a heroine with more outrageous charlies than Lara Croft. Chut-chut-chut.

Discworld

A decent job of taking the essence and humour of the Terry Pratchett books and slipping them into a game. If a little more time had gone into the gameplay elements and the way the plot formed, it could have been a champ. Fans loved it but the rest of us left it.

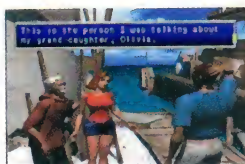

£ Discworld 2 ☆☆☆

And the same applies to this. Far from bad but only the mad-for-Pratchett brigade will mess themselves.

Diver's Dream ☆☆☆

An aquatic nightmare of a game that should have been weighted down and chucked into the sea. The gameplay has a distinct odour of rotting fish hanging about it, a bit like a tomb-raider sub-game without the sub. Hope it sinks without a trace.

£ Excalibur 2255AD ☆☆☆

An interesting and - for the most part - involving adventure with a decent mix of action and puzzles. Despite the different setting though, this is an effort which wants to be Tomb Raider and, naturally, fails. Not a bad buy if you can pick it up cheap though.

£ Hard Edge ☆☆☆

Resident Evil meets Die Hard. Ohh, that sounds good. Well it isn't. It's just a bunch over-manganised shit.

£ Herc's Adventures ☆☆☆

Fun for a very short time, but those who can be bothered will finish it easily. Unless they're spanners.

£ Legacy Of Kain ☆☆☆

Vampire strangeness in this huge and impressive blood sucking adventure. A good buy in anyone's book.

£ Little Big Adventure ☆☆☆

A quirky adventure game lovingly converted from its PC origins that manages to entertain for a short while. But it doesn't really go far enough in any department. The graphics are nothing but run of the mill and the point of the game is easily lost.

£ Medieval ☆☆☆

Ghosts n' Goblins is brought into the 90s in this excellent swashbuckling comedy type thing.

£ Men In Black ☆☆☆

Cacky movie tie in which pseudo sticks to the plot of the film, but you just don't care.

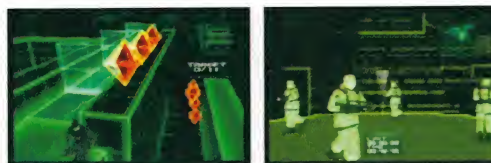

£ Metal Gear Solid ☆☆☆

One of the greatest games ever, playing more like a movie with you as the hero - Solid Snake. Just buy it!

MGS: Special Missions ☆☆☆

More VR training missions like the ones from the full game. It's 20 quid and it's Metal Gear Solid - Lite!

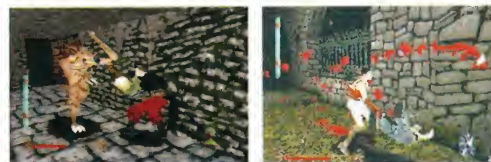

£ Myst ☆☆☆

Judging by the manual, the programmers were well chuffed with this one. This just goes to show how up-their-own-ass some people can be as this must be one of the most pointless, slow and stupidly weird adventure/puzzle games ever. The CD makes a good frizbee.

£ Nightmare Creatures ☆☆☆

Flawed but original and fun effort which'll satisfy your blood lust until you get out of prison.

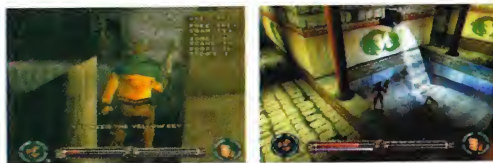

£ Ninja: Shadow Of Darkness ☆☆☆

Simple but effective puzzle elements combine with nice visuals to create an action-packed adventure.

£ ODT ☆☆☆

A poor attempt at creating a challenger to Tomb Raider. Someone'll succeed, sometime...

£ Overblood ☆☆☆

A decent stab at a futuristic adventure, but the experienced gamer will find it piss easy to complete providing he can bear the long periods of tedium when nothing much happens at all. Shame, 'cos the boy had potential, but there you go.

Parasite Eve ☆☆☆

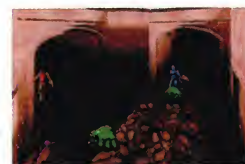

Great Full Motion Video, but hello? where's the game to match? Resident Evil without the good bits.

It's got a dark atmosphere, some of the graphics are good, but it's not enough to cover the poor control system and repetitiveness of the game. Parasitic import.

£ Perfect Weapon ☆☆☆

Didn't score enormously highly because it doesn't have quite enough going for it, but this is one of those

titles which if you make it half way through you'll lose sleep and food until you finish it. Looks great and you get to punch stuff. Christ, it's Naomi Campbell!

£ Pitfall 3D: Beyond The Jungle ☆☆☆

Highly anticipated 32bit revamp of classic game from days of old, when, y'know, monkeys chewed stuff and that. It all worked out rather well as it goes, but since it's based on a concept of jumping over stuff and not much else, it doesn't "go" far enough. Good fun.

£ Psychic Detective ☆☆☆

Ooh, could this game feature a detective that's Psychic? Hardly need to do much detecting if you can read peoples minds do you. "He did it officer, I read his mind." end of game. Shite Interwanktive movie shitefest. Shite-Shite that's heavy on the crap.

£ Reboot: Countdown To Chaos ☆☆☆

Almost a genre of its own. Shooting, running... er, adventuring and what have you. Average and odd.

Resident Evil

Zombies! Gore! Guns! Shooting! Crack! E! Prostitutes! Combine any four of the above and a fantastic game

ensues, and this is the one which broke the mould and set a new standard for others to follow. Slightly limited by today's standards, but a bargain at the price.

Resident Evil 2

Twice the adventure of the first game. Leon and Claire's battle is, shock-horror, a stunning shock-horror

Resident Evil: Directors Cut

Justly falling between RE 1 and 2 for quality, and the chance to get a peek at RE2, which has come out now and therefore makes this version totally obsolete. If you absolutely must own RE1 then this is a better version. Just as scary, but more so.

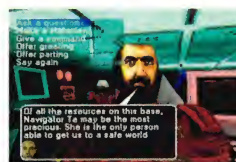

Riven

Not much of an adventure game, but a very striking little collection of moody holiday snaps.

Sentient

In-depth and challenging, but dated and cumbersome to play. Like giant chess with live animals as pieces.

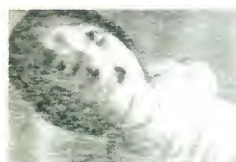

Shadowman

Great ideas, great style, interesting puzzles. Damn, those graphics jutter! Try before you get dissatisfied!

Silent Hill

Buy it and make sure you've got a years supply of incontinence pants. It's scary, Jesus is it scary!

Soul Reaver

Lara meets Vlad The Impaler and has herself a right good time. It's not TR3, but it does have vampires!

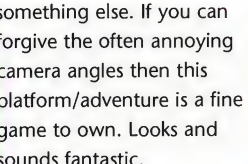

Spawn: The Eternal

Actually considerably better than the film. Just as prison-rape is better than death, just.

Spyro The Dragon

Is he Croc? Is he Crash? Is he Sonic the fer-hucking Hedgehog? He's a bit of everything and a lot of something else. If you can forgive the often annoying camera angles then this platform/adventure is a fine game to own. Looks and sounds fantastic.

Swagman

A spooky cartoon adventure. But then so is Scooby Doo, and it didn't cost 40 quid to watch.

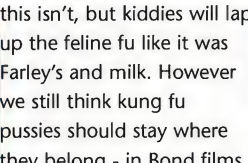

Syphon Filter

A fantastic bullet frenzy action movie of a game that gets your blood lust up while making your brain strain.

Tai Fu

Tony the Tiger quits fighting for Frosties and dishes out some savagery in a brutally boring game. Sugar coated this isn't, but kiddies will lap up the feline fu like it was Farley's and milk. However we still think kung fu pussies should stay where they belong - in Bond films

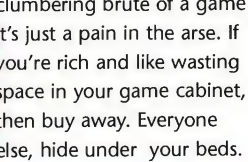

Tenchu

Good stuff this. Stealth, cunning and realism required. It's a bit like shagging your mate's mum.

Time Commando

Going back in time and monkeying about with history may have been fun for Michael J Fox, but for this clumbering brute of a game it's just a pain in the arse. If you're rich and like wasting space in your game cabinet, then buy away. Everyone else, hide under your beds.

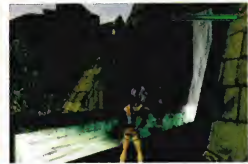

Tomb Raider

The game which launched a thousand magazine covers. And the same amount of pretenders.

Tomb Raider 3

Improved graphics and puzzles so hard they star in pornos. Should have offered more, but still great.

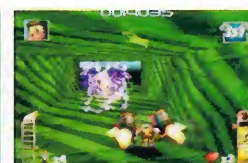

X Files

An "Interactive" movie. This isn't a game, it's a TV episode with puzzle breaks. Boring "adventure."

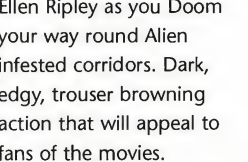

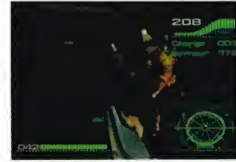

Airnaughts

It's not PlayStation Pilotwings, but anyone looking for an instant buzz will enjoy this. Good for a bargain.

Alien Trilogy platinum

Not in the same league as Die Hard Trilogy in terms of value for money. This one gives you control of Ellen Ripley as you Doom your way round Alien infested corridors. Dark, edgy, trouser browning action that will appeal to fans of the movies.

€ Apocalypse ★★★

Better than expected shooter with annoying in-game comments provided by Bruce Willis himself.

€ Armoured Core ★★★

At first play, this game seems like a robot death machines wet-dream. Impressive sound and graphics that quickly get lost in some very samey level design. Some nice touches though, you can customise your droid up with the money you make. Fair.

€ Area 51 ★★★

No no no no no! A bland conversion of a bland light-gun coin-op. It has nothing on Time Crisis or Die Hard Trilogy so don't even think of buying. It may appeal to tossers who are in to all that Roswell autopsy guff. Why? Who cares, let the geeks waste their money.

€ Assault ★★★

The best elements from classic shoot'em-ups combined with a few fresh ideas to create a fast frag frenzy.

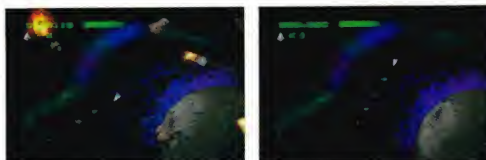

€ Assault Rigs ★★★

This goes to show you how good some of the early PlayStation stuff can look. It's got a great soundtrack and some some nice touches in what effectively is, a Doom clone in a robot suit. Good for its time and a worthy ten quid purchase, but any more.

€ Asteroids ★★★

Plain and simple revamp of the classic arcade blaster. Repetitive, addictive and ultimately limited.

€ Auto Destruct ★★★

A good-looking game in its own empty way, this is something of a conundrum. It'll keep even the most hardened gamer struggling for days on end, but uses the difficulty to make up for the lack of variety. If you're shit hot at games and crave a challenge, try it.

€ B-Movie ★★★

Alien-chasing shoot'em-up with some subtle humour to keep you amused. Tricky to complete.

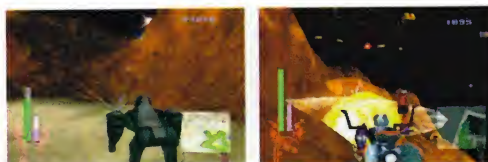

€ Battle Stations ★★★

Battleships for those who can't be bothered getting the board game out of the loft. Resides in Loserville.

€ Beast Wars ★★★

Metallic shooter. Bland graphics and uninspired gameplay. Fancy it do you? Well you would...

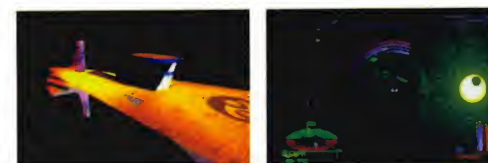

€ Blam! Machinehead ★★★

It sounds like a dull college indie band and plays no better. A 3D shoot-em-up with the occasionally nice graphical touches that's let down by a stupid name, over complex missions and a control system that just isn't nice to use. car boot sale purchase only.

€ Blast Radius ★★★

Star Wars style shoot'em-up that doesn't quite cut the mustard but ain't bad for a quid or two.

€ Brahma Force ★★★

The third Kileak the Blood release is surprisingly absorbing stuff. Got a brain? Get a copy.

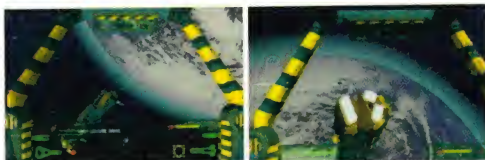

€ Colony Wars ★★★

All the fun of pretending to be Luke Skywalker or Starbuck out of Battlestar galactica. When you master the controls you're given a game that's rewarding and frustrating in equal measure. The multi-ending campaign is a nice touch. Could have done more really...

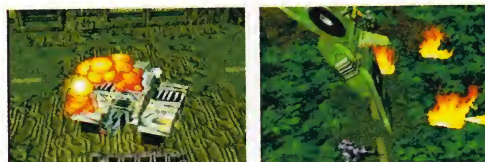

€ Colony Wars: Vengeance ★★★

...and indeed did with this great sequel. Complex missions, frantic action, an all-round winner.

€ Contra: Legacy Of War ★★★

Horizontal scrolling shoot'em-up offering nostalgia at best and tits-all at worst.

€ Critical Depth ★★★

After Tigershark failed to sink the Bismarck, this shot just wide too. The idea is great. The game's crap

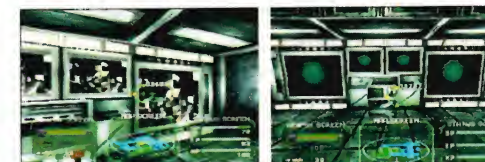

€ Duke Nukem Time To Kill ★★★

Duke fills the hot-pants of Lara Croft in this third-person time-tripping bonanza. Doesn't have the depth or complexity of the Tomb Raider series, but provides a blast-fest alternative for those who put destruction on the top of their list. Crap screenshot, eh?

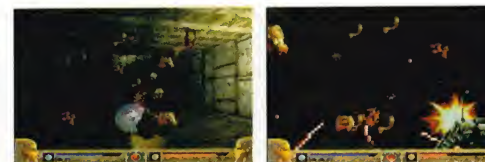

€ Epidemic ★★★

The first sequel to Kileak the blood. It doesn't offer anything new and quickly gets boring.

€ Exhumed ★★★

Flawed Doom clone set in ancient Egypt which musters some of the gameplay elements of its hero.

€ Fade To Black ★★★

A great 3D Arcade adventure shoot'em-up that makes you think with your brain, as well as your trigger finger. The third person perspective has been topped by the likes of Tomb Raider and Duke Nuke'em, but this one has a few in game surprises of it's own. Top.

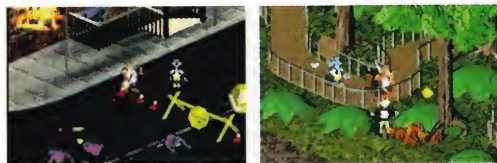

Final Doom

The Doom games are classics and a landmark in gaming technology. This sequel is a goodie but a toughie, it's only fault is that it runs slightly slower than a basic PC version and can only be played two-player with a link-up cable. Worth getting 'till Quake2 debuts.

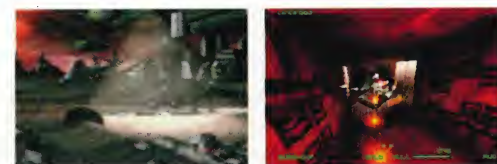

Firo & Klawd

Fancy taking control of a comedy cartoon cat and ape? Step right up. Rather eat Satan's trousers? Stay away.

Forsaken

Cool graphics, loads of action and a decent soundtrack. Not the easiest game to get into though.

Frenzy

Nothing to do with the violent Hitchcock movie, which is a real shame as this cartoony blaster is a complete pile of toss. The fair looking graphics completely fail to beef up this empty feeling game that can be completed by a retarded cow-pat. Not good. Not Good.

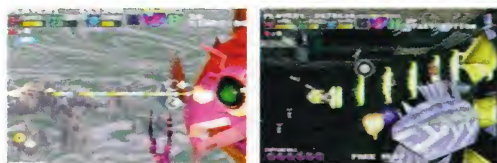

Future Cop: LAPD

To all intents and purposes a continuation of the Strike series (y'know, Urban, Soviet and all that), this took the slightly aged gameplay to a higher level with its impressively dark undertones and atmospheric graphics and sounds. Blimey, that was serious!

G. Darius

Classic arcade-style gameplay and stunning visuals make this highly playable but short-lived.

G-Police

Class futuristic shoot 'em-up. Flying around mega cities and blasting the bad guys - close to top notch.

G-Police 2

Interesting missions and new vehicles fail to make this sequel anything more than a stand alone mission disk.

Galaxian 3

An interesting idea spawned long before the "let's do an old thing, but make it 3D" bandwagon began to roll. The beauty of Galaxian in the arcade though was its simplicity - Space Invaders with bits that fell off. This reworking was a brave idea which fell flat on its arse.

Ghost In The Shell

A comic book inspired game that never quite manages to achieve its aim. Another car boot sale bargain.

Hard Boiled

Based on the cult comic books of Frank Miller, drive a big tooled up Chevy "in the future". Hey, no thanks.

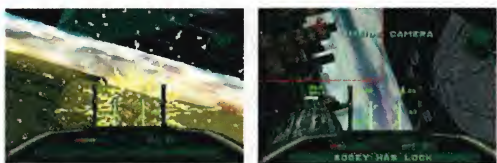

Hexen

Eagerly awaited magical-blaster-cum-gorefest which pleased the Doom crowd when released for the PC.

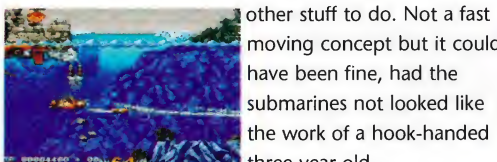

Independence Day

Style over substance in the movie. Crapness over everything else in the game. Utter dog's toss.

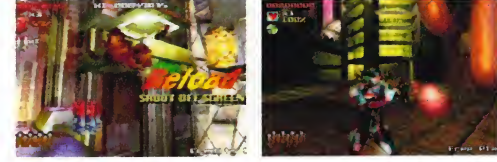

In The Hunt

Underwater submarine-based (well it'd have to be, wouldn't it?) shoot'em-up with enemies to fire at and other stuff to do. Not a fast moving concept but it could have been fine, had the submarines not looked like the work of a hook-handed three year old.

Judge Dredd

Okay shoot 'em-up from Gremlin which has the distinction of making the leap to arcade.

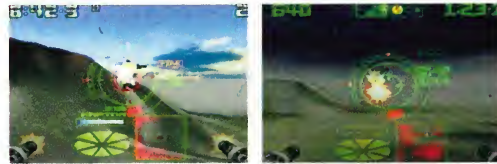

Kileak The Blood

Spawner of sequels and pretenders alike, it paved the way for some great titles but has passed its sell-by.

Krazy Ivan

Enormous robots shooting each other across the Russian steppes. It's not a bad old game for its age.

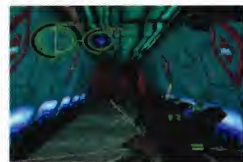

Lethal Enforcers

If filth could be transformed into a game then this is as downright stinky as you could go. Dire graphics are only one part of the problem with LE, since it'd fail to keep the attention of any sane person for more than half an hour. Apart from that it's a real treat!

Lifeforce: Tenka

Games which set their stall out by being very dark have to work a lot harder than others to make it into the ranks of decency. This is an effort that made the grade, with crisp visuals and an effective, eerie type of gameplay which, although now old, still impresses.

Loaded

A fast moving isometric shoot-em-up where you get to control gun totin' freaks. The graphics were done by 2000 AD's Simon Bisley and it features a top sound track by Pop Will Eat Itself. Good two player fun, but let down by our old enemy, repetitiveness.

Lone Soldier

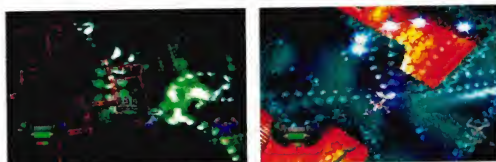

That old arcade classic, Commando is given a 3D treatment. That sounds promising at least.

However, a potentially good idea somehow becomes the worst shoot-em-up in the history of the genre. Games this piss poor aren't even worth burning. Shite.

Machine Hunter

3D effort which borrowed from the 2D Loaded, but fails to recapture the spirit. Worth a few quid.

Maximum Force

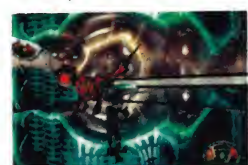

Following the success of the excellent Time Crisis came a wave of titles intent on cashing in. None came

poorer than this disgrace and if you see it in the dirt bucket at your local game retailing emporium, offer them a fiver just to see what we mean. Wank.

MDK

Murder, death, kill is the name of the game and that's exactly what you have to do. The graphics

are excellent and the gameplay is novel. The game is only let down by the constant assault you're put under. Great if you can find it cheap.

Mechwarrior 2

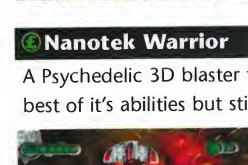

A more arcadey version of the PC classic that gives you the chance to stomp around in a lumbering 'Mech

and blow the shit out of your enemies. It can get quite tough and is an acquired taste. A fun shoot-em-up that can be found at a knocked off price.

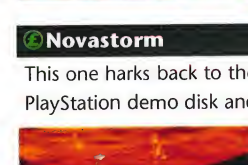

N20

Shame about this one because it has a lot going for it. Wildly coloured backdrops and lightspeed movement through the 3D levels to a reasonable if standard soundtrack, but there's never quite enough going on. Wasted potential. The Stan Collymore of games.

Nanotek Warrior

A Psychedelic 3D blaster that does everything to the best of it's abilities but still fails to attain ultimate reamness. Another one of those games that's worth having if you can find it going cheap, or get given it by a relative for christmas.

Not bad, not that good.

Novastorm

This one harks back to the days of the original PlayStation demo disk and boy, does it show.

It plays like an "into the screen" 3D version of R-type, but with anything that would make it good removed. Times have moved on, so avoid at all costs.

Nuclear Strike

This sequel to Soviet Strike improves slightly on the graphical front and has a few new touches.

Both this and Soviet are fantastic shoot-em-ups but this one just about wins out and makes a worthwhile addition to your collection.

Omega Boost

Fly a robot and shoot up the universe. A simple game thats stunning to look at and plays like a dream.

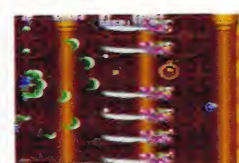

One

Yawn. Another case of great graphics let down by getting really boring, really quickly. The lucky thing is, with a title as "inspired" as this one, the possibility of sequels called One Two and One Two Three is almost too stupid for it to happen. Thank Allah for mercy.

Parodius Deluxe

Nothing to do with ancient Roman hamburgers and a lot to do with conversions of tired coin-op shooters.

There was a time when this sort of game turned heads, but that era is over. This title is just a sad reminder of how we were all so easily pleased once

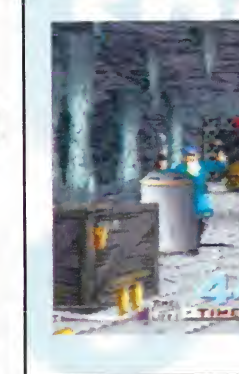

Philosoma

Bright and fast with a lot of variety, which ironically leads to its downfall. Borrowing from just about any old effort you care to mention, Philosoma crams a lot onto the screen and mixes in some decent sound, but it's too much of a mish-mash.

Time Crisis

A fine example of how a lightgun game should be produced. A must-have for all shooter fans.

PO'ed

Your supposed to play a character that's Pissed Off and out to whoop some ass. It's graphically empty and not nearly challenging enough for anyone with even the smallest set of arcade skills. The only PO'ed people will be those who shelled out on this crud.

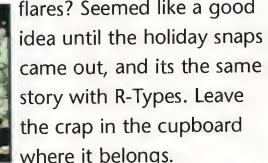

Point Blank 2

A huge ammount of shooting game action that will keep you showing off your skills till the cows go moo!

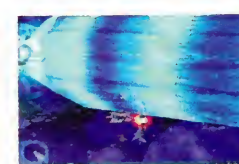

R-Types

Remember in the early 90s, when a reasonable proportion of misguided Mancunians took to wearing flares? Seemed like a good idea until the holiday snaps came out, and its the same story with R-Types. Leave the crap in the cupboard where it belongs.

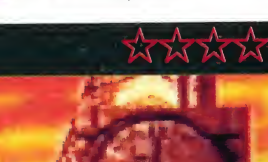

R-Type Delta

A shoot-em-up that's more old skool than a hanger full of Rubicks cubes. Blasting action taken into the 90s

Raiden Project

Just as great graphics can't hide a crappy game, great playability can hide shoddy visuals. This type of all out shooter was all the rage a few years ago. This one has all the ideas that made the genre worthwhile. Take a look if you want to hark back to simpler times.

🕹️ Rapid Reload ☆☆☆

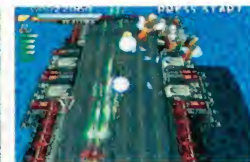

Decent stab at an old style shooter which looks more and more dated with subsequent releases. The effects

are good and the overall level layout makes for an entertaining "romp", but flat scenery and little innovation makes it dull too soon. Nae bad.

🕹️ Raystorm ☆☆☆

A fine but standard shoot'em-up. Doesn't warrant the 40 note price tag though.

🕹️ Reloaded ☆☆☆

The sequel to the gory Loaded which was nowhere near as good as it promised to be. Still enjoyable

🕹️ Revolution X ☆☆☆

An unusual shoot-em-up in an Operation Wolf Style. You have to shoot up the establishment with your

CD chucking machine gun and clear the way for Aerosmith to take over the world. God save us from corporate rock and squitty-arsed games like this.

🕹️ Robotron X ☆☆☆

More arcade revamp-age and another example of why the dinosaurs became extinct. More cheddary than a horse's bell in a heatwave, the highlights are the lumino-scenery and... well let's just stick with highlight, shall we. Bottom of the food chain, this kind of thing.

🕹️ Rogue Trip ☆☆☆

Wish You Were Here meets Twisted Metal, except it's slightly unfair. We've all wanted to twat bejesus out

of crappy holiday reps, but it's the reps who do the damage in this derivative affair. Good idea gone to waste. Rather like asking rep for advice.

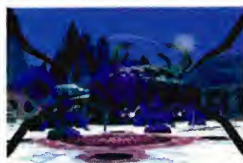

🕹️ Shadow Gunner ☆☆☆

Robot warriors. Killing each other and such stuff. As indeed they have done better many times before.

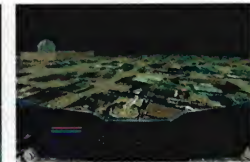

🕹️ Shadow Master ☆☆☆

Great-looking blaster with loads of intelligent action. Get you're brain in gear, this one's for you.

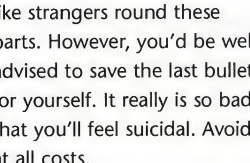

🕹️ Shellshock ☆☆☆

3D tank thang where combat strategy comes into play. Worthy but dark, and dull, dull, dull.

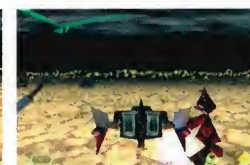

🕹️ Shockwave Assault ☆☆☆

Poor, misunderstood alien bastards attempt to invade the earth and it's your job to show 'em that we don't like strangers round these parts. However, you'd be well advised to save the last bullet for yourself. It really is so bad that you'll feel suicidal. Avoid, at all costs.

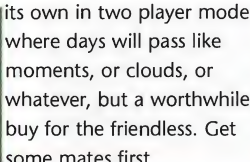

🕹️ Slamscape ☆☆☆

One of the poorest futuristic shooters ever created. Unless you know different, Marty McFly..

🕹️ Small Soldiers ☆☆☆

The game of the surprise hit film. Mini soldiers causing major mayhem in a well presented game. Comes into its own in two player mode where days will pass like moments, or clouds, or whatever, but a worthwhile buy for the friendless. Get some mates first

🕹️ Soviet Strike ☆☆☆

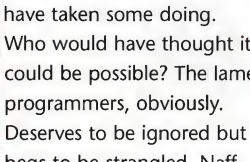

These Strike games all share the same excellent quality of gameplay as they do everything else. Once

you own one you've got a fair idea of all the others. Nuclear Strike is the best of the series, but this one shares pretty much all of Nuke's good points.

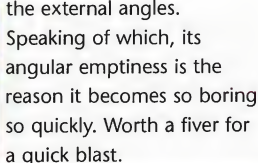

🕹️ Starblade Alpha ☆☆☆

The arcade version was terrible and this conversion, amazingly, manages to be even worse, which must have taken some doing. Who would have thought it could be possible? The lame programmers, obviously. Deserves to be ignored but begs to be strangled. Naff.

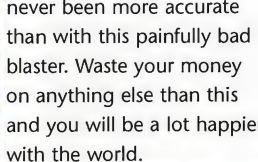

🕹️ Starfighter 3000 ☆☆☆

An early 3D effort with some fine but all too rare moments of action, particularly when viewed from the external angles. Speaking of which, its angular emptiness is the reason it becomes so boring so quickly. Worth a fiver for a quick blast.

🕹️ Steel Harbinger ☆☆☆

See that single star in the right hand corner? That means that a game is a bunch of vile gut juice and it's never been more accurate than with this painfully bad blaster. Waste your money on anything else than this and you will be a lot happier with the world.

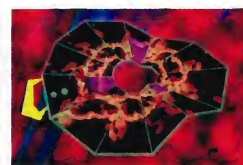

🕹️ Steel Reign ☆☆☆

Painful weather that. Almost as grim as the weather in Manchester. The game itself is even worse.

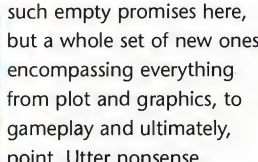

🕹️ Tempest X3 ☆☆☆

Three games in one, so let's do some maths. Now class, listen up. 3 x shite = triple shite.

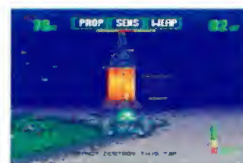

🕹️ The Fifth Element ☆☆☆

Big news at the box office thanks in no small part to the unfulfilled promise of a spot of Mira minge. No such empty promises here, but a whole set of new ones encompassing everything from plot and graphics, to gameplay and ultimately, point. Utter nonsense.

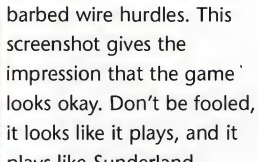

🕹️ Tigershark ☆☆☆

Dull nautical non-event involving blasting all and sundry in the big, deep sea.

🕹️ Total Eclipse ☆☆☆

Marginally more entertaining than the Bonnie Tyler tune, but then so too is partaking in the naked 400m barbed wire hurdles. This screenshot gives the impression that the game looks okay. Don't be fooled, it looks like it plays, and it plays like Sunderland.

€ Tunnel B1

Fast tunnel-based blaster that set the pace in the early days and now limps around at the back.

In its day it looked the business but things have moved on considerably since then. So it's 'bye-bye B1' and 'hello more interesting pastime'.

€ Twisted Metal

The original PlayStation road rage game was a jerky disappointment, despite its cool 'kill 'em all' attitude.

Featuring psychotic ice cream vans and hellbent taxis, it's been surpassed by games all smoother and generally more alluring. So we move along now to...

€ Twisted Metal 2

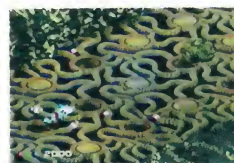

A superior sequel to the original which still features a bunch of cars that have been fitted with a stupid

amount of fire power. Enter an arena and kill everyone you see. Much better than the first one and worth a look for anyone who suffers serious road-rage.

€ Viewpoint

It may sound like a cheap Bournemouth bed 'n' breakfast but is actually a visually attractive

shoot'em-up that is heavy on the old-school shooting side. It's a shame that tricky play lets down what is otherwise a fairly reasonable no-brainer.

€ Vigilante 8

An excellent blend of speed, bullets and no holds barred action. This is what Road Rage is all about.

€ Viper

Good-looking shoot'em-up, but one that also offers nothing original in terms of gameplay.

€ X2

You can't beat a game with a nice and unassuming name. X2 features some pumpin' techno soundtracks

and a difficulty level that will make you rip out your own hair, and that of anyone else to hand. Feeling tough then have a look. Wimps should stay clear.

€ Xvious 3D/G+

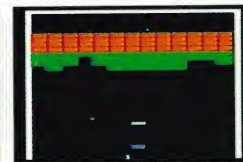

As game names get more and more ridiculous the gameplay goes down and down. Trash. Avoid.

miscellaneous

€ Atari Arcade's Greatest Hits

A rather dreary compilation of old 'classics' with an added backstage tour of the games' origins.

€ Atari's Greatest Hits 2

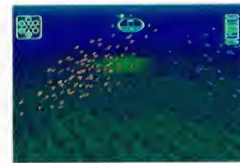

Another chance to remind yourself just how far games have advanced in such a short space of time.

Nostalgia, but little else. Certainly very little enjoyment or long term pleasure to be gained. Slightly better games than volume one managed.

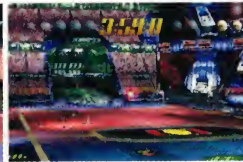

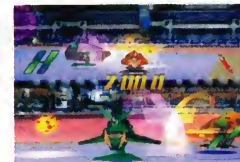

€ Aquanaut's Holiday

Games equal fun, that's how the equation is meant to work. This is the loosest use of the word "game" that you will ever have the mis-pleasure to "play." Aquanauts at work, now that would be something. A truly awful game that has no place anywhere.

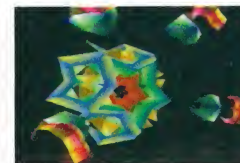

€ Ball Blazer Champions

Sounds painful but turns out to be an okay game. Never spectacular but might be worth picking up.

€ Baby Universe

You know that sound to light flashing demo thing that you get with your PlayStation? Well now you can pay

£20 for a slightly better one if you're mad. As something to leave on in the corner of a room during a party it might be okay, as anything else it's tres poor.

€ Bust A Groove

Dance yourself to death with this cool Parappa clone. Classy game packed full of annoying music that you'll be humming for days. If anything though it's more fun to watch than play as you can appreciate the comedy of the characters more. Check it out.

€ Chessmaster 3D

You can either play chess or you can't Those who can but can't find anyone else to play may find this one interesting. Anyone else would be better advised of getting a board and playing a real person. Remember them? They look like you! Well.. almost.

€ Courier Crisis

Gameplay crisis would be a better title. A modern day Paperboy that goes badly wrong. Best avoided.

€ Bomberman World

Multiplayer frag-fest that will keep you and your mates up all night long. But not much cop in single-player!

€ Dodgem Arena

Straight out of the heart of Amsterdam's Red Light District comes this cross between Wipeout and Ice

Hockey. Collect the puck and fire it into the moving goals. Bloody difficult, bloody frustrating and another of the brigade best played in two player mode.

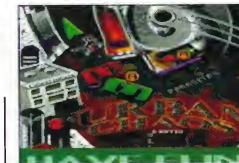

€ Die Hard Trilogy platinum

Thrills and spills from start to finish in this varied movie caper. Quality game well worth owning.

€ Extreme Pinball

Oh no it isn't. You'd have more fun playing one of those crappy plastic poundstore pinball games than going anywhere near this bunch of rusty balls. For god's sake, if you want to play pinball then go to the pub and pay fifty pence. Pointless crap.

Fluid ★★★

Trippy flipper-fest with this music creating Dolphin. Only for the serious post-club chill out really.

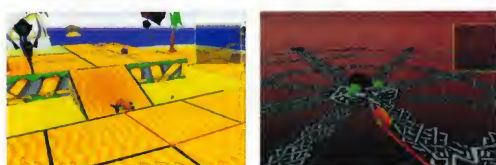

Frogger ★★★

Dodge traffic with everybody's favourite slimy amphibian in this 3D remake of the classic.

Live Wire ★★★

Another old game gets rehashed. Gameplay's repetitive but the handbag house soundtracks lifts it a bit.

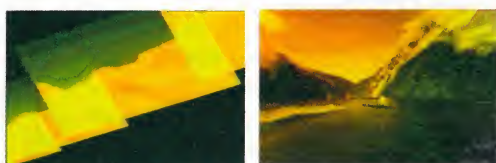

Mr Domino ★★★

Oddball Jap puzzle game that will have your ripping your hair out. Addictive though.

Music ★★★

Not a game but a music making tool. 1000s of samples to patch together and great fun too.

Namco Museum Vol 1 ★★★

Old games that look crap. And play alright. For a while, but then get drab. Understand?

Namco Museum Vol 2 ★★★

For Christ's sake! Stop dredging up the deceased. Let them rest in peace. Again, a better volume two.

Namco Museum Vol 3 ★★★

The further into the back catalogue you go the fewer classic games there are it seems. Why do they still churn these out? People obviously have rose tinted glasses when it comes to shite like this but after five minutes they're consigned to the bin. Stop it.

Namco Museum Vol 4 ★★★

Jesus frigging wept. How many more of these games are we going to have to endure? I mean, if people wanted to play tired old games, they'd make an effort and buy a Spectrum from the charity shop for a fiver. And that includes games. Waste of money?

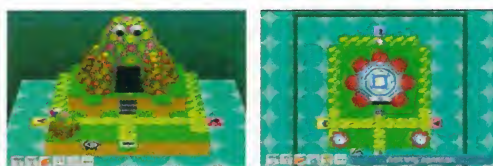

Overboard ★★★

Ride the high seas in this bold attempt at something a little different. It just doesn't quite reach the mark.

Pet In TV ★★★

Annoying Tamagotchi-style effort which will make your eyes burn with its psychedelic landscapes.

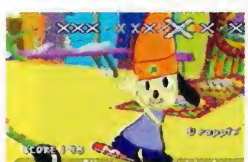

Pitball ★★★

Who ever said that the majority of futuristic sports games are poorly realised bum fluff? Well this one proves their point in so many ways. Do anything else than play this game. And that includes walking on broken glass in bare feet. File under shit and leave.

Parappa the Rapper ★★★

The most original game on the playstation that will make your Granny believe that Rap music can be quite catchy. The gameplay is basic, but the reamness of the game shines through. You you can even pick it up for under twenty quid . An ansolute must have bargain.

Poy Poy ★★★

Recently beaten by the imaginatively named Poy Poy 2 as being the top multi-tap game for beer fueled night in with "der boyz." Pick up rocks and chuck them at your opposition 'til only one survives. Fun, yet limited and only worth buying at a slashed price.

Poy Poy 2 ★★★

You'll need a multi-tap to fully appreciate this quirky pain game, not for loners, but a multi-player miracle.

Pro Pinball: Big Race USA ★★★

The latest unsurprisingly atrocious attempt at bringing the bar-room classic to the PlayStation. People need to learn that we want variety and that supplying us with just a single table simply isn't good enough. Apart from that it's standard fare anyway.

Pro Pinball: The Web ★★★

Hey, one whole table for the price of 70 games of pinball in any pub in the country. Ever get that feeling that a games company has pushed a pipe into your bladder and is busy taking all the piss you have? Play this and you will know what I'm talking about.

Pro Pinball: Timeshock ★★★

The whole Pro Pinball series has been slightly disappointing. This is the best of the three though.

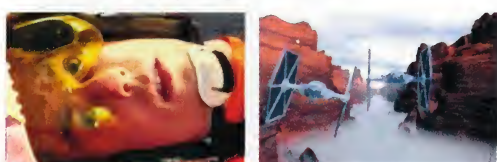

Rampage World Tour ★★★

An ancient arcade conversion based on the old B-Movies. Take control of a huge King Kong or Gorilla and smash down buildings and grab all the goodies before the others do. Frantic fun but it all gets a bit repetitive before too long. Be careful.

Rebel Assault 2 ★★★

You can't usually go wrong with Star Wars but Rebel Assault 2 is a very poor game indeed.

Williams Arcade Hits ★★★

They were arcade hits but now they're something that rhymes with it. This ridiculous excuse for a collection should be dealt a swift blow to the back of the head, dumped in a waste truck to be cremated and saved in an urn on the mantelpiece. Don't chuffin get it!

Rampage 2

A new spin on an ancient coin-op. After a few minutes it becomes clear that it's sooooo repetitive. Despite a

few chuckles, it's the same old tired engine, offering absolutely nothing new. You've seen it all before, don't bother buying it again.

Riot

Futuristic game in crap game shock horror. It's not a new story is it, and this game does nothing to

change the age old story. It has no redeeming features and an overall drabness that will make old-time gamers hark to the days of SpeedBall 2.

Rosco McQueen

Firefighting in the Towering Inferno whilst battling a range of robots in this enjoyable extinguish 'em-up.

Spice World

Fun for alco-pop boppers. Contains interviews, dances and song remixing. Limited appeal though. Obviously.

Tilt!

Surprisingly enjoyable pinball game which in itself is unusual. Good clean fun for all the family.

Trap Runner

Top Idea! Run about, plant bombs – kill enemy. Unfortunatley, it gets very samey, very quickly.

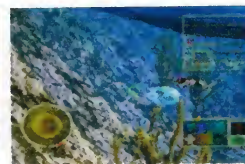

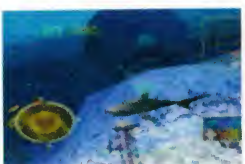

True Pinball platinum

You lot think that writing about games is a doss don't you. Well try talking about a shit load of equally bad pinball simulations and then see how it feels. It really is that tough! There is only one decent pinball game and that's Tilt. This one is just as bad as the rest.

Treasures Of The Deep

Eagerly anticipated underwater romp that never quite lived up to its undoubted aquatic potential.

Um Jammy Lammy

Parrapa the Rapper with a cute guitar weilding lamb taking the doggy dogs place. As fun as you can get.

Actua Ice Hockey

The Actua Sports series expands into the world of American sports. Not as good as the NHL series.

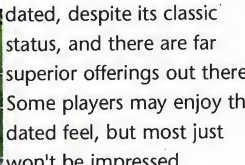

Actua Ice Hockey 2

Not as slick as NHL '99 but worth getting if you can get it cheaper than EA's effort. OK for a puck around.

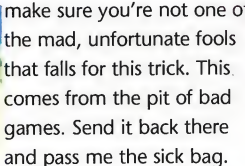

Actua Soccer platinum

Twenty pounds may seem like a bargain, but be warned. This piece of football action is starting to look dated, despite its classic status, and there are far superior offerings out there. Some players may enjoy the dated feel, but most just won't be impressed.

2xtreme

Rubbish name for a rubbish game. It's easy to cash in on the penchant for extreme sports at the moment, so make sure you're not one of the mad, unfortunate fools that falls for this trick. This comes from the pit of bad games. Send it back there and pass me the sick bag.

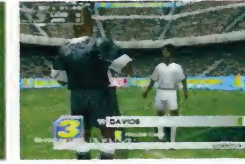

Actua Soccer 2

Looks extremely dated in comparison to what's below. Not really worth getting these days.

Actua Soccer 3

One of the best football games to appear on the PlayStation. Looks shit hot, plays like a dream.

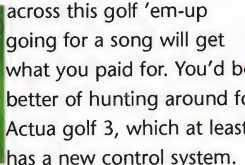

Actua Golf

The original golf game had a few minor faults but still did the business, but it all looks very dated now.

Actua Golf 2

There is nothing new here that would warrant an upgrade from the original. Those of you who come across this golf 'em-up going for a song will get what you paid for. You'd be better of hunting around for Actua golf 3, which at least has a new control system.

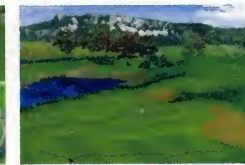

Actua Soccer: Club Edition

Shocking rip-off that everybody should ignore. Identical in most respects to the original. Very poor.

Actua Golf 3

Gremlin's latest club-swing is far superior in both graphics and game options. The best of the three.

Actua Tennis

Another addition to the Actua series further swells Gremlin's sporting library. Average game though.

Adidas Power Soccer

Another big licence that pumps too much money into getting a household name, and not enough investment in actual game design. If you've got your Adidas bag, boots and tooth floss, then good luck to you with this one, It's shite. So heed our honest opinion.

Adidas Power Soccer '97

Yet another pathetic footy offering from Psygnosis. Same boots, same game. Tsk.

Adidas Power Soccer '98

The Power Soccer brand goes from strength to strength with yet another crap soccer sim.

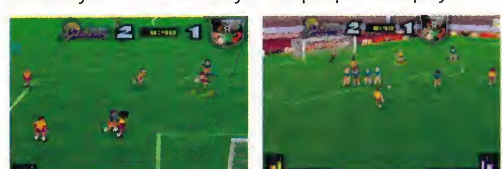

Adidas Power Soccer 2

An ever oh, so slight improvement on Adidas Power Soccer Bear in mind that the original was pretty bad to and that should give you some indication that this incarnation is well worth avoiding. Like the plague...or a herpes-ridden ex-girlfriend.

All Star Soccer

An average footy game that doesn't take itself too seriously. But it's hated by most people who play it.

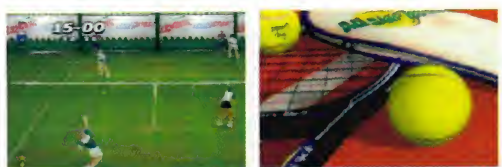

FIFA 99

Quality football game, possibly the best there is. An essential purchase for all footy fans. Away the lads.

All Star Tennis

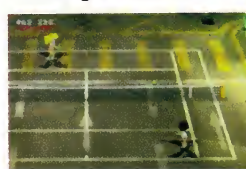

Novel features and eight-player gaming options make this an unusual tennis title. Worth a passing glance.

Anna Kournikova's S.C. Tennis

The best tennis game there is, with the bonus of featuring a hot Russian chick with a peachy arse.

The game gives a whole new take on ball-play, and its addictive playability will have you coming back for more. Check out the tennis death match option.

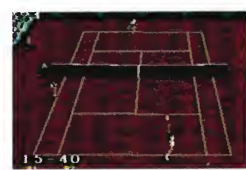

Beach Volley Heroes

What a great excuse to make lots of gags about bouncing breasts. The only Volley ball game on the PlayStation gives you plenty of material to snigger at, while managing to be a surprisingly good game. But who wants to play volleyball on their TV?

Break Point

You would think that creating a decent Tennis game would be a piece of piss, they've been around since the very first consoles after all. Well, no. Break point just goes to show you how wrong you'd be. Like watching a game on Wimbledon's court 12.

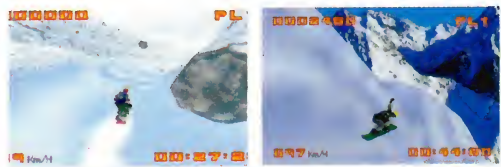

Brian Lara Cricket

Superb cricket game marred by a high quantity of bugs. Live with them though and you'll love it.

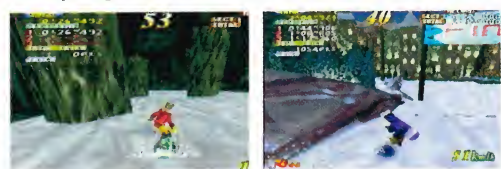

Chill

Bollocks snowboarding cash-in. Nice graphics but now where did the gameplay get to? Certainly not here.

Cool Boarders

Playable but ultra short snowboarding game. It's trendy to get rad but the game never really gets there.

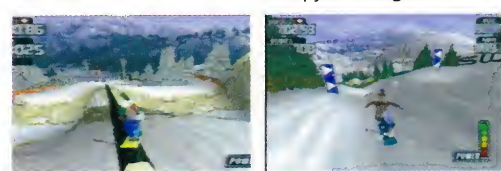

Cool Boarders 2

Improvement on the original offering more tracks, stunts and more adrenalin fuelled gameplay.

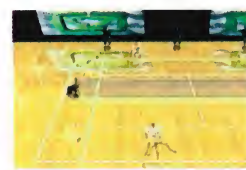

Cool Boarders 3

The best snowboarding game on the PlayStation, make no mistake. Be sure to own a copy of this game.

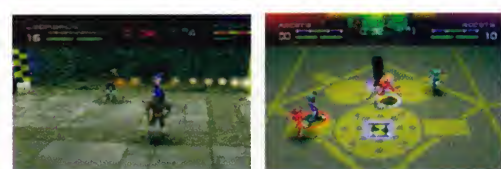

Davis Cup Tennis

A big licence tennis game that proves how wary you should be about big sponsorship games. Be patient and get yourself some strawberries and cream or something. Alternatively go out and buy Anna Kournikova's S.C. Tennis to see how it should be done.

Dead Ball Zone

Futuristic football for those with savage intentions. Hits where it hurts for a nice break from the norm.

ESPN Extreme Sports

BMX racing amongst others in a truly poor sports game. The best thing to do is to pretend that this never existed. If this was a girl you'd finish with her for being dog ugly before your mates ever found out that you'd snogged her. And took the piss forever.

Everybody's Golf

Wonderfully playable golf game that ditches crappy photorealism for playability. We love it.

FA Manager

Well, what do you know, it's a good example of how not to do a footy management game. Avoid.

FA Premier League Stars

"Dear Miss Bea, I've just bought FA Premier Stars and it's shite - give me cheats!" Top of the charts? Why!

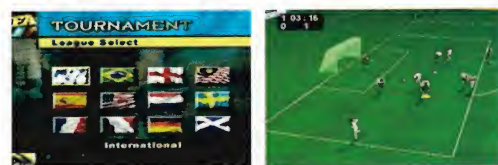

FIFA '96 platinum

Those of you who brag about how good FIFA '99 is should look back at this earlier effort and see exactly things have come on. Obviously it's an expensive way of demonstrating how duff the '96 game is. But you get the point. It's crap. So be warned.

FIFA '97

Looking dated in comparison to RTWC. Average at just about everything. Avoid like the plague.

FIFA RTWC '98

Leaves all other FIFA releases in the shade. Contains all Premier league teams from around the world.

Goal Storm

This was one of the first football games that was available on the PlayStation. It was created by the Japanese and, wouldn't you know it, it shows. With so many impressive footy games out there, it's hard to say who this dribble wreck of a game would appeal to.

ISS Deluxe

A pretty bland footy affair which could have been better. But wasn't. So avoid it. Easy.

ISS Pro platinum

Perhaps the most overrated football game ever. Check out the N64 version for how it should've been done.

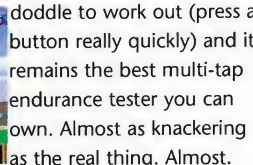

ISS Pro '98

Vast improvement and perhaps the People's Choice. Still doesn't come close to the N64 though. Simplistic.

Int. Track & Field platinum

The is still far and away one of the most playable and addictive games you can play. The controls are a doddle to work out (press a button really quickly) and it remains the best multi-tap endurance tester you can own. Almost as knacker as the real thing. Almost.

Jonah Lomu Rugby

Superb recreation of a tricky sport to convert. The best rugby game on any format without doubt.

Kick Off '97

Tries a little too hard to be something special but ends up being as dull as they come. Should be better.

Kick Off World

Playable enough but overtaken and overshadowed by so many other football titles.

Knockout Kings '99

Great atmosphere and great meaty sequences in this pugilistic treat. Gonna box you ears son.

Libero Grande

You only control one player while the action happens around you. Not as bad as it sounds - quite playable.

LMA Football Manager

The best football management game ever to grace the playstations hallowed, grey interior. Buy, Buy, BUY!

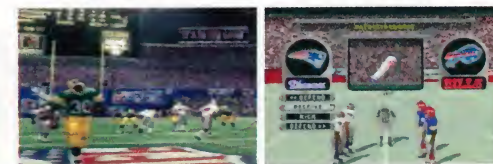

Madden NFL '97

All the tactics and all the stats, but it looks dated when compared to later versions. Good second-hand buy.

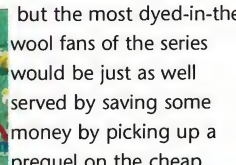

Madden NFL '98

Vastly improved graphics than the original. But the gameplay remains largely similar.

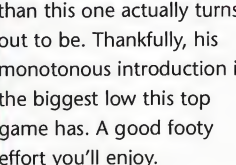

Madden '99

Largely similar graphics. Largely similar gameplay. Added extras and a neater front end, but in truth all but the most dyed-in-the-wool fans of the series would be just as well served by saving some money by picking up a prequel on the cheap.

Michael Owen's WLS '99

You'd think that a game that shared Michael Owen's mountain shattering charisma would be a lot worse than this one actually turns out to be. Thankfully, his monotonous introduction is the biggest low this top game has. A good footy effort you'll enjoy.

€ Nagano Winter Olympics ☆☆☆

What a shame. This eagerly awaited frost-em-up turned out to be a to be more of a lame sleet shower in Hull than a tourist crumpling avalanche in the Austrian Alps. There are much better winter sport games available - such a shame you have to be looking.

€ Namco European Soccer ☆

A truly awful rendition of the sport that every Tom, Dick and Harry tries to render on the PlayStation. Some clever people have managed it, Namco haven't. More of a Torquay United struggling against relegation than a treble winning Manchester United kind of game.

€ Namco Smash Court Tennis ☆☆☆

The most playable tennis game on the PSX and the most fun you can have with your clothes on. Probably.

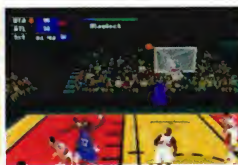

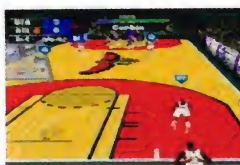

€ NBA Hangtime ☆☆☆

This one manages to do the job without any danger of producing an interesting game. It may interest those of you who like their American sports, which are of course just thinly disguised British schoolgirl's games. But only if it came free with a top game like Spice World.

€ NBA Fastbreak '98 ☆☆☆

With so many bazyball games clamouring for our dough, it takes a doozer to score. This ain't it.

€ NBA In The Zone ☆☆☆

Tell you what - look at the star rating and skip to the next one, yeah? Hardly any of you will want a basketball game anyway but if you did, believe us, this is not the place to start your shopping. Look for the NBA Live series and you can't go far wrong.

Crash Team Racer

The **BIG** Picture

NBA In The Zone 2

☆☆☆

Cheers. Might as well tell you about the better of the two eh? Well it's like this – as basketball games go

this is as good as you're likely to get. Depends on whether you like the fast arcade-y feel it has or prefer a more simulation-like experience. Okay?

NBA Pro '99

☆☆☆

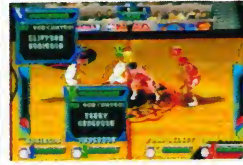

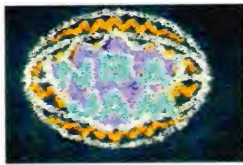

Arcade hoop action that is fine for a quick dribble, but lacks any of the additions that in depth players yern for.

NBA Jam Extreme

☆☆☆

Playable enough in an uninspired way, but does a disservice to the great old NBA Jam franchise.

NFL Blitz

☆☆☆

You want to play American Football? Get this, it's les boules de chien! And that's no merde talking either!

NFL Blitz

☆☆☆

The rules have been abolished and Blitz is out-and-out violence. Fantastic stuff all round.

NBA Jam TE

☆☆☆

This, on the other hand, is spot bollock on. Two-on-two action with the turbos fully charged and a

fantastic cheesy commentary featuring every bazyzzy cliché and a few more besides. Additional power-ups make it a treat in either one or two-player modes.

NFL Gameday

☆☆☆

It's up there with the earlier Madden Football games but only manages to offer a slightly different

perspective. It's no less offensive than the rest of the series, but it sure as buggery isn't any better, so you need to watch out before spending your money.

NHL Faceoff

☆☆☆

One of the better competitors to NHL. Still worthy of a play even today if you can find a copy.

NBA Live '96

☆☆☆

An extremely well received version of the net-ball impostor. It attempts to simulate the game far more

than it's 'Jam counterpart but has been superseded by four years of superior updates. Just consider how embarrassing it would be to just have the old stats.

NFL QB Club '96

☆☆☆

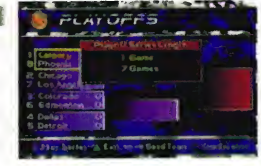

Thanks to the huge demand of American Football, we can expect to see more and more of these piss average games. If only people refused to buy the naff ones, then the publishers would be forced to release only good games. Simple eh? Nah, it'll never catch on.

NHL Faceoff '97

☆☆☆

This sequel was a real disappointment when you consider the quality of the original. Steer clear.

NBA Live '97

☆☆☆

Improved and updated with all the league players and a greater feeling of control. Really good effort.

NHL '97

☆☆☆

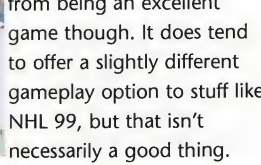

The NHL series stand out as the best ice hockey games. This early version looks old now though.

NHL Faceoff '98

☆☆☆

Of the three Faceoff games this is the second best and is infinitely better than the above. It's still a long way from being an excellent game though. It does tend to offer a slightly different gameplay option to stuff like NHL 99, but that isn't necessarily a good thing.

NBA Live '99

☆☆☆

The franchise had skipped a year without a sequel so this was more than inevitable. Doesn't add anything

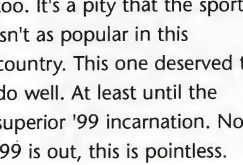

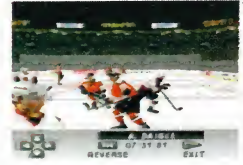

new to the series except update the players and provide us with a new front end. Faced with this at full price and the others at half, choose those.

NHL '98

☆☆☆

And with this game the sport known as Ice Hockey was brought to the PlayStation. And most satisfactorily too. It's a pity that the sport isn't as popular in this country. This one deserved to do well. At least until the superior '99 incarnation. Now '99 is out, this is pointless.

NHL Powerplay Hockey

☆☆☆

Looks mint but the depth of some of the other sims is sadly lacking. Room for it somewhere though.

NBA Pro '98

☆☆☆

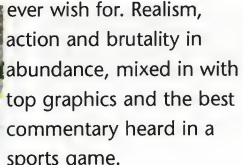

A tramp in the house of the lords and ladies. Or in layman's terms, a steaming bottom otter.

NHL '99

☆☆☆

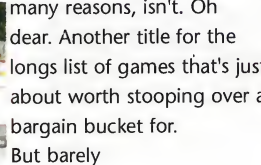

Easily one of the most perfect sports games released on the PlayStation. Just about everything you could ever wish for. Realism, action and brutality in abundance, mixed in with top graphics and the best commentary heard in a sports game.

NHL Powerplay '98

☆☆☆

This NHL puck-fest shares the same fate as its predecessor, it looks like a good hockey game but for so many reasons, isn't. Oh dear. Another title for the longs list of games that's just about worth stooping over a bargain bucket for. But barely

🏅 Olympic Games

Finger numbing Track and Field style games like this have always been popular. This poor example doesn't really help the cause though. Not worth spraining your forefinger for and doubtless they'll be a Sydney version in the near future to pay for.

🏅 Olympic Soccer

One of the early attempts with a rather silly license. Back in it's day it played like a dream, but now it's getting a little old in the tooth. Still plays a good game of footy although the programmers have progressed to the likes of World League Soccer.

🏅 Onside Soccer

This wasn't the best football game when it came out all that time ago, which shows just how bad the competition must have been. It's now been totally eclipsed by the latest FIFA and Actua games. Don't bother because you'll be wasting your time.

🏅 Open Ice

Comparatively poor attempt at capturing the speed and brutality of the sport.

🏅 PGA Tour '96

Competent but uninspired golf game featuring only the most famous, as the left screenshot demonstrates.

🏅 PGA Tour '97 platinum

All the Tour players and a couple of the courses. Slightly altered gameplay in terms of shot-taking.

🏅 PGA Tour Golf '98

An update for the sake of it, but one which managed to go a little further in terms of graphics and – for want of a better word – “atmosphere” of the game. Not worth paying double what you'd pay for '96 or '97 though. See also Tiger Woods, the '99 sequel.

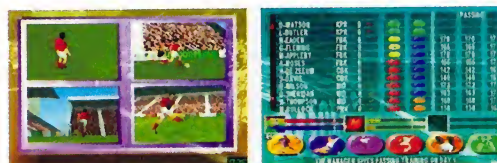

🏅 Phat Air Snowboarding

Bandwagon-jumper with a few nice touches which fail to increase longevity beyond minutes.

🏅 Player Manager

The Mark Lawrenson of footy management games. Er, he was a shit manager, in case you're wondering.

🏅 Pool Shark

Novel game if only because of the rarity of its subject matter. Far from bad, but fairly workmanlike.

🏅 Power Move Pro Wrestling

A slightly above average wrestling fest with a few neat touches. No-one's first choice.

🏅 Premier Manager '98

Plenty of stats but not much excitement in this just-above par management game.

🏅 Premier Manager '99

Unnecessary sequel to the above which does well to provide a complex and involving experience given the PlayStation's limitations when it comes to memory/stats-hungry software. Improved presentation could have made it even better.

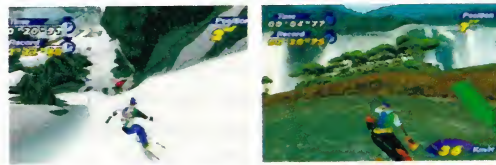

🏅 Puma Street Soccer

From the chaps who make pumps. Four-a-side “action” for rich kids with no mates. Pretty awful.

🏅 Rushdown

Three extreme sports in one great package, a marketing man might have said. He'd have lied...

🏅 Sampras Ext. Tennis

That'll be Tennis with hand grenades then. A brave attempt to stop Smash Tennis being the best tennis games there is. It was a close competition, but both have been overtaken by Anna Kournikova's offering which shows them both how it should be done.

🏅 Sensible Soccer

Don't be fooled by the fact it looks shite. It plays even worse. The crappiest football game available, really.

🏅 Slam 'n' Jam '96

Look at the age of the poor thing. It tries so, so hard to be acceptable but fails pathetically. A bit like an really old, smelly springer spaniel that you ought to take down to the vet's and get put down immediately. Then get a hamster instead, cos they're cute and cheap

🏅 Snow Racer '98

The fastest mountain racer on the PlayStation and a worthy addition for phat boys all over.

🏅 Soccer '97

Updated version of Olympic Soccer with league teams. Looks good and plays well.

🏅 Space Jam

Basketball-cartoon combo with a movie tie-in. Go on, try and have a worse idea, we challenge you.

How often do you buy PlayStation Pro? (every issue, most issues, occasionally)

Are you old? How old, exactly?

How many games do you own? How many imports?

Streak

Snowboarding without the snow on a board Michael J. Fox would have been jealous of. Fun but limited.

Street Skater

Surprisingly rad boarding game which calls for your funk with all manner of street furniture. No substitute for Cool Boarders 3, and it looks worse than Chris Evans in drag, but the easy to grip gameplay is near perfect for some post piss-up entertainment

Striker '96

Look at the age of this for Christ's sake. It may have been one of the first Football games to impress, but will only be of interest to compulsive bargain shoppers and retro gamers. The Andy Gray commentary is grating now too. Turn down the volume.

Tennis Arena

Realistic movement and all-round unpolished competence. An acquired taste and a second choice.

Ten Pin Alley

The fun with bowling of this variety is the amount of beer you can consume between shots. Which kind of has an effect on the rest of the evening. But, like a Stephen King horror story, this makes the transition to screen very badly. Not a bad arse on her though.

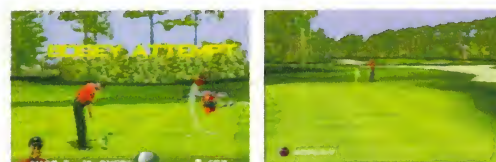

Three Lions

Talk about football coming home. This average effort should have stayed there.

Tiger Woods '99

Or PGA Tour '99 if you like. Not totally rank, but look under P for a better, reasonably priced alternative.

Total NBA '96

A fair bit of hangtime is available here. It's getting to the end of its life though and there are now better basketball games out there. Another case of "worth a bargain buy" really. Not worth any real money. In fact, you'd probably get it for around 50 seashells.

Total NBA '97

What? WHAT? Go away. Read the next one. It's identical. Honest!

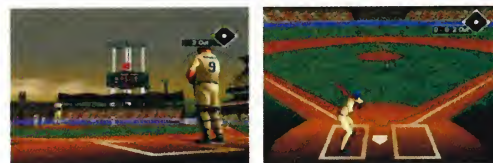

Total NBA '98

The second in the series improved on the first in terms of gameplay but not graphics, and this improves the graphics while the gameplay remains largely the same. The best of the "Total" bunch. It sounds good too, and is in fact well worth checking out.

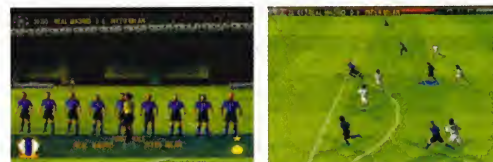

Triple Play 2000

Top Baseball action that will please fans and American toss game haters alike. Hey! Swing bada-bada SWING!

UEFA Champions League

A fine footy fiesta focussing on the world's top club competition, including every classic team ever involved

V Tennis

Sub-standard arse-icle. A 40 nicker space filler in your CD rack. What's he doing down there, the freak?

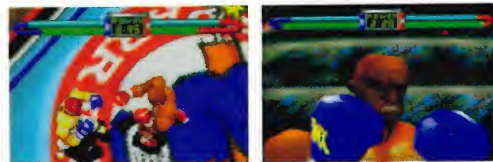

Victory Boxing

Build up your boxers face pummeling skills then let him loose in the ring. You can't fight any real life virtual fighters (does that make sense?) and it has been bettered by it's sequel. There are better pugilistic games in the stores so get them instead.

Victory Boxing 2

More involved than the first. Take your fighter through the ranks. Mostly the same game though.

Virtual Golf

This just goes to show you how badly old simulations age. There are fresher, faster and generally much groovier reproductions of the sport. If you want to spoil a decent walk in the country with a game of golf this is not the way. Don't say we didn't warn you.

Virtual Pool

The risk of a battering off Nobby the Nails down the pub is worth taking if you're in with a chance of getting on the table. Ultimately, it's cheaper than the battering your wallet'll take and at least you'll get an enjoyable game. Tell him no face hits though.

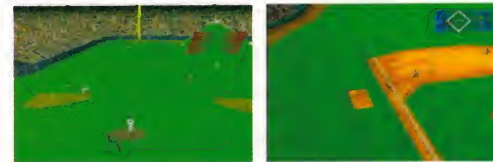

VMX Racing

Like BMX, only without the licence. Or gameplay. Oh, and with engines. So nothing like it then.

VR Baseball

Stunning graphics and a welter of options, but the PSX teams are so shit hot you'll never want to...

VR Baseball '99

No one wants to pitch do they? You can't beat the feel of a three foot piece of wood in your hands.

WCW vs the World

The truth is that these games are so much alike. This is a better example of the genre though.

WWF In Your House

Where as this is an atrocious one. And where's Big Daddy? What do you mean he's dead?

WWF Wrestlemania

Good enough fun if you enjoy taking the piss out of this so-called "sport." There are plenty of moves which are let down by some fiddly controls. Not the best of the many wrestling games around. But lets face it, there all a bit shit really, aren't they?

World Cup '98

The licensed follow-up to Road to World Cup. And game which is very well done indeed without giving too many new features. A different style from the recognised brands such as FIFA and Actua, and worth a look for those whose own a couple of the above.

World Cup Golf

The ever popular golf simulation genre should hang it's head in shame. World Cup Golf is it's darkest hour. In fact, they should all get together and club this bollocks to death with some nine irons. Now that would be an interesting game to play. This isn't.

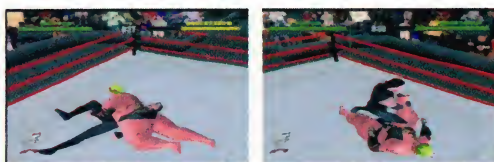

World League Soccer

This is what they called it before Mikey Owen came on board. See M for details and make your choice!

WWF Attitude

Hilariously camp wrestling game that amuses the skeptic while keeping true believers happy for hours.

WWF Warzone

Well officer it was like this. There I was, doing my best to present the acceptable face of the undeniably professional sport from which I earn a living, when this trunky bastard twatted me with a folding chair! Good game this - one of the best wrestlers around.

AIV Evolution Global

At last, the chance to build a train set on your PSX. Start as a small operator and gradually build yourself up to Richard Branson proportions. It's all done in a Sim City style that will have strategists and trainspotters soiling their Y-fronts for weeks. Nice.

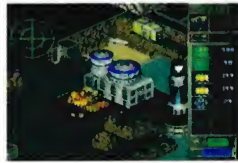

Allied General

Hexagon based wargame with leanings towards strategy classics like Risk. Bit of a blandster though.

Bedlam

Syndicate Wars of sorts for beginners. Oh, and for people who don't like games as good as Syndicate Wars too. Let that be a warning for you. Over simplistic, garish looking and ultimately not worth the money you'll end up paying for it.

Carnage Heart

People seem to think fighting robots are a good idea. Just look at Robot Wars, that's equally as poor as this.

C&C platinum

One of the classic videogames of all time. Started a sub-genre all of its own that's still going strong.

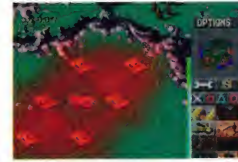

C&C: Red Alert

The second installment of C&C is a huge improvement with more action and strategy than ever before

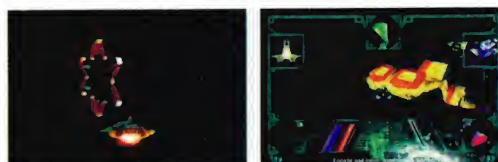

C&C Retaliation

Despite this being the best C&C incarnation to date, the originality has disappeared. It's extremely difficult to play and you will need to be a hardened Command & Conquer already to prevent you getting mightily hacked off with the thing.

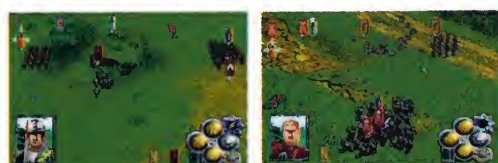

Darklight Conflict

Below average spacey strategy game that you'll probably have difficulty getting hold of anymore.

Dark Omen

If you like going into Games Workshop then this is definitely for you. Orcs galore here.

Defcon 5

This one's all about being strategic in three whole dimensions. Wow. There is nothing here that will persuade arcade fans that deep thought is the way to go. There's even less to make hard core thinkers load it up to make their brains glow. Boring

Grand Theft Auto

It had the conservative press up in arms, which by itself has got to make it worth a look. You drive, steal cars, do jobs for the mafia, kill innocent bystanders by accident, or for kicks, and generally do all the bad stuff that goes with being an original wide boy.

KKND Krossfire

Despite the obvious C&C look this isn't really too much of strategy affair. It's more of a ballsy future fight for survival, with the winner getting to bugged mutant mongrel marines carrying very large sticks indeed. Promising enough, but could have been better.

Lemmings

One of the classic puzzle games that cost a generation many, many hours of worthwhile activity. Saving the green-haired rodents became an obsession and now you can play it all again. Plus Oh no! More Lemmings is chucked in for free as well. Bargain!

€ Magic Carpet ☆☆☆

The chance to play the PC hit that featured so heavily in Neighbours. What a treat. Fly a carpet around

mystical kingdoms in this very strange blend of action and strategy. A fair game that seems a bit on the ancient side itself. Curly toed slippers are optional.

€ Monopoly ☆☆☆

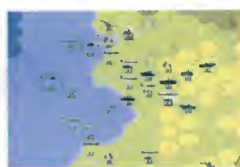

All the fun of hunting round the attic for a battered old box, only to find that a few pieces are missing

including the little scotty dog that everyone wants to use. Well there's no cute pooch but everything else is faithfully reproduced. Pointless. And very shit.

€ Panzer General ☆☆☆

Take control of Ernst Rommel as he attempts to blitzkrieg his way across western europe. The screams

of pain and smell of burning flesh are removed giving you a view of the "battle" from a nice, clean map. Crappy graphics and a boring game. Avoid.

€ Populous: The Beginning ☆☆☆

Another great PC game wends its way onto the PlayStation and rather good it is too. Recommended.

€ Return Fire ☆☆☆

These strategy games that pride themselves on heavy detail rather than sexy graphics are only shooting themselves in the foot.

What's the point of recreating it on the PSX if it isn't going to have any visual qualities whatsoever? Best left to the blind.

€ Risk ☆☆☆

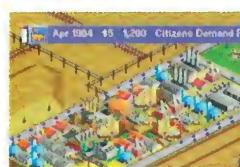

Another pointless conversion of a boardgame. Half the fun of these games is sitting around a piece of card

and arguing over plastic soldiers. Why bother putting in on your telly? Maybe you need the floor space, or maybe you are just very silly. Get a life, and leave this alone.

€ Sim City 2000 ☆☆☆

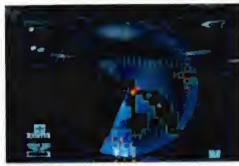

Planning and building a city can be fun. No really, it can. Designate zones for commercial or industrial

growth and watch your city grow. There's more to it than that and you will either get highly addicted or never play it again. But definitely worth a look.

€ Space Hulk ☆☆☆

It's sub-headed Vengeance of the Blood Angels, which will make a great deal of scene to some of you.

For those of us who don't spend every spare hour hovering around Games Workshop stores, there is little to recommend about this man vs. alien thinker.

€ Syndicate Wars ☆☆☆

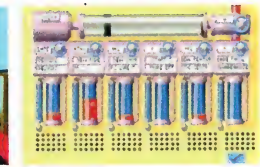

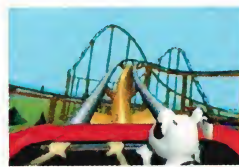

Guide you team of blood thirsty androids around a big, dark and rainy city. It's got some kick ass

weaponry and some cool missions, all done in a Bladerunner style setting. It's beginning to look a bit old hat now, but is still a classic strategy title

€ Theme Park ☆☆☆

Alton Towers 'em-up. Watch out for people chucking up all over the show and make sure you clean it up!

€ Theme Hospital ☆☆☆

If your one of those people who chortles at the sound of a fart, then this NHS'em-up will be the one for you.

It's all about making money by treating as many puking patients as possible. make a mistake and vomit will flood the corridors. Quirky health care fun.

€ Transport Tycoon ☆☆☆

Absorbing light rail network 'em-up that will have you hooked, especially if you've got spotter tendencies

€ Warhammer ☆☆☆

But then so is crapping in someone's letterbox. Oh sorry, we're onto something else now. Er, very nice.

€ Warzone 2100 ☆☆☆

The best looking and most detailed Real Time Strategy game there is. Accept no substitute, this is the best.

This top quality, hi-res 3-D carnage is as far away from C&C as Richard and Judy is from hardcore Dutch porn. It's tough, it's addictive, it's brutal. Charge!

€ Worms platinum ☆☆☆

Pit worm against worm in this unusual game of pink and wrinkly combat. It's the best multi-player game

available and does not even need a Multi-tap. The graphics are terrible, but this just goes to show you that quality playability will always shine through.

€ X-Com: Enemy Unknown ☆☆☆

Take on the alien menace in this turn based bug hunt. First you get to shoot down their ships, then hunt the

crash site for the little critters. Nick their technology and dissect their bodies to build bigger and better weapons. Atmospheric and even scary.

€ X-Com: Terror From The Deep ☆☆☆

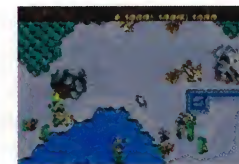

The sequel to the excellent UFO. This time the invaders are hiding in the oceans. Somebody call StingRay!

The difficulty has been cranked up to "no-way" and owning a mouse would really make things a lot easier. Want to swim? get this. Want to stay dry? Get UFO.

€ Warcraft 2 ☆☆☆

Easily playable Command and Conquer-alike that offers more hours play than a bucket of Viagra.

€ Xenocracy ☆☆☆

This is basically a poor man's Colony Wars with really ropery graphics, sound and gameplay.

€ Wargames ☆☆☆

Fairly standard effort that offers little longevity in one-player mode thanks to a bland interface and unremarkable graphics. Redeems itself in two-player though where the blast-fests are a good crack for short periods of time when pissed with your mates.

**ACCLAIM ENTERTAINMENT**

PlayStation PRO

MAGAZINE

Dear Reader

It's that time again that we need to ask you for a bit of help. We know how you're obviously keen for us to be the best PlayStation magazine around and the only way to find out whether we're getting it right is by asking you what you want. Because we'd never ask you for something for nothing we're doling out thousands of quids worth of free gear to the lucky readers who are pulled out of the hat on 30th September 1999. So do us a favour and spare 5 minutes to tell us what you think.

Thanks for your support.
